Merger Control in Europe Nauta Dutilh, 2003-01-01 Rev edition of Merger control in the EU edited by Peter Verloop 3rd rev ed 1999

European Merger Control Catalin Stefan Rusu, 2010-01-01 Twenty years of experience have inevitably brought to light challenges and tensions in the enforcement of the European merger control system Some of these challenges have been faced some have been solved and some remain latent This very valuable study starts from the proposition that the EU has never fully acknowledged those fundamental challenges which relate to the rationale behind merger control in Europe The author shows how the Commission s focus on adapting the rules of merger control to the economic realities of the future business environment although designed with a view to facilitating European integration has compromised attainment of legal certainty transparency and welfare enhancement In its detailed evaluation of the future market structure prediction process embedded in European merger control policy this book approaches two

rock bottom far reaching questions In what ways does merger control promote consumer and societal welfare Is the Commission able to correctly predict the outcome of any given concentration transaction These considerations take the reader through a deep and searching analysis that calls into question the very credibility and transparency of the system leading to alternatives which promise a new clarity of purpose and procedure The author describes how these recommendations can be integrated into the functioning framework of the European project Taken fully into account along the way is a wide spectrum of relevant source material including the following applicable articles and chapters of the founding and subsequent European Treaties secondary European legislation concerning competition and merger activity domestic competition laws guidelines notices and action plans competition law reviews statements of intentions draft legislative attempts speeches on the enactment and purpose of merger control Member States views concerning European merger control as expressed during Council negotiations officially available concentration related statistics and a wide ranging literature review covering both the legal and economic sides of merger control Throughout the author substantiates theoretical assertions with case law examples clearly exposing doctrines arising from such cases as Continental Can Phillip Morris Rothmans and the Airtours Schneider and Tetra Laval trilogy A unique feature of the analysis draws on the author's personal experience while working for a Brussels competition law firm This book is a remarkable compound of academic guide to the roots and rationales of the European Merger Control System practical guide to the day to day intricacies of merger control enforcement and raw guide for decision makers and merger control law enforcers It will be of immense value in all three contexts

EC Merger Control Götz Drauz, Michael Reynolds, 2003 The European Commission adopted a comprehensive package of reforms to the EU merger control regime in conjunction with the accession of the new Member States in 2004 This constituted the most radical reform of the regime since the previous Merger Regulation was adopted in 1989 aimed at better adapting it to a globalizing market and enlarging an increasingly integrated European Union The extensive reform to the regulation has provoked significant questions about the way in which the Commission treats major merger evaluations EC Merger Control provides a comprehensive and insightful account of the many important procedural and substantive aspects of the reform process with contributions from eminent specialists in the field of mergers including lawyers economists and representatives of the European Commission Court of First Instance US Department of Justice the World Bank and several competition authorities The papers in this book are based on the proceedings of the 2002 EC Merger Control conference organised jointly by the European Commission and the International Bar Association

Merger Control in the European Union Eudene Navarro Varona, 2005 This second edition of Merger Control in the EU provides the reader with an exhaustive analysis of the European Community rules relating to merger control including the new EC Merger Regulation 139/2004 of 20 January 2004 which entered into force on 1 May 2004 and the latest interpretive notices adopted by the European Commission A brand new addition to the book is the companion website which will maintain the currency of

the main work after publication a service that is free of charge to all who own a copy of the book The European Commission has exclusive competence to authorise or prohibit concentrations which have a Community dimension Bearing in mind the economic relevance of these operations decisions made by the Commission have an extraordinary market impact This work is an invaluable and precise instrument for legal practitioners and economists as well as for those undertakings involved in merger operations or acquisitions It will enable them to become acquainted with the Commission s policy in this field and to guide themselves through the complex procedure of notification in Brussels It will also be useful for those merger operations which are required to follow the procedure of notification to the national competition authorities in EU Member States since the Commission s guidelines inspire to a large extent the acts and decisions of the national authorities in this field This book analyses the issues related to merger control not only from a legal standpoint but also from an economic one It is a product of the authors knowledge and experience in Brussels as officials of DG Competition in the Commission and as lawyers defending the interests of undertakings involved in the notification procedure

Merger Control in the United Kingdom and European Union Celli,1997-01-08 Merger Control in the United Kingdom and European Union clearly and concisely sets out the rules and procedures governing mergers at both national and European Union EU levels This how to guide assists practitioners involved in mergers by identifying whether a transaction will come under the UK or the EU system who needs to be notified when and how notifications need to be filed under the UK or the EU system the various stages of the process Because in this area policy rather than merely legal rules plays a central role Merger Control in the United Kingdom and European Union also identifies the various strands and developments of merger policy in Whitehall and in Brussels The book has been fully updated to take account of the new legislative and interpretative measures introduced by the European Commission in December 1994 on the application of the EC Merger Regulation as well as the UK statutory instruments enacted in March 1996 to amend merger control and competition rules and recent developments involving mergers in the privatised utilities Also included in this single volume are the texts of the relevant UK and EU legislation This guide will interest all businesses involved in or contemplating transactions which could come under the rules as well as lawyers bankers accountants and other professional advisers and policymakers and observers of this developing area of law and policy

