environments in which their combined forces can thrive and reverberate      **AI Enabled Business** Melodena Stephens, Himanshu Vashishtha, Dirk Nicolas Wagner, 2023-07-01 As the use of AI becomes more and more ubiquitous in companies around the world managers charged with taking key decisions require resources to enable them to evaluate new projects effectively The business case for AI projects is not necessarily clear cut and part of the reason for this is the lack of understanding on key decision criteria AI touches on many ethical concepts data privacy validity and more importantly its potential misuse AI is often being used to replace human decision making and there is often no real understanding of the implications of this This book provides a detailed primer for practitioners without a deep technological background It guides the reader through the basic issues and offers advice on how to take decisions There is a dearth of such books currently available and this book aspires to fill a growing niche **ENDORSEMENTS** This book is sure to offer value to business users students and the general public K Ananth Krishnan Tata Consultancy Services I highly recommend this book for the leader seeking an up to date review of AI to make strategic investments Kes Sampanthar Innovation BCG Brighthouse The specificity of application in case studies and easy to understand definitions and recommendations make this a must read in the ever growing field of literature around AI John C Havens The AI Enabled Organization is the perfect tool to embark on a thorough assessment of what AI means for your business Arno Fehler Schmidt Kranz Group Germany      Thriving in Digital Workspaces Melinde Coetzee, 2019-08-30 This edited volume focuses on innovative solutions to the debate on human thriving in the fast emerging technology driven cyber physical work context also called Industry 4.0 The volume asks the important question How can people remain relevant and thrive in workplaces that are increasingly virtual technology driven and imbued with artificial intelligence This volume includes two major streams of discussion it provides multidisciplinary perspectives on what thriving could mean for individuals managers and organisations in current and future non linear and Web driven workspaces In this context it points to the need to rethink the curricula of the psychology of human thriving so that it is applicable to Industry 4.0 Second it discusses the new platforms of learning opening up in organisations and the ways and means with which people's learning practices can be adapted to changing scenarios Some of these scenarios are changing job designs and talent requirements the demand for creativity the need for virtual teams and intercultural collaborations and changing emotional competencies This topical volume includes contributions by scholars from across the world and is of interest to scholars practitioners and postgraduate students of psychology organizational behaviour and human resource management      **Rationalist Bias in Communication Theory** Shedletsky, Leonard, 2021-06-04 While communication theory has not recognized the implications of the social intuitionist model psychologists have gathered an impressive body of evidence to support the theory In social cognition research there was the idea that human inferential processes are conscious rational logical and accurate and this belief continues somewhat in the behavioral sciences although there is evidence that it is incorrect A fresh examination is needed on just how these inferences by the receiver and the

implications by the sender carried out at high speed impact our understanding of the communication process Simply put until now the default case in communication theory is the belief that we consciously reason and then we act However that may not be entirely true Rationalist Bias in Communication Theory applies social intuition theory to human communication This book explores how research has missed accounting for a critical fact about human communication in the theories of communication namely that we as humans can respond to one another and to all kinds of stimuli faster than we can deliberate By applying intuitive cognition to communication a new light can be shed on the communication process which is what the chapters prove and discuss This book is valuable for social scientists practitioners researchers academicians and students interested in new theories in communication theory      **Global Discourse in Fractured Times** Yahya R.

