## Meta The Second Wave:

Colin Gunton's Trinitarian Theology of Culture Andrew Picard, 2024-06-27 Whilst upholding some of the criticisms of Colin Gunton's work this incisive book argues that there is a Hauptbriefe in Gunton reception that assumes his early classic works *The One the Three and the Many* and *The Promise of Trinitarian Theology* 1st ed are definitive of his project and fail to engage adequately with the progressions in Gunton's later thought. Instead this book offers a fresh reading of Gunton by giving greater prominence to his later writings which are centred in the mediation of the Son and the Spirit in creation. Andrew Picard argues that Gunton's trinitarian theology of culture emerges from his later trinitarian theology of mediation, creation, Christology, pneumatology and ecclesiology. Exploring these doctrinal foci enables an understanding of Gunton's account of faithful human culture as embodied worship, a living sacrifice of praise which contributes to the divine redemption and perfection of creation. It is the church's particular calling to embody such praise through its visible life in community. The study concludes by intersecting Gunton's theology with the social sciences to critique ableism and consider the politics of the church's belonging in community.

Animal Rights Mark Rowlands, 2025-02-11 A fresh view of animals and what we owe them Do animals have moral standing Do they count morally speaking In Animal Rights Mark Rowlands argues that they do and explores the implications of this idea He identifies three different waves in animal rights writing The first wave was defined by a traditional dispute between utilitarianism represented by Peter Singer and rights based approaches represented by Tom Regan to ethics The second wave was defined by an expansion in a conception of ethics which saw utilitarian and rights based approaches supplemented by other ethical traditions including contractualism virtue ethics and care ethics The third wave was defined by an expansion in our conception of animals driven by exciting new developments in the field of comparative psychology Each of these waves had ramifications for how we understand the moral status of animals but this book argues and reinforces the core idea that animals deserve moral respect In earlier waves discussions of animal ethics had been focused on the issue of animal suffering But the third wave is defined by the idea that animals are far more than merely sufferers or enjoyers of experiences but are instead authors of their own lives creatures capable of choosing how to live shaped by a conception of their life and how they would like it to go Rowlands writes that no matter what moral theory you choose the most plausible version of that theory entails that animals have moral standing and that our obligations to them are far more substantial than many of us care to acknowledge
