Ferdinand, Annemarie Armani, 2010-07-07 Cardiovascular heart disease mortality in African Americans is the highest of all major racial ethnic subpopulations in the United States Examining race and ethnicity Cardiovascular Disease in Racial and Ethnic Minorities will reveal that there are unacceptable healthcare disparities in risk factor prevalence disease states and cardiovascular outcomes in the United States Written by a team of experts Cardiovascular Disease in Racial and Ethnic Minorities examines to what degree biomedical and scientific literature can clarify the impact of genetic variation versus environment as related to cardiovascular disease Chapters illustrate the magnitude of cardiovascular and metabolic disparities and the effect of environment on diseases Epidemiology and

Prevention of Cardiovascular Diseases: A Global Challenge Darwin R. Labarthe, 2010-03-23 **The Role of Metabolic Syndrome and Disorders in Cardiovascular Disease, volume II** Carmine Izzo, Albino Carrizzo, Paola Di Pietro, Jessica Gambardella, 2025-08-12 Metabolic syndrome is a dangerous combination of cardiovascular risk factors that correlate with each other and can increase cardio and cerebrovascular events The incidence of metabolic syndrome often parallels that of obesity and type 2 diabetes It is widespread in the United States more than 40% of people over the age of 50 have metabolic syndrome The diagnosis of metabolic syndrome is based on the coexistence of at least three risk factors including waist circumference greater than 102 cm in men or 88 cm in women systolic blood pressure greater than 130 mmHg and diastolic

greater than 85 mmHg HDL cholesterol less than 40 mg dl in men or 50 mg dl in women triglyceridemia higher than 150 mg dl and finally fasting glycaemia higher than 110 mg dl The causes are to be found in a combination of lifestyle habits diet and poor physical activity and family predisposition genetics These causes lead to the accumulation of abdominal fat which in turn plays a decisive role in favoring the combination of the various risk factors Among these insulin resistance is fundamental in the onset not only of hyperglycemia and diabetes but also of dyslipidemia and hypertension Metabolic syndrome does not manifest itself with specific symptoms which is why attention should be paid to risk factors With this in mind we welcome researchers investigating this contemporary theme This Research Topic welcomes original research articles perspectives and review articles *Encyclopedia of Cardiovascular Research and Medicine* ,2017-11-27
