Migration Michael H. Fisher, 2013-11-04 Migration began with our origin as the human species and continues today Each chapter of world history features distinct types of migration The earliest migrations spread humans across the globe Over the centuries as our cultures societies and technologies evolved in different material environments migrants conflicted merged and cohabited with each other creating entering and leaving various city states kingdoms empires and nations During the early modern period migrations reconnected the continents including through colonization and forced migrations of subject peoples while political concepts like citizen and alien developed In recent history migrations changed their character as nation states and transnational unions sought in new ways to control the peoples who migrated across their borders This volume will explore the process of migration chronologically and also at several levels from the illuminating example of the migration of a individual community to larger patterns of the collective movements of major ethnic groups to the more abstract study of the processes of emigration migration and immigration This book will concentrate on substantial migrations covering long distances and involving large numbers of people It will intentionally balance evidence from the now diverse people s of the world for example by highlighting an exemplary migration for each of the six chapters that highlights different trajectories and by keeping issues of gender and socio economic class salient wherever appropriate Further as a major theme the volume will consider how technology the environment and various polities have historically shaped human migration Exciting new scholarship in the several fields inherent in this topic make it a particularly valuable and timely project

Migration in World History ,2004 *Migration History in World History* ,2010-03-25 Migration is the talk of the town On the whole however the current situation is seen as resulting from unique political upheavals Such a historical interpretations ignore the fact that migration is a fundamental phenomenon in human societies from the beginning and plays a crucial role in the cultural economic political and social developments and innovations So far however most studies are limited to the last four centuries largely ignoring the spectacular advances made in other disciplines which study the deep past like anthropology archaeology population genetics and linguistics and that reach back as far as 80 000 years ago This is the first book that offers an overview of the state of the art in these disciplines

and shows how historians and social scientists working in the recent past can profit from their insights

Migration and the Making of Global Christianity Jehu J. Hanciles, 2021-03-16 A magisterial sweep through 1500 years of Christian history with a groundbreaking focus on the missionary role of migrants in its spread Human migration has long been identified as a driving force of historical change Building on this understanding Jehu Hanciles

surveys the history of Christianity's global expansion from its origins through 1500 CE to show how migration more than official missionary activity or imperial designs played a vital role in making Christianity the world's largest religion. Church history has tended to place a premium on political power and institutional forms thus portraying Christianity as a religion disseminated through official representatives of church and state. But as Hanciles illustrates this top-down perspective overlooks the multifarious array of social movements, cultural processes, ordinary experiences and non-elite activities and decisions that contribute immensely to religious encounter and exchange. Hanciles's socio-historical approach to understanding the growth of Christianity as a world religion disrupts the narrative of Western preeminence while honoring and making sense of the diversity of religious expression that has characterized the world Christian movement for two millennia. In turning the focus of the story away from powerful empires and heroic missionaries, *Migration and the Making of Global Christianity* instead tells the more truthful story of how every Christian migrant is a vessel for the spread of the Christian faith in our deeply interconnected world. — *Illegal Migration and Gender in a Global and Historical Perspective* Marlou Schrover, 2008. This incisive study combines the two subjects and views the migration scholarship through the lens of the gender perspective. — *Understanding Global Migration* James F. Hollifield, Neil Foley, 2022-03-01. *Understanding Global Migration* offers scholars a groundbreaking account of emerging migration states around the globe, especially in the Global South. Leading scholars of migration have collaborated to provide a bird's-eye view of migration interdependence. *Understanding Global Migration* proposes a new typology of migration states, identifying multiple ideal types beyond the classical liberal type. Much of the world's migration has been to countries in Asia, Africa, the Middle East, and South America. The authors assembled here account for diverse histories of colonialism, development, and identity in shaping migration policy. This book provides a truly global look at the dilemmas of migration governance: Will migration be destabilizing or will it lead to greater openness and human development? The answer depends on the capacity of states to manage migration, especially their willingness to respect the rights of the ever-growing portion of the world's population that is on the move.

