2. **Reasoning:** Reason, investigate and hypothesise with patterns and relationships in mathematics.

Concrete materials

100 square (10 x 10), number line, abacus

Vocabulary

Hundredth, expand, necessary, unnecessary

Teaching points

Importance of place value:

1. Just as 79 and 709 have different values, so too 0.07 and 0.7.
2. In which number has 8 the greater value: 0.83 or 0.98? Some children might incorrectly choose 0.98 because this number is greater than 0.83.
3. Unnecessary zeroes: With whole numbers, a zero preceding non-zero numerals is unnecessary (08 = 8). These might be termed leading zeroes. With decimals the opposite is true (0.80 = 0.8). These might be termed trailing zeroes.

Note: While trailing zeroes are not strictly necessary in decimals, they are sometimes required by convention. For example with money, 6 euro and 30 cent will be written as €6.30 (and not as €6.3). Furthermore in 5th class and later, the student may be asked to round a number such as 73.402 to 2 decimal places. The correct answer would be 73.40 (and not 73.4).
