Conspiracy Theory Discourses Massimiliano Demata, Virginia Zorzi, Angela Zottola, 2022-11-15
Conspiracy Theory Discourses addresses a crucial phenomenon in the current political and communicative context: conspiracy theories. The social impact of conspiracy theories is wide ranging and their influence on the political life of many nations is increasing. *Conspiracy Theory Discourses* bridges an important gap by bringing discourse-based insights to existing knowledge about conspiracy theories, which has so far developed in research areas other than Linguistics and Discourse Studies. The chapters in this volume call attention to conspiracist discourses as deeply ingrained ways to interpret reality and construct social identities. They are based on multiple, partly overlapping analytical frameworks including Critical Discourse Analysis, rhetoric, metaphor studies, multimodality and corpus-based, qualitative and quantitative approaches. These approaches are an entry point to further explore the environments which enable the proliferation of conspiracy theories and the paramount role of discourse in furthering conspiracist interpretations of reality.

Discourses of Denial Thomas Discenna, 2017-09-22
Discourses of Denial explores the myriad ways that the labor of those employed by universities is situated as somehow distinct from ordinary labor. Focusing on a variety of sites where academic labor is discursively constructed in popular consciousness, including among the professoriate itself, its critics and detractors, the unionization struggles of graduate students, the invisibility of contingent academics and the resistance to the unionization of student athletes, *Merging Critical Rhetoric (CR) with Critical Discourse Analysis (CDA)* this study examines the myth that academic work is not the same as other labor. Pason 2011 p. 1786: The denial of academic labor functions to underwrite an attack on labor in all of its variations, producing what Berardi 2009 calls a new kind of worker who values labor as the most interesting part of his or her life and therefore no longer opposes the prolongation of the working day but is actually ready to lengthen it out of personal choice and will. p. 79: The professoriate is therefore not a retrograde figure of more genteel times but the emblematic figure of late capitalism's transition to cognitive labor and with it an unceasing colonization of the human lifeworld.

Translating

National Identities Between China and the West Xinnian Zheng, 2025-05-30 This book explores the discursive construction of national identities in diplomatic political discourse focusing on translation's pivotal role. It examines diplomatic exchanges between China and the West from 1792 to 1867, a period marked by China's national identity crisis. By combining Descriptive Translation Studies (DTS) with Discourse Historical Approach (DHA), the book uncovers how translation shaped the national identities of both China and the West during a time of intercultural conflict and change. Through the analysis of 29 authentic historical documents, the book offers a groundbreaking analysis of how translators at the Qing court initially portrayed China as superior and the West as inferior. However, as China's global position shifted, so did its translation strategies, gradually transforming China's national identity to be seen as equal to the West. During diplomatic interactions, translators played a crucial role in shaping perceptions of both Chinese and Western identities, thereby influencing international relations. Essential for scholars and students of translation studies, political discourse, and Chinese history, this book goes beyond traditional analysis, offering a new perspective on the intricate relationship between translation, power, and identity. Its blend of qualitative and quantitative methods provides a comprehensive view of East-West relations during a pivotal period in world history.

Proximization Piotr Cap, 2013-06-15 This book proposes a new theory, proximization theory, in the area of political/public legitimization discourse. Located at the intersection of Pragmatics, Cognitive Linguistics, and critical approaches, the theory holds that legitimization of broadly consequential political/public policies, such as pre-emptive interventionist campaigns, is best accomplished by forced construals of virtual external threats encroaching upon the speaker and her audience's home territory. The construals, which proceed along spatial, temporal, and axiological lines, are forced by strategic deployment of lexicogrammatical choices drawn from the three domains. This proposal is illustrated primarily in the in-depth analysis of the 2001-2010 US discourse of the War on Terror and secondarily in a number of pilot studies pointing to a wide range of further applications: environmental discourse, health communication, cyber threat discourse, political party representation. The theory and the empirical focus of the book will appeal to researchers working on interdisciplinary projects in Pragmatics, Semantics, Cognitive Linguistics, Critical Discourse Studies, as well as Journalism and Media Studies.

Languaging Diversity Giuseppe Balirano, 2015-04-01 *Languaging Diversity: Identities, Genres, Discourses* is a suggestive title for another book in the field of linguistics, but what does it actually mean? By choosing to speak of Languaging Diversity and not just of difference, otherness, varieties, multiplicity, hybridity, or alterity, the editors cover the whole range of meanings in the entire field of diversity. They do not wish to limit themselves by using such specific words with increasingly specialised connotations as Alterity or Other, but rather to allow an eclectic range of perspectives and issues to come to the fore. This volume brings together some of the manifold discourses emerging as bearers of the values of alterity by exploring the thorny relationship between Language and Diversity. Drawing on the crucial assumption that speakers' identities are dynamically negotiated as discourse unfolds, *Languaging Diversity* explores the wide theme of identity in discourse, an area of

investigation which has become increasingly popular in recent years A key theme in assembling this volume was that the relationship between diversity and identity cannot be alienated from the factual distribution of material resources in society All contributions in the volume carefully selected and peer reviewed at least partially react to such critical scenery in order to explore the topics surrounding the modes in which diversity is linguistically articulated by and in discourse The various studies deal with how individuals draw on linguistic resources to achieve maintain or challenge representations pertaining to their cultural social ethnic sexual gender professional or institutional identities The volume comprises six sections In the News In Politics Constructing Identities Across Generations and Genders Ethnicities and Popularising Ideas Each section reflects the choice of the various topics through the employment of a variety of methodologies and a variety of theoretical frameworks As such this volume is an innovative attempt to challenge the present day underpinnings of diversity studies
