*New Realities in the Management of Student Affairs* Ashley Tull, Linda Kuk, 2023-07-03 Student affairs organizations are at a crossroads. They face expanding enrollments, a concomitant increase in need for often more complex services, changing demographics, a growing cohort of non-traditional and first-generation students, shifting and more demanding responsibilities, and increased expectations from the greater campus community, parents, and external constituents. These challenges are intensified by the accelerating speed of advancements in technology, globalization, innovation, and student consumerism, and by the long-term reality of shrinking resources and limitations on the ability to increase tuition and fees. This book shares alternative ideas about organizational design and about ways to restructure roles and responsibilities to enable student affairs organizations to respond to these challenges and demands more effectively at a time of reduced resources. It also addresses the many emerging roles that student affairs organizations are increasingly being expected to address, such as IT, fund raising and development, external communications, human resources management, and professional development, as well as research and assessment, and describes approaches developed by a variety of institutions. The contributors also pay attention to the solutions appropriate for smaller institutions and for community colleges. They explore the various dimensions of change and offer frameworks to help student affairs leaders and practitioners to more effectively understand and manage the changes they are confronting and describe ideas and solutions adopted by others within the profession.

**Learning Analytics in Higher Education** Jaime Lester, Carrie Klein, Huzefa Rangwala, Aditya Johri, 2017-12-21 Learning analytics or educational big data tools are increasingly being deployed on campuses to improve student performance, retention, and completion, especially when those metrics are tied to funding. Providing personalized, real-time, actionable feedback through mining and analysis of large data sets, learning analytics can illuminate trends and predict future outcomes. While promising, there is limited and mixed empirical evidence related to its efficacy to improve student retention and completion. Further, learning analytics tools are used by a variety of people on campus, and as such, its use in practice may not align with institutional intent. This monograph delves into the research literature and issues associated with learning analytics implementation, adoption, and use by individuals within higher education institutions. With it, readers will gain a greater understanding of the potential and challenges related to implementing, adopting, and integrating these systems on their campuses and within their classrooms and advising sessions. This is the fifth issue of the 43rd volume of the Jossey-Bass series *ASHE Higher Education Report*. Each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication.
