Metaphor Specialist Discourse Cognition Communication:

Metaphor in Specialist Discourse J. Berenike Herrmann, Tony Berber Sardinha, 2015-12-15 Metaphor in Specialist Discourse presents multiple perspectives on metaphor use in specialist and popularized discourse contexts Using genre and register as starting parameters for deeper exploration and pushing the boundaries further to open up new areas and possibilities ten independent articles investigate metaphor use across a range of specialist domains of discourse such as biology research articles psychological counseling soccer commentaries workfloor communication and penal policy documents Framed by two theoretical chapters the book is a contribution to the study of metaphor use in distinct discourse settings that will be of value to linguists and metaphor scholars of different persuasions graduate students of linguistics and related disciplines and practitioners of specialized areas with an interest in verbal or gestural language use in their areas of expertise It shows that aspects of discourse variation are the beginning of not an afterthought to accurate empirical metaphor studies *Cognitive Approaches to Specialist Languages* Marcin Grygiel, 2017-05-11 Specialist languages such as the languages of law business aviation football and politics can be perceived as highly conventionalized semi natural and not fully autonomous communication codes limited to specific and predominantly formal situations A large number of them can be best characterized by subject matter and semantic content but the most important distinctive element in their make up is the frame of context in which they are embedded This volume discusses various ways of approaching the problems associated with the very broad phenomenon of specialist languages by means of the analytical mechanisms and theoretical conceptions developed within the framework of Cognitive Linguistics The volume includes research carried out by world renowned experts in the field **Conceptual Metaphors as an Organisational Framework of the Specialist Language of IT** Magdalena Krawiec, 2022-06-13 Magdalena Krawiec provides insight into the underlying conceptual structure of information technology and gives a plausible account of the patterns of metaphorical conceptualisation manifested in the specialist language of IT Conceptual metaphors map our concrete experience onto abstract experiences so as to effortlessly get hold of new emergent concepts On the one hand our ability to make our world thinkable rests on the use of our past experiences whereas on the other hand IT specialists familiarise themselves with yet unknown conceptual structures through the interaction with the specialist scenery Specialists thinkability of the specialist surroundings is grounded in their perception of similarity which enables them to adapt both conceptually and linguistically to their specialist practice **A Cognitive Linguistics View of Terminology and Specialized Language** Pamela Faber, 2012-07-04 This book explores the importance of Cognitive Linguistics for specialized language within the context of Frame based Terminology FBT FBT uses aspects of Frame Semantics coupled with premises from Cognitive Linguistics to structure specialized domains and create non language specific knowledge representations Corpus analysis provides information regarding the syntax semantics and pragmatics of specialized knowledge units Also studied is the role of metaphor and metonymy in specialized texts The first

section explains the purpose and structure of the book The second section gives an overview of basic concepts theories and applications in Terminology and Cognitive Linguistics The third section explains the Frame based Terminology approach The fourth section explores the role of contextual information in specialized knowledge representation as reflected in linguistic contexts and graphical information The final section highlights the conclusions that can be derived from this study

Specialized Communication Thorsten Roelcke,Ruth Breeze,Jan Engberg,2025-06-02 Specialized communication in science technology or institutions is one of the most important and exciting fields of applied linguistics The handbook captures the current and relevant knowledge of specialized languages and professional communication It promotes international communication on central issues where dialogue is urgently needed concerning both their intellectual underpinning and the day to day practices associated with them

The Routledge Handbook of Metaphor and Language Elena Semino,Zsófia Demjén,2016-11-03 The Routledge Handbook of Language and Metaphor provides a

comprehensive overview of state of the art interdisciplinary research on metaphor and language and maps out future directions of research and practice in a variety of contexts in this field **Drawing Attention to Metaphor** Camilla Di Biase-Dyson,Markus Egg,2020-04-15 The communicative act of drawing attention to metaphor is a relatively recent topic in metaphor studies and one that has remained contentious from a cognitive perspective This book brings philologists of ancient languages together with metaphor experts from several modalities to interrogate whether ancient and modern texts and languages draw attention to figurative tropes in similar ways In this way the diachronic multimodal and pluridisciplinary contributions to this volume critically review the theoretical frameworks underpinning metaphor marking and metaphor analysis from a completely new empirical basis

