**Threatened Masculinity from British Fiction to Cold War German Cinema** Joseph Willis, 2019-05-30 The impact of the Cold War on German male identities can be seen in the nation's cinematic search for a masculine paradigm that rejected the fate centered value system of its National Socialist past while also recognizing that German males once again had become victims of fate and fatalism but now within the value system of the Soviet and American hegemonies that determined the fate of Cold War Germany and Central Europe This monograph is the first to demonstrate that this Cold War cinematic search sought out a meaningful masculine paradigm through film adaptations of late Victorian and Edwardian male writers who likewise sought a means of self determination within a hegemonic structure that often left few opportunities for personal agency In contrast to the scholarly practice of exploring categories of modern masculinity such as Victorian imperialist manliness or German Cold War male identity as distinct from each other this monograph offers an important comparative corrective that brings forward an extremely influential century long trajectory of threatened masculinity For German Cold War masculinity lessons were to be learned from history namely from late Victorian and Edwardian models of manliness Cold War Germans like the Victorians before them had to confront the unknowns of a new world without fear or hesitation In a Cold War mentality where nuclear technology and geographic distance had trumped face to face confrontation between East and West Cold War German masculinity sought alternatives to the insanity of mutual nuclear destruction by choosing not just to confront threats but to resolve threats directly through personal agency and self determination

**The Invention of Ecocide** David Zierler, 2011 As the public increasingly questioned the war in Vietnam a group of American scientists deeply concerned about the use of Agent Orange and other herbicides started a movement to ban what they called ecocide David Zierler traces this movement starting in the 1940s when weed killer was developed in agricultural circles and theories of counterinsurgency were studied by the military These two trajectories converged in 1961 with Operation Ranch Hand the joint U S South Vietnamese mission to use herbicidal warfare as a means to defoliate large areas of enemy territory Driven by the idea that humans were altering the world's ecology for the worse a group of scientists relentlessly challenged Pentagon assurances of safety citing possible long term environmental and health effects It wasn't until 1970 that the scientists gained access to sprayed zones confirming that a major ecological disaster had occurred Their findings convinced the U S government to renounce first use of herbicides in future wars and Zierler argues fundamentally reoriented thinking about warfare and environmental security in the next forty years Incorporating in depth interviews unique archival collections and recently declassified national security documents Zierler examines the movement to ban ecocide as it played out amid the rise of a global environmental consciousness and growing disillusionment with the containment policies of the cold war era

**What It Means to Be Human (Colour Edition)** Taro Maeyashiki, 2025-09-21 This book What It Means to Be Human Moral and Existential Questions in British and American Literature is a selective anthology of academic articles exploring the wide and complex

field of American and British literature from the 17th to the 21st century their moral psychological philosophical and sociological implications and closer deeper reading of a rich variety of texts All chapters engage the reader in a conversation with particular works that throw light on both their own time and place and the issues that are always woven through the fabric of human life The spiritual despair of Melville's Captain Ahab the moral uncertainty of Twain's Huck Finn the metaphysical skepticism of The Mysterious Stranger the audacity of Charlotte Brontë's proclamation of female empowerment Ian McEwan's painful reflection on guilt and the impossibility of redemption these essays speak to the contradictions discomfort and desire both in individuals and in the broader community that literature reveals and engages with Even more it is the study of connections the collection makes between time and genre Thus it is easy to see how Melville's metaphysical preoccupations were countered by Thoreau's gentle yearning for simplicity Salinger's alienation of youth could be read against Hawthorne's tragic dark allegories of faith and disenchantment The psychological disintegration of The Yellow Wallpaper and the absurdity of existence in The Sun Also Rises are cited in the stories of spiritual revolt and social criticism The Fool's ironic insight in Shakespeare's King Lear serves as a connotative precursor for the post modernist fragmentation of the quest for truth as it emerges in the self exploring wanderings of Holden Caulfield The common thread that links this wide ranging exploration of literary questions is the sense that at its best literature does not just mirror reality it ruptures relations displaces certainties and wrestles us from complacency in our understanding of justice love freedom and the precarious scaffolding of the self These fictions never yield clear answers or definitive truths rather they leave us in a state of discomfort and uncertainty amid contradiction and moral ambiguity Moreover most importantly they beckon us always to hear the thoughts of those seated at the intersection of art and ethics I hope this volume will be a space for continued thought and dialogue and a source of inspiration for the readers to return to the literary works to interrogate resist remember and humanize

*The American Political Scandal* David R. Dewberry, 2015-08-13 In this holistic examination of political scandal in the United States David Dewberry argues convincingly that such scandals follow a consistent narrative centered largely on media coverage and politician performance rather than the actual corruption or ethics violation committed In making this argument he also provides an analytical framework for understanding the patterns underlying scandals regardless of their unique political contexts Dewberry dissects four major examples Teapot Dome Watergate Iran Contra and Clinton Lewinsky and explores the roles of various constituencies involved in creating reacting to and mediating the scandal What is the true role of journalism within the context of scandal What persuasive techniques do politicians employ to develop and perpetuate scandals What motives and values bring scandals to a close In addition to the core cases Dewberry incorporates briefer examples from contemporary and ongoing controversies including Anthony Weiner s sexting scandal money and sex in Congress how cover ups have gone digital and Chris Christie s Bridgegate The result is a fascinating and thoughtful look at the relationships among political discourse free speech and democracy
