An integrated and comprehensive approach to the alignment, planning, execution, and governance of IT and its resources has become critical to more effectively align, integrate, invest, measure, deploy, service, and sustain the strategic and tactical direction and value proposition of IT in support of organizations. Much has been written and documented about the individual components of IT Governance, such as strategic planning, demand portfolio, investment management, program and project management, IT service management, and delivery, strategic sourcing, and outsourcing, performance management, and metrics like the balanced scorecard, compliance, and others. Much less has been written about a comprehensive and integrated IT Business Alignment, Planning, Execution, and Governance approach. This new title fills that need in the marketplace and gives readers a structured and practical solution using the best of the best principles available today.