International Migration Law Vincent Chetail, 2019-03-29 International Migration Law provides a detailed and comprehensive overview of the international legal framework applicable to the movement of persons across borders The role of international law in this field is complex and often ambiguous there is no single source for the international law governing migration The current framework is scattered throughout a wide array of

rules belonging to numerous fields of international law including refugee law human rights law humanitarian law labour law trade law maritime law criminal law and consular law This textbook therefore cuts through this complexity by clearly demonstrating what the current international law is and assessing how it operates The book offers a unique and comprehensive mapping of this growing field of international law It brings together and critically analyses the disparate conventional customary and soft law on a broad variety of issues such as irregular migration human trafficking refugee protection labour migration non discrimination regional free movement schemes and global migration governance It also offers a particular focus on important groups of migrants namely migrant workers refugees and smuggled migrants It maps the current status of the law governing their movement providing a thorough critical analysis of the various stands of international law which apply to them suggesting how the law may continue to develop in the future This book provides the perfect introduction to all aspects of migration and international law World Histories from Below Antoinette Burton,Tony Ballantyne,2022-02-10 History has traditionally privileged elites and their accomplishments World Histories from Below provides an antidote placing ordinary people and subordinated subjects at the heart of the themes it explores Arguing that disruption and dissent are overlooked agents of historical change it takes a global view of topics including political revolution religious conversion labour struggles and body politics This 2nd edition includes two additional chapters on indigenous peoples migration and environmental histories from below With an updated preface this enhanced text also includes additional images and case studies to grapple with themes that have more recently come to the fore such as populism and the environment Offering a study of these themes from 1750 to the present day World Histories from Below refocuses our entire approach to teaching world history **Migration, Trade, and Slavery in an Expanding World** Wim Klooster,2009 The twelve essays explore three connected aspects of European expansion in the period between 1500 and 1900 migration trade and slavery with some attention given to present day echoes from that era The book s first section deals with European migration to transatlantic and Asian destinations the second and third sections focus on the Atlantic slave trade and representations of slavery and the final section analyzes the demise and legacy of slavery The authors reach surprising conclusions European expansion did not entail major economic benefits the small scale of the Europeans intercontinental migration never jeopardized their colonial projects and the unique popular nature of British abolitionism can be explained in part by the growth of the newspaper press in the mid eighteenth century which regularly reported about slave ship revolts Global Labor Migration Eileen Boris,Heidi Gottfried,Julie Greene,Joo-Cheong Tham,2022-12-27 Around the world hundreds of millions of labor migrants endure exploitation lack of basic rights and institutionalized discrimination and marginalization What dynamics and drivers have created a world in which such a huge and rapidly growing group toils as marginalized men and women existing as a lower caste institutionally and juridically In what ways did labor migrants shape their living and working conditions in the past and what opportunities exist for them today Global Labor Migration presents

new multidisciplinary transregional perspectives on issues surrounding global labor migration The essays go beyond disciplinary boundaries with sociologists ethnographers legal scholars and historians contributing research that extends comparison among and within world regions Looking at migrant workers from the late nineteenth century to the present day the contributors illustrate the need for broader perspectives that study labor migration over longer timeframes and from wider geographic areas The result is a unique much needed collection that delves into one of the world s most pressing issues generates scholarly dialogue and proposes cutting edge research agendas and methods Contributors Bridget Anderson Rutvica Andrijasevic Katie Bales Jenny Chan Penelope Ciancanelli Felipe Barradas Correia Castro Bastos Eileen Boris Charlie Fanning Judy Fudge Jorge L Giovannetti Torres Heidi Gottfried Julie Greene Justin Jackson Radhika Natarajan Pun Ngai Bastiaan Nugteren Nicola Piper Jessica R Pliley Devi Sacchetto Helen Sampson Yael Schacher Joo Cheong Tham and Matt Withers

Migration in Africa Michiel de Haas, Ewout Frankema, 2022-03-30 This book introduces readers to the age of intra African migration a period from the mid 19th century onward in which the center of gravity of African migration moved decisively inward Most books tend to zoom in on Africa s external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the last two centuries The book demonstrates that only by taking a broad historical and continent wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time During the 19th century Africa s external slave trades gradually declined whilst Africa s expanding commodity export sectors drew in domestic labor This led to an era of heightened mobility within the region marked by rapidly rising and vanishing migratory flows increasingly diversified landscapes of migration systems and profound long term shifts in the wider patterns of migration This era of inward focused mobility reduced with a resurgence of outmigration after 1960 when Africans became more deliberate in search of extra continental destinations with new diaspora communities emerging specifically in the Global North Broad ranging in its temporal spatial and thematic coverage this book provides students and researchers with the perfect introduction to age of intra African migration
