Metaphor and Political Discourse A. Musolff, 2004-08-04 Far from being rhetorical ornaments metaphors play a central role in public discourse as they shape the structure of political categorisation and argumentation Drawing on a very large bilingual corpus this book now in paperback analyses the distribution of metaphor scenarios in more than a decade of public discourse on European integration elucidating differences in UK and German attitudes and argumentation The corpus analysis leads to a refinement of cognitive metaphor theory by systematically relating conceptual semantic and argumentation levels and incorporating the historical dimension of metaphor evolution Finally drawing on examples of metaphor negotiation and on a reassessment of Hobbes concept of metaphor in Leviathan the book highlights the ethical dimension of metaphor in politics *Unpacking Metaphor-related Prepositions in Political Discourse* Mokhtar Ounis, 2023-11-27 This book explores the context around why English prepositions are used in figurative language more frequently than nouns and verbs using corpus based evidence to examine the most often used prepositions and how they are employed and for what purpose While research on cognitive approaches to metaphor has significantly expanded in recent decades little attention has been paid to prepositions as vehicles of figurative language owing to their polysemous complex and inconsistent nature To bridge this gap Ounis introduces an innovative conceptual framework that integrates conceptual metaphor theory diachronic linguistics and discourse pragmatics Drawing upon an extensive corpus of American presidential inaugural addresses this book considers the linguistic conceptual pragmatic and contextual dimensions of English prepositions revealing the fascinating interplay between language culture and cognition This volume will be of interest to scholars in pragmatics metaphor studies English language rhetoric studies and historical linguistics *Metaphor, Nation and Discourse* Ljiljana Šarić, Mateusz-Milan Stanojević, 2019-05-20 This edited volume examines how metaphors and related phenomena metonymies symbols cultural models stereotypes lead to the discursive construal of a common element that brings the nation together The central idea is that metaphor use must be questioned to lay bare the processes and the discursive power behind them The chapters examine a range of contemporary and historical monomodal and multimodal discourses including politicians discourse presidential speeches newspapers TV series Catholic homilies colonialist discourse and various online sources The approaches taken include political science international relations cultural studies and linguistics All contributions feature discursive constructivist views of metaphor with clear sociocultural grounding and the notion of metaphor as a framing device in constructing various aspects of nations and national identity The volume will appeal to scholars in discourse analysis metaphor studies media studies nationalism studies and political science Metaphor Wars Raymond W. Gibbs, Jr, 2017-05-04 The study of metaphor is now firmly established as a central topic within cognitive science and the humanities We marvel at the creative dexterity of gifted speakers and writers for their special talents in both thinking about certain ideas in new ways and communicating these thoughts in vivid poetic forms Yet

metaphors may not only be special communicative devices but a fundamental part of everyday cognition in the form of conceptual metaphors. An enormous body of empirical evidence from cognitive linguistics and related disciplines has emerged detailing how conceptual metaphors underlie significant aspects of language thought cultural and expressive action. Despite its influence and popularity there have been major criticisms of conceptual metaphor. This book offers an evaluation of the arguments and empirical evidence for and against conceptual metaphors much of which scholars on both sides of the wars fail to properly acknowledge.

Discourses of the Arab Revolutions in Media and Politics Stefanie Ullmann, 2021-08-23 Drawing on approaches from critical discourse analysis corpus linguistics and cognitive linguistics this book critically examines metaphorical language used in global media coverage and political statements on the events of the Arab Spring. The volume begins by summarising key events of the Arab Spring tracing the development of protests from Tunisia and Egypt to Libya and Syria as well as the wider impact on the region. Ullmann builds on this foundation to lay out the theoretical frameworks to be applied to an extensive corpus of natural language and actual discourse highlighting Western Middle Eastern and North African perspectives which integrate theoretical work on metaphor blending theory and semantic prosodies. Methodological considerations on corpus selection and different conceptualisations of politics and mass media generally and across countries are discussed with the final chapters outlining the overarching themes across metaphors in the corpus and how these metaphors were ultimately framed in the mass media and political landscape. This book will be of particular interest to students and scholars interested in critical discourse analysis language and politics and corpus linguistics.

Revisiting Metaphors in International Relations Theory Michael P. Marks, 2018-01-08 This book presents an analysis of how metaphors are essential elements in the study of international relations It acknowledges the fact that theory and practice in international relations often rest on common metaphorical concepts which have implications for the ways people around the world pursue their lives Because of the increased attention metaphors have received as integral elements in political discourse there is a need to investigate metaphorical concepts that are not neutral in their implications for understanding international relations Inasmuch as government policy is shaped by metaphorical concepts that originate in the academic realm and given that scholarly works are therefore partially involved in inspiring policy the author subjects a range of metaphors in international relations theory to critical interrogation
