

The background of the entire cover is a black and white photograph. It depicts several tall, dark industrial smokestacks or chimneys. From the tops of these stacks, thick, dark plumes of smoke or steam are rising into the sky. The sky is filled with large, textured clouds, some of which are illuminated from behind, creating a dramatic, high-contrast scene. The overall mood is somber and industrial, suggesting themes of environmental impact and capitalism.

## **Organic Marxism Alternative Catastrophe Civilization:**

**Organic Marxism** Philip Clayton, Justin Heinzekehr, 2014-09-19 This revolutionary book fuses the enduring legacy of socialism government for the common good with the best of the environmental movement and the newest insights from sustainability studies The result is a manifesto a roadmap forward in the face of the growing environmental catastrophe which is the most complex crisis humanity has ever faced American conservatives like to say that Marxism was destroyed by its opponents and by the mistakes of Marxist governments Organic Marxism provides the definitive answer to this charge As we approach the planet's limits however there is no other option but to shift to an organic ecological civilization Clayton and Heinzekehr show how scientists and economists farmers and small business people artists and religious leaders are coming together around the globe building communities for the common good      Wonder as a New Starting Point for Theological Anthropology José Francisco Morales Torres, 2023-04-04 In Wonder as a New Starting Point for Theological Anthropology Opened by the World Jos Francisco Morales Torres constructs a new theological anthropology that begins with wonder He contends that the visceral experience of wonder is an opening up of the human by an excess that saturates the world This opened by ness points to a transforming receptivity as the basis of the person and to an extravagant Generosity that grounds all creation Thus wonder which is grounded in generous Excess is not only a gift but a demand it calls for a liberative praxis that resist the forces that flatten the fullness of life into what is useful and profitable and that reduce the limitless worth of fellow humans to mere commodities to be exploited and exchanged at the altar of the idolatrous Market Wonder reveals a primordial receptivity in the human person which demands of us an ethic of sustainability that does not reduce the other to commodity a vulnerability that risks being opened by the other a commitment to solidarity and liberation that resist the forces of an insatiable idolatrous Market that seeks only to steal and kill and destroy      *Encyclopedia of the Anthropocene*, 2017-11-27 Encyclopedia of the Anthropocene Five Volume Set presents a currency based global synthesis cataloguing the impact of humanity's global ecological footprint Covering a multitude of aspects related to Climate Change Biodiversity Contaminants Geological Energy and Ethics leading scientists provide foundational essays that enable researchers to define and scrutinize information ideas relationships meanings and ideas within the Anthropocene concept Questions widely debated among scientists humanists conservationists politicians and others are included providing discussion on when the Anthropocene began what to call it whether it should be considered an official geological epoch whether it can be contained in time and how it will affect future generations Although the idea that humanity has driven the planet into a new geological epoch has been around since the dawn of the 20th century the term Anthropocene was only first used by ecologist Eugene Stoermer in the 1980s and hence popularized in its current meaning by atmospheric chemist Paul Crutzen in 2000 Presents comprehensive and systematic coverage of topics related to the Anthropocene with a focus on the Geosciences and Environmental science Includes point counterpoint articles debating key aspects of the Anthropocene giving users an even

