**Intuitive Knowing as Spiritual Experience** Phillip H. Wiebe, 2015-09-16 This book is Wiebe's defense of the claim that a significant form of spiritual experience is found in knowing something we have no right to know He selects forty five first hand accounts from a data base at the University of Wales to make his case and in solidarity with those people recounts something of his own experience

**Metacognition** Janet Metcalfe, 2013-11-26 This special issue on the psychology of knowing about knowing bridges the parallels between social and cognitive psychology It further illustrates the benefits of pursuing in depth these connections and the phenomena and implications associated with them

**Metacognition** Pamela Joan Gray, 1993 *The Cambridge Handbook of Consciousness* Philip David Zelazo, Morris Moscovitch, Evan Thompson, 2007-05-14 The Cambridge Handbook of Consciousness is the first of its kind in the field and its appearance marks a unique time in the history of intellectual inquiry on the topic After decades during which consciousness was considered beyond the scope of legitimate scientific investigation consciousness re emerged as a popular focus of research towards the end of the last century and it has remained so for nearly 20 years There are now so many different lines of investigation on consciousness that the time has come when the field may finally benefit from a book that pulls them together and by juxtaposing them provides a comprehensive survey of this exciting field An authoritative desk reference which will also be suitable as an advanced textbook

**The Oxford Handbook of Memory** Endel Tulving, Fergus I. M. Craik, 2005-05-05 The strengths and weaknesses of human memory have fascinated people for hundreds of years so it is not surprising that memory research has remained one of the most flourishing areas in science During the last decade however a genuine science of memory has emerged resulting in research and theories that are rich complex and far reaching in their implications Endel Tulving and Fergus Craik both leaders in memory research have created this highly accessible guide to their field In each chapter eminent researchers provide insights into their particular areas of expertise in memory research Together the chapters in this handbook lay out the theories and presents the evidence on which they are based highlights the important new discoveries and defines their consequences for professionals and students in psychology neuroscience clinical medicine law and engineering

*The ^AMissing Link in Cognition* Herbert S. Terrace, Janet Metcalfe, 2005-01-20 How do we develop self awareness or a sense of self One of the most popular theories is that language plays a major role language and the narrative form allow us to develop a sense of self because this sense is dependent upon representational thought and the psychological manipulation of representations Some scholars argue against this theory claiming that more than language and representational thought is needed Comparing human and animal cognition is a particularly powerful way of examining

this disagreement if animals possess self awareness without having the representational linguistic capabilities of humans then the comparison will provide significant evidence for the argument that language and narrative form do not play the only role and that researchers may have overlooked a cognitive link This volume will be of great interest to researchers in cognitive developmental and social psychology

**Metacognitive Study Skills** Mason Ross, AI, 2025-02-22 Metacognitive Study Skills explores how understanding and controlling one's own learning processes metacognition can significantly improve academic performance The book investigates the interplay between self awareness which includes recognizing one's learning strengths and weaknesses and effective cognitive strategies Did you know that the cultivation of metacognitive skills is considered the single most impactful strategy for improving academic performance This book argues that metacognition is a teachable skill applicable across various disciplines transforming students into active strategic thinkers The book progresses systematically beginning with a definition of metacognition contrasting it with other cognitive functions It then examines how students can accurately assess their understanding followed by an exploration of cognitive strategies like note taking test taking and time management By bridging psychological theories of learning with practical strategies this book provides actionable advice for students and insights for educators distinguishing itself through its comprehensive yet accessible approach

**Cognition, Aging and Self-Reports** Norbert Schwarz, Denise Park, Barbel Knauper, Seymour Sudman, 1998-09-28 This text provides an overview of age related changes in cognitive functioning and explores the implications of these changes for the self report of attitudes and behaviours
