*Architectures of Time* Sanford Kwinter, 2002-08-23 An exploration of twentieth century conceptions of time and their relation to artistic form In *Architectures of Time* Sanford Kwinter offers a critical guide to the modern history of time and to the interplay between the physical sciences and the arts Tracing the transformation of twentieth century epistemology to the rise of thermodynamics and statistical mechanics Kwinter explains how the demise of the concept of absolute time and of the classical notion of space as a fixed background against which things occur led to field theory and a physics of the event He suggests that the closed controlled and mechanical world of physics gave way to the approximate active and qualitative world of biology as a model of both scientific and metaphysical explanation Kwinter examines theory of time and space in Einstein's theories of relativity and shows how these ideas were reflected in the writings of the sculptor Umberto Boccioni the town planning schema of the Futurist architect Antonio Sant'Elia the philosophy of Henri Bergson and the writings of Franz Kafka He argues that the writings of Boccioni and the visionary architecture of Sant'Elia represent the earliest and most profound deployments of the concepts of field and event In discussing Kafka's work he moves away from the thermodynamic model in favor of the closely related one of Bergsonian durée or virtuality He argues that Kafka's work manifests a coherent cosmology that can be understood only in relation to the constant temporal flux that underlies it

**The Death of a Scientist** Alexander Vapirev, 2018-09-24 A contemporary and detailed look at the reality behind the PhD degrees and postdoctoral fellowships in academia The book explores some of the most pressing issues and unique challenges currently facing the doctoral and postdoctoral programs both on a local institutional level and on a global one where multiple complex factors influencing and governing the academic environment take place The interrelated nature of these challenges together with discussions over certain historical trends and demographics offer a unique perspective on some often overlooked topics such as academic advisors and mentoring increasing job insecurity career prospects mental issues discrimination and women in science ever growing need for funding increasing pressure for high profile research internationalization of science trends in university management higher education dynamics and government policies backed with references to published research national and international surveys and census data Today most of the PhD programs have been accommodated to the benefit of the university with disregard to any sustainable demand and supply job market strategies contrary to the original ideas behind their inception The result is an over flooded job market and huge underemployment rates among doctorate holders Infused with a narrative of a rich mix of personal experiences observations and impressions all dressed in humor mostly dark sarcasm irony disbelief and often outright criticism this text does not shy

away from asking uncomfortable questions and even attempts to provide answers to some of them At the same time it also offers practical advice for those considering and those who already have dared to tread the PhD path **Choice** ,2003

**Drawing of the Hand** Joseph M. Henninger,2013-11-12 Numerous illustrations depict the anatomy of the hand and the forearm in addition to a portfolio of related drawings by Old Masters and contemporary artists many accompanied by the author s comments **Film and Video Finder, 1997** ,1997 *Skeptical Engagements* Freda Crews,Frederick Campbell Crews,1988-10 In Out of My System 1975 the influential literary critic Frederick Crews documented the erosion of his Freudian sympathies Now in his latest carefully reasoned study he reveals where that reappraisal took him and why he has come to regard himself as an opponent of all self validating doctrines Presenting a searing critique of pretension and folly in the literary academy Crews applies his skepticism to such diverse figures as Joseph Conrad Henry Miller Norman Mailer Philip Roth and Leslie Fiedler Sociological Abstracts Leo P.