handed navigation of this complex area Provides historic seminal papers and essays from leading scientists and philosophers who demonstrate changes in the Anthropocene concept over time Organic Marxism Dean of Claremont School of Theology Philip Clayton, Justin Heinzekehr, 2014-09-19 This revolutionary book fuses the enduring legacy of socialism government for the common good with the best of the environmental movement and the newest insights from sustainability studies The result is a manifesto in the tradition of Bill McKibben's *Eaarth* a roadmap forward in the face of the growing environmental catastrophe which is the most complex crisis humanity has ever faced Catherine Keller writes What an unexpected discomfiting and important work If Marxism seemed to be abandoned in the West to a few academic leftists and nostalgic activists the authors bring it roaring back into relevance American conservatives like to say that Marxism was destroyed by its opponents and by the mistakes of Marxist governments *Organic Marxism* provides the definitive answer to this charge New economic evidence reveals that Marx's predictions are coming true in ways once thought impossible Today the wealthiest class the richest 1% possesses more wealth and power than ever before whereas the 99% are slipping economically and the majority of humans live in increasing poverty Above all else the global environmental crisis changes everything Clayton and Heinzekehr show how over the last decades rich individuals and multinational corporations have acted selfishly to increase their own wealth with devastating ecological consequences The data make it clear that the planet has reached the limits of its capacity The authors trace the unimaginable environmental and social consequences that scientists tell us global warming will bring mass extinctions food and water shortages violent weather rising oceans Why then do our governments continue to favor the wealthy Why do they take no action or actually worsen the situation *Organic Marxism* shows why the situation is not hopeless however The vast majority of humans favor sustainable systems and lifestyles With this growing support it's possible to begin laying the foundations for a new ecological civilization on this planet In these pages Clayton and Heinzekehr lay out the steps toward a fair and sustainable society one run not in the interests of the rich but for the common good This fresh energetic and revolutionary manifesto Santiago Slabodsky takes its leads from the core insights of Karl Marx from process philosophers in China Taoism and in the West Alfred North Whitehead from ecology and from the organic practices of sustainable communities This postmodern Marxism the authors argue is not deterministic and utopian It allows for market forces while limiting corruption and excessive profit taking by the wealthy In the end localized systems of production and trade steeped in the cultural traditions of a given people are far more sustainable and life affirming than a globalized economy run by the richest banks and multinational corporations The book is a call to action We can no longer sit by passively and allow unlimited consumption by the wealthy when it means that there will be nothing left for our grandchildren Without a planetary crisis the rich would remain in power As we approach the planet's limits however there is no other option but to shift to an organic ecological civilization Clayton and Heinzekehr show how scientists and economists farmers and small business people artists and religious leaders are coming together around the

globe building communities for the common good

**Political Theology on Edge** Clayton Crockett, Catherine

Keller, 2021-12-07 In *Political Theology on Edge* the discourse of political theology is seen as situated on an edge that is on the edge of a world that is grappling with global warming a brutal form of neoliberal capitalism protests against racism and police brutality and the COVID 19 pandemic This edge is also a form of eschatology that forces us to imagine new ways of being religious and political in our cohabitation of a fragile and shared planet Each of the essays in this volume attends to how climate change and our ecological crises intersect and interact with more traditional themes of political theology While the tradition of political theology is often associated with philosophical responses to the work of Carl Schmitt and the critical attempts to disengage religion from his rightwing politics the contributors to this volume are informed by Schmitt but not limited to his perspectives They engage and transform political theology from the standpoint of climate change the politics of race and non Christian political theologies including Islam and Sikhism Important themes include the Anthropocene ecology capitalism sovereignty Black Lives Matter affect theory continental philosophy destruction and suicide This book features world renowned scholars and emerging voices that together open up the tradition of political theology to new ideas and new ways of thinking Contributors Gil Anidjar Balbinder Singh Bhogal J Kameron Carter William E Connolly Kelly Brown Douglas Seth Gaiters Lisa Gasson Gardner Winfred Goodwin Lawrence Hillis Mehmet Karabela Michael Northcott Austin Roberts Noelle Vahanian Larry L Welborn

**You Have Been Told What Is Good** Paul O. Ingram, 2016-09-12

The radical interdependency of justice compassion and solidarity of community working for the common good are ideals celebrated in the religious Ways of humanity Human beings at all times and in all places have known what is good but for reasons too numerous to count have failed to act justly and compassionately in communal harmony with one other and with the sentient beings with whom we share life on planet Earth Today the major justice issue confronting us is human caused environmental destruction running amok on this planet the only place in the universe where our species is alive Accordingly this book offers socially engaged dialogue between persons representing the world's religious Ways The natural sciences are included as a third partner The dialogue presented in this book is a powerful resource for confronting and stopping the causes of climate change But we must do so before it's too late

*Political Theology of the Earth* Catherine Keller, 2018-10-30 Amid melting glaciers rising waters and spreading droughts Earth has ceased to tolerate our pretense of mastery over it But how can we confront climate change when political crises keep exploding in the present Noted ecotheologian and feminist philosopher of religion Catherine Keller reads the feedback loop of political and ecological depredation as secularized apocalypse Carl Schmitt's political theology of the sovereign exception sheds light on present ideological warfare racial ethnic economic and sexual conflict and hubristic anthropocentrism If the politics of exceptionalism are theological in origin she asks should we not enlist the world's religious communities as part of the resistance Keller calls for dissolving the opposition between the religious and the secular in favor of a broad planetary movement for social and ecological justice When we are confronted by

populist authoritarian right wings founded on white male Christian supremacy we can counter with a messianically charged often unspoken theology of the now moment calling for a complex new public. Such a political theology of the earth activates the world's entangled populations joined in solidarity and committed to revolutionary solutions to the entwined crises of the Anthropocene.

