Intelligent Design and Religion as a Natural Phenomenon John S. Wilkins, 2017-03-02 Over the past decade a strident public debate has arisen about the nature and origin of religions Controversies include how exactly religion evolved whether by individual or group selection if it is adaptive and if not whether and how it is a side effect of evolution This volume focuses on the issue of naturalizing religion on the ways in which cognitive science and social sciences have treated religion as a natural phenomenon It questions whether religious behaviour institutions and experiences can be explained in natural terms The editor brings together some of the best published work on the definition of religion intelligent design and the evolution of religion

Memory, Amnesia, and the Hippocampal System Neal J. Cohen, Howard Eichenbaum, 1993 In this sweeping synthesis Neal J Cohen and Howard Eichenbaum bring together converging findings from neuropsychology neuroscience and cognitive science that provide the critical clues and constraints for developing a more comprehensive understanding of memory Specifically they offer a cognitive neuroscience theory of memory that accounts for the nature of memory impairment exhibited in human amnesia and animal models of amnesia that specifies the functional role played by the hippocampal system in memory and that provides further understanding of the componential structure of memory The authors central thesis is that the hippocampal system mediates a capacity for declarative memory the kind of memory that in humans supports conscious recollection and the explicit and flexible expression of memories They argue that this capacity emerges from a representation of critical relations among items in memory and that such a relational representation supports the ability to make inferences and generalizations from memory and to manipulate and flexibly express memory in countless ways In articulating such a description of the fundamental nature of declarative representation and of the mnemonic capabilities to which it gives rise the authors theory constitutes a major extension and elaboration of the earlier procedural declarative account of memory Support for this view is taken from a variety of experimental studies of amnesia in humans nonhuman primates and rodents Additional support is drawn from observations concerning the neuroanatomy and neurophysiology of the hippocampal system The data taken from divergent literatures are shown to converge on the central theme of hippocampal involvement in declarative memory across species and across behavioral paradigms **Why**

Intelligent Design Fails Matt Young, Taner Edis, 2004 They consistently find grandiose claims with no scientific merit

Deeper Than Darwin John Haught, 2018-05-04 In his acclaimed book *God After Darwin* John Haught argued that religious belief is wholly compatible with evolutionary biology Now in *Deeper Than Darwin* he advances his argument further by saying that religious belief is even more revealing about life than Darwinism Haught looks hard at the question of how after

Darwin religions may plausibly claim to be bearers of truth and not just of meaning and adaptive consolation While he assumes the fundamental correctness of evolutionary biology he firmly rejects the non scientific belief that evolutionary biology amounts to an adequate explanation of living phenomena Even though Darwinism is illuminating Haught argues it by no means tells us everything we need to know about life even in principle To find the deepest though certainly not the clearest understandings of life and the universe we may still profitably consult the religions of the world Deeper Than Darwin takes up where God After Darwin left off arguing that Darwin s vision is important and essentially correct but that we can still dig deeper in our understanding of what is going on in the life story *The Universe Next Door* James W. Sire,2020

theism deism naturalism Marxism nihilism existentialism Eastern monism New Age philosophy postmodernism Islam **The Naked Emperor** Antony Latham,2005 This thought provoking book fundamentally questions the foundations of Darwinism which has become widely accepted as fact through detailed biological arguments and the use of the author s own intricate knowledge of anatomy Challenging the suggestion that the flora and fauna of the world came about through a series of unlikely mutations the author makes many careful distinctions such as differentiating between micro and macro evolution and the characteristics of DNA **Truth Decay** Douglas Groothuis,2009-09-20 A 2001 Christianity Today Award of Merit winner The concept of truth as absolute objective and universal has undergone serious deterioration in recent years No longer is it a goal for all to pursue Rather postmodernism sees truth as inseparable from culture psychology race and gender Ultimately truth is what we make it to be What factors have accelerated this decay of truth Why are people willing to embrace such a devalued concept How does this new view compare and contrast with a Christian understanding While postmodernism contains some truthful insights despite its attempt to dethrone truth Douglas Groothuis sees its basic tenets as intellectually flawed and hostile to Christian views In this spirited presentation of a solid biblical and logical perspective Groothuis unveils how truth has come under attack and how it can be defended in the vital areas of theology apologetics ethics and the arts **The Intelligent Design Debate and the Temptation of Scientism** Erkki Vesa Rope Kojonen,2016-04-28 The controversy over Intelligent Design ID has now continued for over two decades with no signs of ending For its defenders ID is revolutionary new science and its opposition is merely ideological For its critics ID is both bad science and bad theology But the polemical nature of the debate makes it difficult to understand the nature of the arguments on all sides A balanced and deep analysis of a controversial debate this volume argues that beliefs about the purposiveness or non purposiveness of nature should not be based merely on science Rather the philosophical and theological nature of such questions should be openly acknowledged Habits of the Mind James W. Sire,2022-04-05 Can the intellectual life be a legitimate Christian calling James Sire brings wit and wisdom to this question in his deeply personal exploration of how to think well for the glory of God and the sake of his kingdom showing how to cultivate intellectual virtues habits of the mind that will strengthen you in pursuit of your calling *Worldviews and Christian Education* W. Shipton, E. Coetzee & R.

Takeuchi,2014-04 In Worldviews and Christian Education editors W A Shipton E Coetzee and R Takeuchi have brought together works by experts in cross cultural religious education The authors and editors have a wealth of personal experience in presenting the gospel to individuals with various worldviews that differ greatly from those held by Christians who take the Bible as authoritative They focus on the beliefs and issues associated with witnessing to seekers for truth coming from backgrounds as diverse and animism Buddhism Confucianism Hinduism Islam Marxism Taoism and postmodernism Back Cover

of creation and human origins Darwin and the Bible The Cultural Confrontation is about the history and nature of the disputes over human origins that arose with the publication of Charles Darwin s book Origin of Species in 1859 The readings in the text provide the historical theological social and political backgrounds of the debate Rather than trying to demonstrate the truth of Darwinian evolution this book seeks to help the reader understand why the debate over Darwin and the Bible remains as contentious as ever The book seeks to examine why Darwin s theory of evolution appears threatening to some people and likewise to help understand why some scientists often react with such emotion to challenges to their views The contributors include biological scientists social scientists social historians and proponents of the importance of God faith and religion in peoples lives *Letters to Young Scholars, Second Edition* William Carey Ringenberg,2018-04-05 Letters to Young Scholars is designed primarily for college students advanced high school students and church and parachurch study groups on spiritual development As a college text the book introduces beginning students to the general education or liberal arts portion of a Christian college education It gives major emphasis to the humanities and social science disciplines the integration of the Christian faith with those disciplines and the application of Christian thought to daily living applied Christianity It seeks to challenge the students to become broader in perspective and appreciation more compassionate toward all of God s creatures and more confident and committed as they develop their worldviews and personal values
