Complex Systems and Population Health Yorghos Apostolopoulos, Kristen Hassmiller Lich, Michael K. Lemke, 2020-05-29 Currently population health science is an integral part of global academic curricula For over a century the principles of the reductionist paradigm have guided population health curricula training research and action Researchers continue to draw upon these principles when theorizing conceptualizing designing studies analyzing and devising interventions to tackle complex population health problems However unresolved impasses in addressing pressing population health challenges have catalyzed calls for the integration of complex systems science grounded approaches into population health science Mounting evidence denotes that a complex systems paradigm can bring about dramatic multipronged changes for education and training and lead to innovative research interventions and policies Despite the large and untapped promise of complex systems the haphazard knowledge base from which academics researchers students

policymakers and practitioners can draw has slowed their integration into the population health sciences This volume fulfils this growing need by providing the knowledge base necessary to introduce a holistic complex systems paradigm in population health science As such it is the first comprehensive book in population health science that meaningfully integrates complex systems theory methodology modeling computational simulation and real world applications while incorporating current population health theoretical methodological and analytical perspectives It is intended as a programmatic primer across a broad spectrum of population health stakeholders from university professors and graduate students to researchers policymakers and practitioners

The Aging-Disability Nexus Katie Aubrecht, Christine Kelly, Carla Rice, 2020-06-01 As the global population ages disability demographics are shifting Societal transformation and global health inequities have changed who is likely to reach old age who is likely to live with disability and the relationship between aging and disability in various socio cultural and geopolitical contexts The Aging Disability Nexus breaks new ground by bringing gerontology and disability studies into

dialogue with each other through a variety of empirical conceptual and pedagogical approaches Contributors explore the tensions that shape the way disability and aging are understood experienced and responded to at both individual and systemic levels while avoiding the common tendency to conflate these overlapping elements and map them onto a normative faulty notion of the human life trajectory This perceptive work analyzes the distinction between aging with a disability and aging into disability and reveals how multiple identities socio economic forces culture and community give form to our experiences

Community Development Approaches to Improving Public Health Robert S Ogilvie, 2013-09-13 As the rates of chronic diseases like diabetes asthma and obesity skyrocket research is showing that the built environment the way our cities and towns are developed contributes to the epidemic rates of these diseases It is unlikely that those who planned and developed these places envisioned these situations Public health community development planning and other fields influencing the built environment have operated in isolation for much of recent history with the result being places that public health advocates have labelled designed for disease The sad irony of this is that planning and public health arose together in response to the need to create health standards zoning and building codes to combat the infectious diseases that were prevalent in the industrializing cities of late nineteenth and early twentieth century America In recent years the dramatic rise in chronic disease rates in cities and towns has begun to bring public health and planning back together to promote development pattern and policies facilitating physical activity and neighbourly interactions as antidotes In this book a number of such community development efforts are highlighted bringing attention to the need to coordinate planning community development and health policy This book was originally published as a special issue of Community Development