**The Galapagos Islands** Brian D. McLaren, 2019-10-01 Bestselling author Brian D. McLaren followed his love of nature specifically tortoises all the way to the Galapagos Islands. There he paid close attention to the flora and fauna around him but also to what was happening within him: how the natural world awakened his soul in a way that organized religion could not. McLaren's descriptions of birds and reptiles, fish and flowers sing; he walks in the footsteps of Charles Darwin and grieves that Darwin has been demonized by his fellow Christians and he reflects on how his own faith has evolved in the years since he left the pastorate. McLaren writes in the spirit of Aldo Leopold and Wendell Berry, weaving together the spiritual and the material. Even though most readers will never visit the Galapagos Islands, they can travel with McLaren and experience the beauty and fragility of this extraordinary place.

God and Gravity Philip Clayton, 2018-08-23 Philip Clayton is well known as a major thinker working at the interface of science, philosophy and Christian theology. Here for the first time a representative selection of his far-reaching works have been brought together into one place. After a general introduction to the breadth of Clayton's writing, the book is divided into six main sections: 1 Science, 2 Science Faith, 3 Panentheistic Reflections on Science, 4 Science, 5 Science Spirit and 6 Progressive Theology. This introduction and reader will become the go-to text for all inquiries regarding Philip Clayton's expansive theology.

*Transcultural Connections: Australia and China* Greg McCarthy, Youzhong Sun, Xianlin Song, 2021-10-25 This book is a unique and original contribution to the knowledge of transcultural engagement between the East and the West, notably between China and Australia. The collection explores how the global system universally interrelates East and West, showing how this interrelatedness offers the promise of progress but can evoke the counteracting trend of tribal nationalism. The book addresses the connectedness of human progress by exploring how globalization creates new dynamic interfaces between East and West and how, rather than clashes of culture, there are growing forms of reciprocity between civilizations and a shared awareness of how humanity is connected through knowledge and international mobility.

*Irrationality of Capitalism and Climate Change* Andrew Kolin, 2022-02-07 The overwhelming scientific evidence indicates that planet Earth is in the process of undergoing dramatic climate change which threatens to undermine the quality of life around the world. *Irrationality of Capitalism and Climate Change* demonstrates how the roots of humanity's assault on the environment are directly associated with the origins of capitalism: an irrational social system in which reproduction of capital on a global scale is destructive to the environment. The author begins with a philosophical analysis of the role that reason and passion assume in social systems, then traces the local and regional environmental effects of preindustrial social systems. The author argues that nations are faced with a global challenge to construct life-affirming policy that functions as an alternative to the global devastation that the accumulation of capital

causes The book concludes by proposing rational socialism a life affirming social system that functions in harmony with the environment

**The order of the world in house and state** Wolf Rainer Wendt, 2022-09-28 In the world the home and the state prove themselves and change as basic institutions of human coexistence They are the subject of a comparative study on an ecotheoretical basis In the global context the modes of social control have developed differently in the home and the state In and with them order is created in the world and for the individual and collective conduct of life The institutional frameworks of house and state in the world are ways of shaping existence that are juxtaposed in their European Occidental and East Asian forms Their discussion takes place along the ancient Greek basic concepts and forms of thought of the oikos the polis and the cosmos on the one hand and the ancient Chinese categories jia guo and tianxia on the other They are discussed with their ethical political and economic references in their traditional and contemporary meaning and with regard to their ecological sustainability The interest in a discursive understanding of sustainable life serving orders in the face of global challenges is the guiding principle

