## **Methods Of Discovery Heuristics For The Social Sciences Contemporary Societies Series:**

**Methods of Discovery** Andrew Delano Abbott, Jeffrey C. Alexander, 2004 Abbott helps social science students discover what questions to ask This exciting book is not about habits and the mechanics of doing social science research but about habits of thinking that enable students to use those mechanics in new ways by coming up with new ideas and combining them more effectively with old ones Abbott organizes his book around general methodological moves and uses examples from throughout the social sciences to show how these moves can open new lines of thinking In each chapter he covers several moves and their reverses if these exist discussing particular examples of the move as well as its logical and theoretical structure Often he goes on to propose applications of the move in a wide variety of empirical settings The basic aim of *Methods of Discovery* is to offer readers a new way of thinking about directions for their research and new ways to imagine information relevant to their research problems *Methods of Discovery* is part of the *Contemporary Societies* series The Oxford Handbook of Organizational Change and Innovation Marshall Scott Poole, Andrew H. Van de Ven, 2021 Why and what organizations change is generally well known how organizations change is therefore the central focus of this Handbook Leading scholars focus on processes of change and the factors that influence these processes with the organization as the central unit of analysis On Theory Richard J. Arend, 2019-05-03 This book provides value to anyone interested in theory for understanding why it exists why it exists in the form it does what it is and what it is not how to do it and when and where and the responsibilities it entails It is useful for those studying theory or the philosophy of science for those writing theory for those critiquing theory and for those trying to understand and apply theory The book provides perspective in this thing theory that is ubiquitous species differentiating and yet deeply flawed in many ways the thing that undergirds humanity s greatest successes and continued failures It demystifies the heart of science while unifying the sciences in terms of goals and duties *Transdisciplinary Sustainability Studies* Katri Huutoniemi, Petri Tapio, 2014-06-05 Arising out of human environment interaction sustainability problems resist disciplinary categories and simple solutions This book offers a fresh approach to practical and methodological concerns in transdisciplinary environmental and sustainability studies It illustrates methodological means by which researchers professionals and decision makers can address complex environmental issues While scientific reasoning is mostly guided by disciplinary traditions transdisciplinary research rests on other cognitive strategies As it does not have a ready made stance toward problems figuring out what the puzzle is and what the answer might look like are crucial aspects of transdisciplinary inquiry Through examples from environment and sustainability studies the volume discusses heuristic schemes that can give structure to this exploration By focusing on heuristics rather than on methods concepts or general guidelines the book argues that a problem centered approach often resists the rigor of methodology Learning from experience provides valuable rules of thumb checklists and other cognitive schemes for making ill defined problems more tangible Written by an international team of authors the chapters draw examples from dealing with

issues in environmental protection transport and climate policy ecosystem services and disservices environmental beliefs and attitudes and more Together with more theoretically oriented chapters they show that the intellectual processes needed to tackle complex sustainability problems are as much about heuristic problem solving as they are about methodical work

Institutionalizing Interdisciplinarity and Transdisciplinarity Bianca Vienni-Baptista, Julie Thompson Klein, 2022-04-06 Institutionalizing Interdisciplinarity and Transdisciplinarity fills a gap in the current literature by systematizing and comparing a wide international scope of case studies illustrating varied ways of institutionalizing theory and practice This collection comprises three parts After an introduction of overall themes Part I presents case studies on institutionalizing Part II focuses on transdisciplinary examples while Part III includes cross cutting themes such as funding evaluation and intersections between epistemic cultures With expert contributions from authors representing projects and programs in Asia Africa Australia Europe Russia and South Caucuses Latin and North America this book brings together comparative perspectives on theory and practice while also describing strategies and models of change Each chapter identifies dimensions inherent in fostering effective and sustainable practices Together they advance both analysis and action related challenges The proposed conceptual framework that emerges supports innovative practices that are alternatives to dominant academic cultures and approaches in pertinent disciplines fields professionals and members of government industry and communities Applying a comparative perspective throughout the contributors reflect on aspects of institutionalizing interdisciplinarity and transdisciplinarity as well as insights applicable to further contexts This innovative volume will be of great interest to students scholars practitioners and members of organizations promoting and facilitating interdisciplinary and transdisciplinary research

