Ruminski, Annette M. Holba, 2011-12-16 Communicative Understandings of Women's Leadership Development From Ceilings of Glass to Labyrinth Paths edited by Elesha L Ruminski and Annette M Holba intertwines the disciplines of communication studies leadership studies and women's studies to offer theoretical and practical reflection about women's leadership development in academic organizational and political contexts Women's leadership development exists at the intersection of consciousness raising communication competence and education to increase one's knowledge and practice of leadership which makes the weaving together of these three disciplines important Thus Communicative Understandings of Women's Leadership Development claims a space for women's leadership studies and acknowledges the paradigmatic shift from discussing women's leadership using the glass ceiling phenomenon to what Eagly and Carli 2007 identify as the labyrinth of leadership Recognizing this metaphoric shift is crucial because many women now develop leadership amid the postmodern flux of organizational change hierarchical top down systems are being eroded in lieu

of transformational collaborative even improvisational leadership processes Women's leadership studies is emerging as a fruitful interdisciplinary area that reframes the debate about whether we live work and learn within a third wave feminist or post feminist context While this area might include feminist theorizing it also might not emphasize such epistemologies For this reason Ruminski and Holba's edited collection explores and highlights a variety of feminist and non feminist intersections and is thus an important and timely contribution to both marking where we are with women's leadership development in higher education and how women can further develop themselves as leaders

Goggins, 2017-11-27 The book proposes a systematic approach to big data collection documentation and development of analytic procedures that foster collaboration on a large scale This approach designated as data factoring emphasizes the need to think of each individual dataset developed by an individual project as part of a broader data ecosystem easily accessible and exploitable by parties not directly involved with data collection and documentation Furthermore data factoring uses and encourages pre analytic operations that add value to big data sets especially recombining and repurposing The book proposes a research development agenda that can undergird an ideal data factory approach Several programmatic chapters discuss specialized issues involved in data factoring documentation meta data specification building flexible yet comprehensive data ontologies usability issues involved in collaborative tools etc The book also presents case studies for data factoring and processing that can lead to building better scientific collaboration and data sharing strategies and tools Finally the book presents the teaching utility of data factoring and the ethical and privacy concerns related to it Chapter 9 of this book is available open access under a CC BY 4.0 license at [link.springer.com](https://link.springer.com)