**T&T Clark Handbook of Christian Theology and Climate Change** Hilda P. Koster, Ernst M. Conradie, 2019-12-12 The T these essays are critically engaged by respondents situated in other geographic regions minority communities non Christian traditions or non theological disciplines Structured in seven main parts the handbook explores 1 the need for collaboration with disciplines outside of Christian theology to address climate change 2 the need to find common moral ground for such collaboration 3 the difficulties posed by collaborating with other Christian traditions from within 4 the questions that emerge from such collaboration for understanding the story of God s work and 5 God s identity and character 6 the implications of such collaboration for ecclesial praxis and 7 concluding reflections examining whether this volume does justice to issues of race gender class other animals religious diversity geographical divides and carbon mitigation This rich ecumenical cross cultural conversation provides a comprehensive and in depth engagement with the theological and moral challenges raised by anthropogenic climate change

**Capitalism in the Anthropocene** John Bellamy Foster, 2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world s population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current

planetary emergency exploring the theoretical historical and practical dimensions of the capitalism's alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope *Die Ordnung der Welt in Haus und Staat* Wolf Rainer Wendt, 2019-09-09 In der Welt bewahren und wandeln sich Haus und Staat als Basisinstitutionen menschlichen Zusammenlebens Sie sind auf einer kotheoretischen Grundlage Gegenstand einer vergleichenden Studie Im globalen Rahmen haben sich in Haus und Staat die Modi gesellschaftlicher Steuerung unterschiedlich entwickelt In ihnen und mit ihnen wird Ordnung in der Welt und für die individuelle und gemeinsame Lebensführung geschaffen Mit den institutionellen Handlungsrahmen Haus und Staat in der Welt sind Weisen der Daseinsgestaltung entfaltet die einander in ihrer europäisch-ökzidentalen und ostasiatischen Ausformung gegenübergestellt werden Ihre Diskussion erfolgt entlang der altgriechischen Grundbegriffe und Denkformen des Oikos der Polis und des Kosmos einerseits und der altchinesischen Kategorien jia guo und tianxia andererseits Sie werden mit ihren ethischen politischen und ökonomischen Bezügen in ihrer traditionellen und gegenwärtigen Bedeutung und auf ihre ökologische Zukunftsfähigkeit hin erörtert Erkenntnisleitend ist das Interesse an einer diskursiven Verständigung über nachhaltig lebensdienliche Ordnungen angesichts globaler Herausforderungen *The Catholic Church and the Jews* Graciela Ben-Dror, 2008-01-01 The impact of events in Nazi Germany and Europe during World War II was keenly felt in neutral Argentina among its predominantly Catholic population and its significant Jewish minority The Catholic Church and the Jews Argentina 1933-1945 considers the images of Jews presented in standard Catholic teaching of that era the attitudes of the lower clergy and faithful toward the country's Jewish citizens and the response of the politically influential Church hierarchy to the national debate on accepting Jewish refugees from Europe The issue was complicated by such factors as the position taken by the Vatican Argentina's unstable political situation and the sizeable number of citizens of German origin who were Nazi sympathizers eager to promote German interests Argentina's self-perception was as a Catholic country Though there were few overtly anti-Jewish acts traditional stereotypes and prejudice were widespread and only a few voices in the Catholic community confronted the established attitudes *Western Marxism* Domenico Losurdo, 2024-09-17 A stinging critique of Western Marxism counterposing its complicity with imperialist logic against a resurgent anti-imperialism Western Marxism How It Was Born How It Died How It Can Be Reborn is a paradigm-shifting book that provides a trenchant critique of the Western left intelligentsia It reveals how its dominant ideological orientation characterized by defeatism utopianism and anti-communism is rooted in the political economy of imperialism Internationally acclaimed theorist Domenico Losurdo thus provides a fresh and challenging perspective on purportedly radical thinkers who have been widely promoted in the imperial core including those affiliated with the Frankfurt School French Theory and operaismo as well as Hannah Arendt Giorgio Agamben Michael Hardt and Slavoj Žižek among others His critique also has wide-reaching implications for trend-setting discourses inspired by this coterie of intellectuals from postcolonial and decolonial theory to subaltern studies and beyond Far from being a

negative undertaking however this book is grounded in the positive project of reigniting anti imperialist Marxism As a complement to the Italian edition of Western Marxism this first ever English translation also features the unprecedented publication of a major lecture that demystifies Western Marxism and its role in imperialists efforts to denigrate the achievements of actually existing socialism Raising the stakes of what it means to produce critical theory Western Marxism will surely provoke wide debate and a reevaluation of hallowed canons     Drug Use in America: Treatment and rehabilitation United States.