Specialized Knowledge Mediation Ekaterina Isaeva,2022-03-11 This book provides an integrated approach to cognitive linguistic mediation with aims toward the efficiency of knowledge transfer and acquisition Problems are approached through the prism of cognitive modelling and mapped to such fields as intercultural and interdisciplinary communication and second language teaching The novelty lies in the synergies between linguistics cognitive science artificial intelligence culture and industry These fields come together through ontological and metaphorical modelling and the attempts to automate such This text provides a theoretical background for research on mediation covering cognitive and communicative perspectives metaphoricality of terms and the ontologization of human knowledge It includes detailed descriptions of methods for different types of cognitive modelling and is intended for students and researchers concerned with terminology cognitive linguistics applied linguistics pragmatics computational linguistics literature studies morphology syntax and semantics Metaphor and Corpus Linguistics Rafael Alejo-González,2023-12-22 Metaphor and Corpus Linguistics Building and Investigating an English as a Medium of Instruction Corpus offers a model for building a corpus of oral EMI seminars It demonstrates how incorporating metaphor to the process of corpus building affords a more comprehensive description of the role of metaphor in discourse EMI is the specific context outlined in this volume and as

such it will be of particular interest to researchers in this area though the design and model can be easily generalised and applied to other corpora focusing on metaphor Alejo Gonz lez argues for the need to build such a corpus given the scarcity of corpora being tagged for metaphor as well as the shortage of those dealing with the EMI phenomenon This book will be of practical use and interest to those researchers of corpus linguistics or related areas looking to explore metaphor through their corpus studies

A Hermeneutic of Imagination Knut M. Heim,2025-08-26 To read the Bible well we need to employ our imagination This volume is the first book length study that takes the Bible s imaginative nature seriously It integrates insights from disciplines like neuroscience metaphor theory and cognition translation theory the affective sciences humor studies and the interdisciplinary study of imagination itself into the academic and theological study of the Bible Knut Heim and Jeffrey Oetter show that reading with imagination is a critical hermeneutic of engagement that fosters close deep lusciously savored and pleasurable readings of the biblical texts Bringing current scholarship from a variety of disciplines to bear on biblical interpretation this book explains that Scripture employs often subtle literary techniques including figurative language emotions and humor that require imagination to recognize and interpret Imagination helps us develop genuinely biblical ideas that get us closer to the meaning intended by the Holy Spirit and the original authors resulting in more accurate interpretations when paired with traditional approaches Even textual aspects that have until now remained odd foreign and confusing can become occasions for imaginative engagement that reveal new meaning and significance A Hermeneutic of Imagination makes the case that reading with imagination is crucial for unlocking the Bible s full potential because it transforms academic study of the Bible into aesthetically inspiring intellectually stimulating emotionally rewarding theologically rich and spiritually transformative adventures of the mind that contribute to problem solving and human flourishing today

Current Approaches to Metaphor Analysis in Discourse Ignasi Navarro i Ferrando, 2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification analysis and interpretation of metaphor across communication channels situational contexts genres and social spheres It reflects three foremost trends of present metaphor research namely the communicative approach the cognitive modelling approach and the multimodality approach These trends are considered as areas of research emerging on the ground of the Conceptual Metaphor Theory initiated by Lakoff The book intends to show their concomitances as well as mark their diversifying paths The aim is to bring about and make

apparent the many connections among assumingly different trends stemming from CMT Whereas discrepancies between communicative and conceptual perspectives might seem irredeemable the book emphasizes and claims that the background framework of CMT provides a solid foundation for collaboration and mutual influence Consequently the analysis of metaphor usage in context may provide insights for cognitive modelling proposals The analysis of cognitive configuration of conceptual domains may in turn illuminate our understanding of communicative decisions in discourse The integration of multimodal metaphor analysis puts forward the idea that diverse modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances The various subject areas and methodologies illuminate the scene of current research in the field The poignant contributions open far reaching avenues into the realm of human thought and discourse
