Matthias, Kay Winkler, David Gomez, 2019-10-23 Best Practices for Knowledge Workers describes ACM in the current era of digitization Internet of Things IoT artificial intelligence AI intelligent BPMS and BPM Everywhere You will learn how support of adaptive data driven processes empowers knowledge workers to know in real time what is happening at the edge points and to take actions through the combination of rule driven guidance and their own know how It is not a traditionally automated system but intelligent automation where technology doesn't merely replace human decision making but extends the reach of the knowledge worker making IoT data actionable As Sandy Kemsley points out in her foreword As adaptive case management ACM systems mature we are moving beyond simple systems that allow knowledge workers to define ad hoc processes to creating more intelligent systems that support and guide them Knowledge workers still need to dynamically add information define activities and collaborate with others in order to get their work done but those are now just the table stakes in a world of big data and intelligent agents To drive innovation and maintain operational efficiencies we need to augment case work typically seen as relying primarily on human intelligence with machine
