Zamani-Gallaher,Vernon C. Polite,2013-07-01 African American Females Addressing Challenges and Nurturing the Future illustrates that across education health and other areas of social life opportunities are stratified along gender as well as race lines The unequal distribution of wealth power and privilege between men and women intersects with race and class to create multiple levels of disadvantage This book is one result of a unique forum intended to bring into focus the K 12 and postsecondary schooling issues and challenges affecting African American girls and women Focusing on the historical antecedents of African American female participation and the contemporary context of access and opportunity for black girls and women the contributors to this collection pay particular attention to the interaction of gender with race ethnicity class age and health with the central aim of encouraging thoughtful reading critical thinking and informed conversations about the necessity of exploring the lives of African American females Additionally the book frames important implications for recommended changes in policy and practice regarding a number of critical matters presently affecting African American females in schools and communities across the state of Michigan and nationwide *Strategic Leadership* Victor C.X. Wang,2018-02-01 Strategic leadership is broadly defined as utilizing particular approaches in the management of employees The main objective is productivity It provides the vision and direction for the long term growth and success of an organization It requires objectivity and potential to look at the broader picture It is leaders responsibility to incorporate aspects of both the analytical and human dimensions to effectively drive the organizations forward As an academic subject it is taught in both education and business Leaders and managers have turned to strategic leadership to inspire and guide their visions and to formulate the directions so essential for the long term growth and success of an organization or a country Leaders need the skills and tools for strategy formulation and implementation in order to deal with change in our society Managing change and ambiguity requires strategic leaders who not only provide a sense of direction but who can also build ownership and alignment within their workgroups to implement change The goal of strategic leadership is to drive innovation and maximize team performance to enhance organizations long term growth and success in today s complex world of fastpaced dramatic change Research on strategic leadership has been going on for decades Textbooks on this subject are readily available If we look deeper we realize the vast majority of these books were written from a practitioner s perspective In other words these books were not based on empirical research Naturally these existing books have failed to better serve

the needs of today's graduate students who should be equipped with empirical research on such an academic subject. This book will investigate emergent administrative techniques and business practices being used within educational establishments and corporate worlds. It will highlight empirical research and best practices within strategic leadership.

The Brother Code T. Elon Dancy II, 2012-10-01. The Brother Code: What is the role of manhood and masculinity in the lives of African American males in college? How do manhood norms influence decisions within and beyond college? How might mothers and fathers differentially affect manhood and masculinity in their sons? What are African American men's unique ways of knowing themselves and their surroundings? The Brother Code: Manhood and Masculinity among African American Men in College situates itself at the intersection of higher education and cultural studies to address these questions and more. Primarily, this book offers colleges and universities a penetrative gaze into a complex web of identities: the manhood of African American males in college. Yet the book also seizes a rare opportunity in higher education research to review six historical eras of African American manhood as well as the troublesome relationship between African American males and education in general. This knowledge is important for understanding all aspects of African American male participation in college, including enrollment, retention, curricular and co-curricular involvement. Based on an empirical study, the data in this book emerged from one-on-one interviews in which 24 African American males enrolled in 12 colleges discussed how manhood matters in their social and college lives. The aim is to help unearth the marginalized topics of manhood, gender, and masculinity in males generally but more specifically among African American males, a marginalized student group in education. Using an interdisciplinary approach, the book draws upon literature in history, African American studies, gender studies, sociology, cultural studies, psychology, and anthropology.

Higher Education and the Market Roger Brown, 2010-09-13. The introduction of market forces into higher education is the most crucial issue facing universities and colleges today. As the role of universities in the knowledge society becomes ever more apparent and as public funding reaches its limit, marketisation has become an issue of critical importance. Discussions about the ever-increasing cost of tuition, affordability, access, university

rankings information and the commercialization of academic research take place not just in North America Western Europe and Australasia but also in Eastern Europe Asia and Latin America Higher Education and the Market provides a comprehensive account of this phenomenon and looks at its likely impact on key dimensions of university activity system structure funding and resources the curriculum participation and achievement research and scholarship interactions with third parties Contributors propose how market forces government intervention and academic self regulation can be combined to harness the benefits of increased competition and efficiency without losing the public good It is of particular interest to government and institutional leaders policy makers researchers and students studying higher education