*Poverty, Crisis and Resilience* Marie Boost, Jennifer Dagg, Jane Gray, Markus Promberger, 2020-12-25 Poverty remains a problem in Europe raising the need for new solutions In this thought provoking book the contributors delve deeply into the everyday lives of poor households to see which practices and resources they apply to improve their situations One of the book s key findings is that social resilience requires a functioning welfare state operating at an increased level In addition to sufficient welfare transfers there is a need for low commodified common goods to be made available not only for the registered poor but all low income households

**Handbook of Sustainable Innovation** Frank Boons, Andrew McMeekin, 2019 The Handbook of Sustainable Innovation maps the multiple lineages of research and understanding that constitute academic work on how technological change relates to sustainable practices of production and consumption Leading academics contribute by mapping the general evolution of this academic field our understanding of sustainable innovation at the firm user and systems level the governance of sustainable innovation and the methodological approaches used The Handbook explores the distinctiveness of sustainable innovation and concludes with suggestions for generating future research avenues that exploit the current diversity of work while seeking increased systemic insight

**The Structural Change of Knowledge and the Future of the Social Sciences** Ronald

Pohoryles, Andrew Sors, 2019-05-17 This book is a compendium of pragmatism in the social sciences While addressing several distinct spheres it carries a common message the future of the social sciences depends on a shared understanding of society based on the knowledge of various disciplines and transcending the currently forbidding borders between scientific knowledge and the other forms of knowledge Looking back at the social science traditions this is nothing new To ensure a fruitful future for the social sciences a paradigm shift is unavoidable The consequence of the increase of knowledge in the last two centuries was the specialization of the sciences The nineteenth century saw the separation of humanities and social sciences the twentieth century is even characterized by specialization within the disciplines and the occurrence of competing schools of thought This book tries to overcome the barriers that are built between and within the disciplines and to counteract the unnecessary barriers created by the emergence of schools of thoughts that distrust each other and the social sciences as a whole This book was originally published as a special issue of *Innovation The European Journal of Social Science Research* Routledge Handbook of Academic Knowledge Circulation Wiebke Keim, Leandro Rodriguez Medina, Rigas Arvanitis, Natacha Bacolla, Chandni Basu, Stéphane Dufoix, Stefan Klein, Mauricio Nieto Olarte, Barbara Riedel, Clara Ruvituso, Gernot Saalman, Tobias Schlechtriemen, Hebe Vessuri, 2023-06-30 Knowledge is a result of never ending processes of circulation This accessible volume is the first comprehensive multidisciplinary work to explore these processes through the perspective of scholars working outside of Anglo American paradigms Through a variety of literature reviews examples of recent research and in depth case studies the chapters demonstrate that the analysis of knowledge circulation requires a series of ontological and epistemic commitments that impact its conceptualisation and methodologies Bringing diverse viewpoints from across the globe and from a range of disciplines including anthropology economics history political science sociology and Science ii spaces and actors of circulation iii academic media and knowledge circulation iv the political economy of academic knowledge circulation v the geographies geopolitics and historical legacies of the global circulation of academic knowledge vi the relationships between academic and extra academic knowledges and vii methodological approaches to studying the circulation of academic knowledge This handbook will be essential reading for academics researchers and postgraduate researchers in the humanities and social sciences interested in the circulation of knowledge *Entrepreneurial Theorizing* Dean A. Shepherd, Holger Patzelt, 2023-01-09 This open access book investigates an entrepreneurial approach to building new theories It provides a rich understanding of how specific tools facilitate aspects of the theorizing process and offers a clearer big picture of the process of building important new entrepreneurship theories The authors show that anthropomorphizing has been a critically important tool for developing influential entrepreneurship theories They reveal how scholars build on their rich and highly accessible understanding of humans i e the self and others to make guesses and sense of entrepreneurial anomalies articulate theoretical mechanisms to build more robust entrepreneurship theories and create plausible stories that facilitate sensegiving Further they offer a framework that guides

