The Global Lives of German Migrants Marcel Erlinghagen, Andreas Ette, Norbert F. Schneider, Nils Witte, 2021-04-29 Based on the German case this open access book highlights the increasing flows of migration and the internationalisation of individual life courses It analyses the experiences of migration across four central domains employment and income partners and families health and wellbeing as well as friends and social participation which potentially have far reaching consequences for social inequalities and life chances The book showcases results from an innovative probability sample that is representative of German emigrants who recently moved abroad and remigrants who

recently returned from abroad and compares their international experiences with the sedentary population in Germany. Stays abroad, whether temporary or permanently, have become the new normal for increasing numbers of people from highly developed welfare states. Unnoticed from mainstream migration studies, these countries are today not only major immigration countries but also important sources of international mobility. By providing an empirically founded prism of the global lives of German migrants, this book is a valuable resource for students and researchers of migration, social inequality, and the life course, and provides practitioners with insights into these regularly overlooked aspects of international migration.

From Homemakers to Breadwinners to Community Leaders Norma Fuentes-Mayorga, 2023-05-12 In *From Homemakers to Breadwinners to Community Leaders*, Norma Fuentes Mayorga compares the immigration and integration experiences of Dominican and Mexican women in New York City, a traditional destination for Dominicans but a relatively new one for Mexicans. Her book documents the significance of women-led migration within an increasingly racialized context and underscores the contributions women make to their communities of origin and of settlement. Fuentes Mayorga's research is timely, especially against the backdrop of policy debates about the future of family reunification laws and the unprecedented immigration of women and minors from Latin America, many of whom seek human rights protection or to reunite with families in the US. *From Homemakers to Breadwinners to Community Leaders* provides a compelling look at the suffering of migrant mothers and the mourning of family separation, but also at the agency and contributions that women make with their imported human capital and remittances to the receiving and sending community. Ultimately, the book contributes further understanding to the heterogeneity of Latin American immigration and highlights the social mobility of Afro-Caribbean and indigenous migrant women in New York.

How did modern Mexico become a nation of multicultural diversity and rich indigenous traditions? What key roles do Mexico's non-Western pre-Columbian indigenous heritage and subsequent development as a major center in the Spanish colonial empire play in the country's identity today? How is Mexico today, both Western and non-Western, part Native American and part European, simultaneously traditional and modern? *Modern Mexico* is a thematic encyclopedia that broadly covers the nation's history, both ancient and modern, its government, politics, and economics, as well as its culture, religion, traditions, philosophy, arts, and social structures. Additional topics include industry, labor, social classes, and ethnicity, women, education, language, food, leisure, and sport, and popular culture. Sidebars, images, and a Day in the Life feature round out the coverage in this accessible, engaging volume. The Routledge Handbook of Comparative Rural Policy Matteo Vittuari,John Devlin,Marco Pagani,Thomas G. Johnson,2019-10-16 This volume represents the result of almost two decades of trans Atlantic collaborative development of a policy research paradigm the International Comparative Rural Policy Studies program Over this period dozens of scientists from different disciplines but with a common interest in rural issues and policy have collaboratively studied the policies in North America Europe and other parts of the world A core element of the book is the idea and practice of comparative research and analysis what can be learned from comparisons how and why policies vary in different contexts and what lessons might or might not be transferable across borders It provides skills for the use of comparative methods as important tools to analyze the functioning of strategies and specific policy interventions in different

contexts and a holistic approach for the management of resources in rural regions. It promotes innovation as a tool to valorize endogenous resources and empower local communities and offers case studies of rural policy in specific contexts. The book largely adopts a territorial approach to rural policy. This means the book is more interested in rural regions, their people and economies and in the policies that affect them than in rural sectors and sectoral policies per se. The audience of the book is by definition international and includes students attending courses in agricultural and rural policy, rural and regional studies and natural resource management, lecturers seeking course material and case studies to present to their students in any of the courses listed above, professionals working in the field of rural policy, policy makers and civil servants at different levels seeking tools to better understand rural policy both at the local and global scale and to better recognize and comprehend how to transfer best practices.

This publication presents a comprehensive discussion on the impact of the global financial crisis 2008-2009 on certain Asian economies at different levels of analysis, showcasing cross-country regression, computable general equilibrium modeling and microeconomic modeling for Bangladesh, Indonesia, Pakistan, the Philippines and Viet Nam. Using different measures of remittances, cross-country regression analyses suggest that a 10% increase in remittances leads to a 3%–4% rise in real gross domestic product per capita. At the same time, the analyses show that remittances exert a negative impact on aggregate poverty. Moreover, these money transfers from abroad exert important impacts on the macroeconomy that include improving external current accounts, alleviating debt burdens, appreciation of domestic currencies and moderating inflation.
