It might be argued that the report's findings are flawed because the study's methodology. The study had many limitations that were acknowledged but would not detract from the overall conclusion that the report is convincing.

11. *Journal of the American Medical Association*, 277: 1005-1006, 1996.

These findings suggest that there are important differences between the two groups.

It should be noted that the results of the regression analysis are consistent with the findings of the literature.
