This is the first book to collect together the wide variety of scholarly approaches to pre-modern recipe books written in English, drawing on varying approaches to reveal their culinary, medical, scientific, linguistic, religious, and material meanings. Ten scholars from the fields of culinary history, history of medicine and science, divinity, archaeology, and material culture, and English literature and linguistics contribute to a vibrant mapping of the aspirations invested in and uses of recipes and recipe books. By exploring areas as various as the knowledge economies of medicine, Anglican feasting and fasting practices, the material culture of the kitchen and table, London publishing and concepts of authorship, and the aesthetics of culinary styles, these eleven essays, including a critical introduction to recipe books and their historiography, position recipe texts in the wider culture of the sixteenth, seventeenth, and eighteenth centuries.
