Texas Warbird Survivors 2003 Harold A. Skaarup, 2002-12-16 Many examples of aircraft that saw service in the various armed forces of the United States are currently being restored to flying status or preserved in museums in the state of Texas. Some of them have significant war records and a few are currently standing as gate guardians outside their former airbases. These Warbirds are a permanent part of our modern history and they deserve to be remarked upon and remembered. This handbook provides a simple checklist of where the surviving military aircraft in Texas are located now along with a few photographs and a brief history of their service in the US military. This book should spark your interest in some of the military aviation history that can be found in this warm and friendly state on America's Gulf Coast. *Texas Warbird Survivors* is specifically intended to provide a where are they guide for residents and visitors to Texas who are interested in its rich resources of historical military aircraft. Contact numbers are provided for the museums should you be interested in learning more about each aircraft. Perhaps you will then choose to visit these museums in order to appreciate the rich resources of aviation heritage preserved on your behalf.

The Korean Automotive Industry, Volume 1 A. J. Jacobs, 2021-12-10 In 1962 South Korea assembled just 1 100 new automobiles. By 1996 this total had soared to 2 812 714. What explains this remarkable growth? The answer is complex and involves a combination of a supportive State, timely technology alliances, a skilled but historically low paid workforce, aggressive pricing, savvy entrepreneurs, and fortuitous circumstances. Despite this amazing ascent, comparatively little has been written about the Korean auto industry in English. In the first of a two volume set, this 11 chapter book seeks to help fill this void by providing in depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time without knowledge of the Asian Fiscal Crisis, the book should prove informative to practitioners, scholars, and students interested in automotive history, international political economy, Asian studies, and more.

The Korean Automotive Industry, Volume 2 A.J. Jacobs, 2023-08-24 This volume chronicles the maturation of the South Korean auto industry and its native automakers from the 1997 Asian Crisis to 2019. After examining the context for domestic vehicle production in South Korea, the author presents multiple case studies for all five Korean automakers: General Motors Korea, Daewoo Motors, Kia, Hyundai, Ssangyong, and Renault Samsung. This includes coverage of Hyundai, Kia's foreign plants in North America, Europe, India, China, and Emerging Asia. The book closes by assessing the five to ten year future outlooks for Korean automakers at home and abroad. This important work will prove informative to scholars of business management, automotive history, international development, Asian studies, and public administration.
