Schnellpressenfabrik AG Heidelberg,      **Chemical Water and Wastewater Treatment IV** Hermann H. Hahn,E.  
Hoffmann,Hallvard Odegaard,2012-12-06 This seventh symposium in the series of biennial Gothenburg Symposia taking  
place in Edingburgh 1996 continues to bring together research scientists designing and operating engineers and funding and  
supervising administrators It also has enlarged the scope of its platform by bringing together concerned specialists from  
Western countries and Central and Eastern Europe and furthermore attempts to bridge the gap between developing and  
industrialized countries The traditionally presented topics such as treatment of potable water and wastewater predominantly  
by chemical means are of utmost importance for those that need immediate action at reasonable costs It is particularly  
noteworthy that an increasing number of contributions address these problems of the emerging need for environmental  
protection And more and more presentations are delivered by experts from Central and Eastern Europe and from developing  
countries Again the proceedings of this seventh symposium indicate and demonstrate new developments that advance the  
field of water and wastewater treatment Be sides the ever present topics there is now a whole section on automation and  
control a highly significant topic for water technology that so far has not received too much attention in symposia of this kind