entrepreneurship scholars in finding a balance to maximize their contributions and guides reviewers and editors in managing the revise and resubmit process to advance the entrepreneurship field Finally they present lean scholarship as an approach to developing a portfolio of high quality high impact papers Lean scholarship starts with an entrepreneurial mindset and involves creating a minimum viable paper exploring its validity adding a plausible paper to one's portfolio and managing the portfolio by periodically deciding whether to persevere pivot or terminate each paper This seminal work will appeal to entrepreneurship researchers both those new to the field as well as seasoned veterans who want to learn more about the tools that can be used to generate new knowledge about new ventures and other entrepreneurship topics *Statehood à la Carte in the Caribbean and the Pacific* Jack Corbett, 2023-04-15 This book explains how leaders in the Caribbean and Pacific regions balance the autonomy viability dilemma of postcolonial statehood that political self determination is a hollow achievement unless it is accompanied by economic development by practising statehood la carte Previous research has focused on the pursuit of decolonial self determination through and above the nation state via regionalism and internationalism or by creating non sovereign alternatives to it This book looks at how communities have sought the same goals below the state including via secession and devolution Downsizing is typically portrayed as the antithesis of progressive cosmopolitan internationalism and employed as evidence for the claim that the age of anticolonial self determination has ended In this book Jack Corbett shows how these movements are animated by similar ideas and motivations that are rendered viable by the simultaneous pursuit of regional integration and forms of non sovereignty He argues that the la carte pursuit of political and economic independence through above and below the state and via non sovereign alternatives to it is a pragmatic response to the contradictions inherent to coloniality **Research on Scientific Research** Mauro Maldonato, 2010-01-07 Explains how scientific research is conducted This title focuses on the inter transdisciplinary dimensions of research It combines essays that focus on the inter transdisciplinary study of research systems from a group of international researchers from Italy the UK and the United States Handbook of Research on Islamic Business Ethics Abbas J. Ali, 2015-10-30 The Handbook of Research on Islamic Business Ethics is an essential source for policymakers and researchers to gain an understanding of pressing ethical issues in the Islamic business world The primary objective is to provide readers with an insight into the ethical principles that govern Islamic business conduct These principles are articulated with a view to evaluating whether business actors uphold their social responsibilities and are committed to ethical values in their conduct Exploring the interweaving relationship between Islamic business ethics and the market this Handbook examines the critical role that ethics can play in ensuring that business thrives It offers theoretical perspectives on research and goes beyond the conventional treatment of Islamic ethics It debates important market issues and asserts that social actors in the Islamic business world should be cognisant of these issues so as to behave in a moral and responsible manner Implications for researchers and for market conduct are illuminated Readers wanting to familiarize themselves with

day to day Islamic business ethics will find this Handbook an invaluable guide

Comparing Police Organizations Jenny Fleming, Sebastian Roché, 2024-02-15 Police citizen encounters do not occur in a vacuum Police systems globally have similarities and or differences which remain largely understudied and therefore underexplained Comparative policing is a new frontier for policing research as it aims at integrating the institutional and or macro determinants of police strategy and provides important insights into the context in which such strategies emerge This volume shows how lessons and insights emerge from a comparative approach to policing research in various regions of the world It demonstrates the explanatory power of cross national studies with a particular focus on politics policies and for what concerns the nature of police work and the legitimacy of policing The book presents comparative studies from different geographical locations such as Latin and Central America Africa India and Europe and offers insights on Police worker politics in India and Brazil Police non state security actors and political legitimacy in central America Trust in the police and the militarization of law enforcement in Latin America The origins of police legitimacy in Europe How organizational contexts matter by analyzing police adolescent encounters in France and Germany Legitimacy and cooperation with the police in two African states Cross state and cross society research is desirable to increase our understanding of variations of the macro context in which police forces operate what policing means for citizens and for police officers as professional workers This insightful volume is a key resource for scholars and researchers of policing criminology sociology and law This book was originally published as the inaugural volume of Comparative Policing Review Policing and Society

International Organizations and Research Methods Fanny Badache, Leah R. Kimber, Lucile Maertens, 2023-08-24 Scholars have studied international organizations IOs in many disciplines thus generating important theoretical developments Yet a proper assessment and a broad discussion of the methods used to research these organizations are lacking Which methods are being used to study IOs and in what ways Do

we need a specific methodology applied to the case of IOs What are the concrete methodological challenges when doing research on IOs

**International Organizations and Research Methods An Introduction** compiles an inventory of the methods developed in the study of IOs under the five headings of Observing Interviewing Documenting Measuring and Combining It does not reconcile diverging views on the purpose and meaning of IO scholarship but creates a space for scholars and students embedded in different academic traditions to reflect on methodological choices and the way they impact knowledge production on IOs