Alistair Lindsay, Alison Berridge, 2012 This is the 4th edition of The EC Merger Regulation a detailed guide to the method of
merger control in the European Union Fully revised for 2012 this comprehensive text describes how the European
Commission determines approval of a notified merger thereby providing information and techniques to complete merger
deals successfully for companies operating in the European Union **Trademarks and Brands in Merger Control**
Damiano Canapa, 2016-06-23 The role of intellectual property rights in merger control procedures has not received the
attention it warrants Most research has focused on the assessment of intellectual property rights in anticompetitive conducts
rather than on how a firm can monopolise a market by accumulating such assets This is despite the fact that access to such
assets whether used or unused is often a key factor if not the only one motivating mergers This book the first to address
trademarks and brands from the perspective of merger control procedure studies the legal issues of the topic It provides a
comprehensive response to the question of how European and Swiss competition authorities should consider trademarks and
brands when assessing a merger The author's thorough and critical approach addresses topics such as the in depth
assessment of the legal and economic foundations of both trademarks and brands and merger control why trademarks and
brands may be relevant to the assessment of mergers including the distinction between trademarks and brands the origin of
the brands strength according to marketing sciences and how and why brands may provide market power to their holder the
conditions under which the assignment or licence of a trademark may qualify as a concentration under the definition of the
European Union Merger Regulation or of the Swiss Cartel Act the role played by trademarks and brands in the substantive
assessment of a merger including the definition of the relevant markets different types of mergers and the invocation of the
failing firm defence the provision of detailed guidelines describing the possible influence of trademarks and brands on the
outcome of the merger assessment and the importance of trademarks and brands in the design and assessment of remedies
At every stage of the study special attention is given to the decisions of both the European Commission and the Swiss
Competition Commission As the first detailed analysis of the role of trademarks and brands in the assessment of mergers this
book constitutes a deep and illuminating answer to the uncertainties regarding the outcomes of the assessment of mergers
that derive from the more economic approach prevailing in European Union Law It cannot fail but capture the interest of
practitioners businesspeople and academics whose work involves competition and intellectual property **Merger Control
in Europe** Ioannis Kokkoris, 2010-09-13 This book addresses the phenomenon of mergers that might result in non
coordinated effects in oligopolistic markets identifying examples of these mergers both in the EU and in other jurisdictions
including the UK USA Italy Hungary Finland and Australia and analyzing how these cases were dealt with in practice

Commission's power in the control of mergers Since the Council of Ministers adopted the EC Merger Regulation in 1989 The power of the European Commission has increased steadily The scope of the Merger Regulation now occupies a central role in many mergers taking place both inside and outside the European Community To come within the scope of merger regulation and thus within the Commission's jurisdiction a merger must possess a community dimension Despite the careful definition of this term in the Merger Regulation itself The concept has created problems in many cases The European Commission's Jurisdiction to Scrutinise Mergers offers a comprehensive up to date analysis of all aspects of the community dimension concept The most thorough examination of the Commission's jurisdiction to examine mergers under the EC Merger Regulation The European Commission's Jurisdiction to Scrutinise Mergers serves as a valuable guide for businesses their legal advisors and competition law enforcers in both the Commission And The Member States **EU Competition Law**

Discriminate Against Small Market Companies? Mika Oinonen, 2010-01-01 Although the question posed by the title of this book has generated considerable debate the essential issue remains open and largely blurred While some believe that there is no so called small market problem others discern discrimination against small market companies i.e. companies with a strong position in their home markets but a modest position in the European and global markets and a consequent need for changes in competition law The author of this enormously helpful work here sets the stage for meaningful discussion by analysing the EC Merger Regulation's objectives economic foundations and application practice to present a reasoned view of the issues that can be considered relevant for such a discussion Considering their effect on the small market problem the author scrutinizes such factors as the following the Commission's methodology for delineating relevant markets in merger assessments unnecessary prohibition caused by overestimation of the market power of small market mergers erroneous approval of cases that should actually be prohibited impact of the so called Harvard and Chicago schools of competition theory and their key policy implications process related alternative views of competition and new synthesizing approaches relevant criteria for a proper analysis of market power concentration measures and market shares barriers to entry price and profitability analyses and product definition v geographic definition of markets In a final chapter the author presents some tentative conclusions normative in nature concerning the problem and the relevant issues relating to it As the first in depth analysis of the issues that are actually involved with its particular diagnosis of the assessment of market power in considering the relevant issues for the problem this study brings into salience the terms of the debate on the problem and thus takes a giant step forward towards defining what needs to be done Competition lawyers policymakers and academics in Europe and
