Diversity and Its Discontents Neil J. Smelser, Jeffrey C. Alexander, 2021-04-13 Never before has the legitimacy of a dominant American culture been so hotly contested as over the past two decades Familiar terms such as culture wars multiculturalism moral majority and family values all suggest a society fragmented by the issue of cultural diversity So does any social solidarity exist among Americans In *Diversity and Its Discontents* a group of leading sociologists political theorists and social historians seek to answer this question empirically by exploring ideological differences theoretical disputes social processes and institutional change Together they present a broad yet penetrating look at American life in which cultural conflict has always played a part Many of the findings reveal that this conflict is no more or less rampant now than in the past and that the terms of social solidarity in the United States have changed as the society itself has changed The volume begins with reflections on the sources of the current culture wars and goes on to show a number of parallel situations throughout American history some more profound than today's conflicts The contributors identify political vicissitudes and social changes in the late twentieth century that have formed the backdrop to the wars including changes in immigration marriage family structure urban and residential life and expression of sexuality Points of agreement are revealed between the left and the right in their diagnoses of American culture and society but the essays also show how the claims of both sides have been overdrawn and polarized The volume concludes that above all the antagonists of the culture wars have failed to appreciate the powerful cohesive forces in Americans' outlooks and institutions forces that have in fact institutionalized many of the radical changes proposed in the 1960s *Diversity and Its Discontents* brings sound empirical evidence theoretical sophistication and tempered judgment to a cultural episode in American history that has for too long been clouded by ideological rhetoric In addition to the editors the contributors are Seyla Benhabib Jean L Cohen Reynolds Farley Claude S Fischer Frank F Furstenberg Jr John Higham David A Hollinger Steven Seidman Marta Tienda David Tyack R Stephen Warner Robert Wuthnow and Viviana A Zelizer *The Columbia Documentary History of Race and Ethnicity in America* Ronald H. Undermining Race Phylis Cancilla Martinelli, 2015-10-19 Undermining Race rewrites the history of race immigration and labor in the copper industry in Arizona The book focuses on the case of Italian immigrants in their relationships with Anglo Mexican and Spanish miners and at times with blacks Asian Americans and Native Americans requiring a reinterpretation of the way race was formed and figured across place and time Phylis Martinelli argues that the case of Italians in Arizona provides insight into in between racial and ethnic categories demonstrating that the categorizing of Italians varied from camp to camp depending on local conditions such as management practices in structuring labor markets and workers housing and the choices made by immigrants in forging communities of language and mutual support Italians even light skinned northern Italians were not considered completely white in Arizona at this historical moment yet neither were they consistently racialized as non white and tactics used to control them ranged from micro to macro level violence To make her argument Martinelli looks closely at two white camps in Globe and Bisbee and at the Mexican camp of

Clifton Morenci Comparing and contrasting the placement of Italians in these three camps shows how the usual binary system of race relations became complicated which in turn affected the existing race based labor hierarchy especially during strikes The book provides additional case studies to argue that the biracial stratification system in the United States was in fact triracial at times According to Martinelli this system determined the nature of the associations among laborers as well as the way Americans came to construct whiteness

A Place to Call Home Ernesto Castañeda, 2018-05-29 As immigrants settle in new places they are faced with endless uncertainties that prevent them from feeling that they belong From language barriers to differing social norms to legal boundaries separating them from established residents they are constantly navigating shifting and contradictory expectations both to assimilate to their new culture and to honor their native one In *A Place to Call Home* Ernesto Castañeda offers a uniquely comparative portrait of immigrant expectations and experiences Drawing on fourteen years of ethnographic observation and hundreds of interviews with documented and undocumented immigrants and their children Castañeda sets out to determine how different locations can aid or disrupt the process of immigrant integration Focusing on New York City Paris and Barcelona immigration hubs in their respective countries he compares the experiences of both Latino and North African migrants and finds that subjective understandings local contexts national and regional history and religious institutions are all factors that profoundly impact the personal journey to belonging

The Truth About Health Care David Mechanic, 2006-08-04 The United States spends greatly more per person on health care than any other country but the evidence shows that care is often poor and inappropriate Despite expenditures of 1.7 trillion dollars in 2003 and growing substantially each year services remain fragmented and poorly coordinated and more than 46 million people are uninsured Why can't America with its vast array of resources sophisticated technologies superior medical research and educational institutions and talented health care professionals produce higher quality care and better outcomes In *The Truth about Health Care* David Mechanic explains how health care in America has evolved in ways that favor a myriad of economic professional and political interests over those of patients While money has always had a place in medical care big money and the quest for profits has become dominant making meaningful reforms difficult to achieve Mechanic acknowledges that railing against these influences which are here to stay can achieve only so much Instead he

asks whether it is possible to convert what is best about health care in America into a well functioning system that better serves the entire population Bringing decades of experience as an active health policy participant researcher teacher and consultant to the public and private sectors Mechanic examines the strengths and weaknesses of our system and how it has evolved He pays special attention to areas often neglected in policy discussions such as the loss of public trust in medicine the tragic state of long term care and the relationship of mental health to health care For anyone who has been frustrated by uncoordinated health networks insurance denials and other obstacles to obtaining appropriate care this book will provide a refreshing and frank look at the system s current and future dilemmas Mechanic s thoughtful roadmap describes how health plans healthcare professionals policymakers and consumer groups can work together to improve access quality fairness and health outcomes in America About the Author **Cultural Psychology of Immigrants** Ramaswami

Problem of the Century Elijah Anderson, Douglas Massey, 2001-07-19 In 1899 the great African American scholar W E B DuBois published *The Philadelphia Negro* the first systematic case study of an African American community and one of the foundations of American sociology DuBois prophesied that the color line would be the problem of the twentieth century One hundred years later *Problem of the Century* reflects upon his prophecy exploring the ways in which the color line is still visible in the labor market the housing market education family structure and many other aspects of life at the turn of a new century The book opens with a theoretical discussion of the way racial identity is constructed and institutionalized When the government classifies races and confers group rights upon them is it subtly reenforcing damaging racial divisions or redressing the group privileges that whites monopolized for so long The book also delineates the social dynamics that underpin racial inequality The contributors explore the causes and consequences of high rates of mortality and low rates of marriage in black communities as well as the way race affects a person's chances of economic success African Americans may soon lose their historical position as America's majority minority and the book also examines how race plays out in the sometimes fractious relations between blacks and immigrants The final part of the book shows how the color line manifests itself at work and in schools Contributors find racial issues at play on both ends of the occupational ladder among absentee fathers paying child support from their meager earnings and among black executives prospering in the corporate world In the schools the book explores how race defines a student's peer group and how peer pressure affects a student's grades *Problem of the Century* draws upon the distinguished faculty of sociologists at the University of Pennsylvania where DuBois conducted his research for *The Philadelphia Negro* The contributors combine a scrupulous commitment to empirical inquiry with an eclectic openness to different methods and approaches *Problem of the*
