**Order in space; a design source book** K. Critchlow,1969      Space Structures A. Loeb,2012-12-06 xiv aggregates this touches on the very nature of things The concept of statistical symmetry which Loeb develops is particularly important it emphasizes the limitations in seemingly random aggregates and for permits general statements of which the crystallographer's symmetries are only special cases The reductionist and holistic approaches to the world have been at war with each other since the times of the Greek philosophers and before In nature parts clearly do fit together into real structures and the parts are affected by their environment The problem is one of understanding The mystery that remains lies largely in the nature of structural hierarchy for the human mind can examine nature on many different scales sequentially but not simultaneously Arthur Loeb's monograph is a fundamental one but one can sense a development from the relations between his zero and three dimensional cells to the far more complex world of organisms and concepts It is structure that makes the difference between a cornfield and a cake between an aggregate of cells and a human being between a random group of human beings and a society We can perceive anything only when we perceive its structure and we think by structural analogy and comparison Several books have been published showing the beauty of form in nature This one has the beauty of a work of art but it grows out of rigorous mathematics and from the simplest of bases dimensionality extent and valency      *Structure and Form in Design* Michael Hann,2014-02-13 This book provides a critical examination of structure and form in design covering a range of topics of great value to students and practitioners engaged in any of the specialist decorative arts and design disciplines The complexities of two dimensional phenomena are explained and illustrated in detail while various three dimensional forms are also discussed In the context of the decorative arts and design structure is the underlying framework and form the resultant visible two or three dimensional outcome of the creative process Whether hidden or visually detectable in the final design structure invariably determines whether or not a design is successful in terms of both its aesthetics and its practical performance Hann successfully identifies various geometric concepts and presents and discusses a number of simple guidelines to assist the creative endeavours of both accomplished and student practitioners teachers and researchers      **Spatial Displays and Spatial Instruments** Stephen R. Ellis,1989      Mobile Theater Fernando Quesada,2021-07-13 Taking as a starting point a design for a mobile theater made at the Architectural Association of London between 1970 and 1971 by Spanish architect Javier Navarro de Zuñiga born 1942 this book traces the architectural counterculture of that time and the relations with the alternative performing arts Architect Javier Navarro de Zuñiga 1942 graduated in 1968 at Madrid School of Architecture During the academic year 1970-1971 he travelled from Madrid to London thanks to a grant of the British Council to complete his postgraduate training at the Architectural Association There he designed a building called Mobile Theater It was a theatrical device composed of several 8 x 2.5 meters trucks carefully

designed which contained all the building elements needed to shape a space for the performing arts or other collective uses The assembly time estimated for four workers was six and a half hours This project was internationally showed and published between 1971 and 1975 but was never built This book intends to release this project largely ignored by canonical historiography and to culturally place it in time and space the agitated city of London in 1971 After the convulsions of May 1968 architectural counterculture rearmed on very different fronts from the disciplinary rally to the guerilla positions This architectural design accounts for these events since it had a temporal development that goes beyond its mere conception as an artifact The long and frustrated process for construction 1969 to 1976 calls for a particular intra history which this books will tell
