ORGANIC MACROMOLECULES WORKSHEET

Work through the following questions using "Macromolecules (Biomolecules)" web link found on the class webpage. Answer the questions on a separate sheet of paper.

Carbohydrates

1. Name the four important roles of carbohydrates.
2. What is the most common monosaccharide? Why is this monosaccharide so important to our daily functioning?
3. What is the name of the process resulting in disaccharide formation? What specifically happens in this reaction (the animation can/will help)? What other component is required to make this reaction occur?
4. What is the name of the reaction when you split a disaccharide? What products do you gain?
5. What are the names of the four polysaccharides and what is required for their formation? What are their respective roles for energy storage?

Lipids

1. How are lipids defined? In what type of solvent are they soluble or insoluble? What are their functions in the body?
2. What is the length range of a triglyceride? How are glycerol and fatty acids "connected" to make a triglyceride (Hint: watch the animation)?
3. Compare and contrast unsaturated fatty acids with saturated fatty acids.

of History Timothy J. LeCain, 2017-07-31 New insights into the microbiome epigenetics and cognition are radically
challenging our very idea of what it means to be human while an explosion of neo materialist thinking in the humanities has
fostered a renewed appreciation of the formative powers of a dynamic material environment The Matter of History brings
these scientific and humanistic ideas together to develop a bold new post anthropocentric understanding of the past one that
reveals how powerful organisms and things help to create humans in all their dimensions biological social and cultural
Timothy J LeCain combines cutting edge theory and detailed empirical analysis to explain the extraordinary late nineteenth
century convergence between the United States and Japan at the pivotal moment when both were emerging as global
superpowers Illustrating the power of a deeply material social and cultural history The Matter of History argues that three
powerful things cattle silkworms and copper helped to drive these previously diverse nations towards a global Great
