the explanatory power of institutional theory in the analysis of organizational change Required reading for anyone interested in the sociology of organizations the volume should appeal to scholars concerned with culture political institutions and social change Stanford's Organization Theory Renaissance, 1970-2000 Frank Dobbin, Claudia Bird Schoonhoven, 2010-04-09 Between 1970 and 2000 Stanford University enabled and supported an interdisciplinary community of organizations training research and theory building This title summarizes the contributions of the main paradigms that emerged at Stanford in those three decades and describes the sociological conditions under which this environment came about **American Anti-Management Theories of Organization** Lex Donaldson, 1995-03-16 This book offers a critique of recent developments in the study of organizational structure in the USA There has been a profusion of new paradigms offered in the USA and this has fragmented the field Many of these paradigms share an anti management quality painting managers in an increasingly negative light This book examines five major contemporary US organizational theories population ecology institutional resource dependence agency and transaction cost economics Each of these theories and their attendant research is critically examined and severe problems are identified in either theoretical coherence or empirical validity Lex Donaldson argues that it is possible to reintegrate the field by taking structural contingency theory as the core theory and adding on to it selective propositions from the newer paradigms He also offers suggestions for needed reforms in the US academic cultural and institutional system **Research Method in the Postmodern** James Scheurich, 2014-01-02 In recent years research in the social sciences has been dominated by the debate on the merits of qualitative method versus quantitative methodology Until recently the debate appeared to have been won by those promoting the qualitative approach but then postmodern theory appeared on the scene challenging all our preconceptions about research method This book goes one step further than those working at the philosophical level showing the implications of postmodernism for practice *Rethinking Career Studies* Hugh Gunz, Wolfgang Mayrhofer, 2018 Provides a comprehensive introduction to career studies bridging the numerous scholarly discourses that share an interest in the field The Politics Of Education And The New Institutionalism William Lowe Boyd, Robert L. and the strategies that minban schools have adopted to manage the institutions in this environment There are four types of minban schools the international minban school the privately funded minban school the publicly affiliated minban school and the converted minban school A qualitative research methodology in the form of a multiple case study was used for the analysis Eight minban secondary schools in Taiyuan and Shenzhen were chosen to represent the various types of minban schools The study shows that the re emergence of free market principles the decentralization of government and the accompanying segmentation of power and authority bureaucratic and consumerist expectations of teachers and the commodification of education have engendered an increasingly fragmented institutional environment which allowed minban schools to thrive The book reveals that the institutional environment is multi faceted and ambiguous during China s controlled decentralization organizations and institutions have shaped each other Minban schools adopt various strategies to cope with institutional pressure This study provides a systematic understanding of the operation of minban schools by locating the schools in a differential order which determines their choice of strategy international schools choose isolation privately funded schools avoidance affiliated schools advocacy and converted schools capitalization It also illustrates how the bureaucracy functions in China s local governments The various case studies confirm that the government still maintains substantial control over minban schools through the power granted by the bureaucratic structure which allows them to direct the institutional environment by introducing new regulations and forms of governance Macrofoundations Christopher W. J. Steele, Timothy R. Hannigan, Vern L. Glaser, Madeline Toubiana, Joel Gehman, 2020-11-26 This volume of Research in the Sociology of Organizations explores the institutional macrofoundations of action providing an array of insights into the constitutive and contextualizing powers of institutions and an agenda for further exploration of these themes

Institutional Work Thomas B. Lawrence, Roy Suddaby, Bernard Leca, 2009-07-16 The institutional approach to organizational research has shown how enduring features of social life such as marriage and bureaucracy act as mechanisms of social control Such approaches have traditionally focused attention on the relationships between organizations and the fields in which they operate providing strong accounts of the processes through which institutions govern action In contrast the study of institutional work reorients these traditional concerns shifting the focus to understanding how action affects institutions This book sets a research agenda within the field of institutional work by analyzing the ways in which individuals groups and organizations work to create maintain and disrupt the institutions that structure their lives Through a series of essays and case studies it explores the conceptual core of institutional work identifies institutional work strategies provides exemplars for future empirical research and embeds the concept within broader sociological debates and ideas
