Sternberg, 1990-07-27 *Metaphors of Mind* seeks to help readers understand human intelligence as viewed from a variety of standpoints such as those of psychology anthropology computational science sociology and philosophy Much of the present confusion surrounding the concept of intelligence stems from our having looked at it from these different standpoints without considering how they relate to each other or how they might be combined into a unified view that goes beyond the boundaries of a particular discipline Readers of *Metaphors of Mind* will come away with a comprehensive understanding of the concept of intelligence and how ideas about it have evolved and are continuing to evolve *The Science of Well-being* Felicia A. Huppert, Nick Baylis, Barry Keverne, 2005 How much do we know about what makes people thrive and societies flourish While a vast body of research has been dedicated to understanding problems and disorders we know remarkably little about the positive aspects of life the things that make life worth living This landmark volume heralds the emergence of a new field of science that endeavours to understand how individuals and societies thrive and flourish and how this new knowledge can be applied to foster happiness health and fulfillment and institutions that encourage the development of these qualities Taking a dynamic cross disciplinary approach it sets out to explore the most promising routes to well being derived from the latest research in psychology neuroscience social science economics and the effects of our natural environment Designed for a general readership this volume is of compelling interest to all those in the social behavioural and biomedical sciences the caring professions and policy makers It provides a stimulating overview for any reader with a serious interest in the latest insights and strategies for enhancing our individual well being or the well being of the communities in which we live and work *The Metaphoric Process* Gemma Corradi Fiumara, 2005-08-16 Metaphor is much more than just a linguistic phenomena argues Gemma Corradi Fiumara it is in fact the key process by which we construct and develop our ability to understand the world and the people we share it with Rationality as understood by philosophers has led to a disembodied view of ourselves in which interaction between life and language has been downplayed By looking at the metaphoric process in an interpersonal rather than a formal way its importance in allowing us access to new worlds of experience is revealed The metaphoric potential in us all exposes us to the world and initiates our involvement in it **Cognitive Development** Marc H.