Kamalipour,2018-07-27 Communication and information facilitated by the internet and social media play a highly influential role in the daily lives of peoples around the world Drawing attention to many contemporary issues the contents of this eclectic multifaceted international and well researched volume are engaging thought provoking and informative This book will be of great value to researchers and media professionals and will serve as an essential resource for senior and graduate level college courses in international communication cultural studies mass media journalism political communication and related subjects      **Metamodern Leadership** James Surwillo,2017-07-11 Metamodern Leadership outlines the seven values that identify the character of our future leaders based on the circumstances that make the Millennial Generation who they are It is at once an attempt to implore youth to seize their potential by tying their values to ancient wisdom as well as a warning to everyone else to understand the impacts of disregarding the inevitable tendencies of a very distinct new demographic This is the untold story of the personal responsibility required of the Millennial Generation against the messaging and memes that portray them as entitled and lazy It is an optimistic and pragmatic interpretation on the leadership mandates in the near future The ancient virtue of leadership required broad knowledge as the basis for critical thinking and self examination The late twentieth century required myopic versions of leadership which neglected the truths of centuries of wisdom Our younger generations will lead and follow based on new foundations that seem counterintuitive to most yet will be the status quo within a decade This distinction will lead to pragmatism and problem solving for the future rather than the dogma and gridlock of today We will require a generation of leaders who can once again link the complexities of the future with the ancient wisdom of progress      *Digital Innovation and the Future of Work* Hans Schaffers,Matti

Vartiainen,Jacques Bus,2022-09-01 The concept of digitalization captures the widespread adoption of digital technologies in our lives in the structure and functioning of organizations and in the transformation of our economy and society Digital technologies for data processing and communication underly high impact innovations including the Internet of Things wireless multimedia artificial intelligence big data enterprise platforms social networks and blockchain These digital innovations not only bring new opportunities for prosperity and wellbeing but also affect our behaviors activities and daily

lives They enable and shape new forms of production and new working practices in sectors such as manufacturing healthcare logistics and supply chains energy and public and business services Digital innovations are not purely technological but form part of comprehensive systemic innovations of a sociotechnical and networked nature requiring the alignment of technology processes organizations and humans Examples are platform based work customer driven value creating networks and urban public service systems Building on widespread networking algorithmic decisions and sharing of personal data these innovations raise intensive societal and ethical debates regarding key issues such as data sovereignty and privacy intrusion business models based on data surveillance and negative externalization quality of work and jobs and market dominance versus regulation In this context this book focuses on the implications of digitalization for the domain of work The book studies the changing nature of work as well as new forms of digitally enabled organizations work practices and cooperation The book sheds light on the technological economic and political forces shaping the new world of work and on the prospects for human centric and responsible innovations **Innovation Ecosystems in Africa** Olugbenga Adesida, 2023-07-27

**Innovation Ecosystems in Africa** aims to deepen and broaden the visibility and interrogation of African innovation systems in practice by offering unique analysis of the emergence growth and future prospects of endogenous innovation practices and lessons across the continent The stories depict systemic innovations in a range of critical development areas from health and education to leadership and entrepreneurialism and span from North to South and East to West covering more than a dozen different African cities and countries In addition to sharing knowledge about exciting but rarely acknowledged cases of innovation in Africa the book serves also as a work to inform policymakers and practitioners throughout Africa on how to learn from experiences towards developing more enabling innovation ecosystems to nurture creativity and solve the problems that we have This book provides policymakers business and opinion leaders both inspiration and useful policy takeaways that can guide strategies and support concrete measures to foster and speed up the pace of developmentally impactful innovation on the continent **Innovation Ecosystems in Africa** builds upon the work of the African Innovation Summit AIS by further examining how the innovation systems environments in Africa function or not to address the most basic conditions of socio economic and institutional development required on the continent In this volume learning case studies identified alongside the second Africa Innovation Summit Kigali June 2018 examine various sectoral exemplars and transversal dimensions to help inform insights about how policymakers and practitioners might develop more effective and impactful innovation driven strategies ecosystems and enterprises This edited collection uses multi country cross sectoral case studies to advance an empirically grounded appreciative investigation of how innovation is being used to address fundamental development challenges on the continent and how the African innovation ecosystems could be made more enabling into the future *Leadership for the Future* Thomas Mengel, 2021-06-29 This volume explores various approaches to leadership from both the past and the present critically analysing these in the light of possible future challenges and

scenarios In addition by drawing from the field of future studies it introduces the reader to concepts of leadership that are future ready
