Palka, 2012-02-06 This book of contributed chapters by subject matter expertly provides an overview and analysis of salient contemporary and historical military subjects from the military geographer s perspective Factors of geography have had a compelling influence on battles and campaigns throughout history however geography and military affairs have gained heightened attention during the past two decades and military geography is the discipline best situated to explain them Hence the premise of this book and its contents are founded on the principle that geographical knowledge of space place people and scale provide essential insights into contemporary security issues and promotes the idea that such insight is critical to understanding and managing significant military problems at local regional and global scales The Political Economy of Bilateral Aid Peter Blunt, 2022-12-23 The social and economic consequences of the COVID 19 pandemic and of extreme climate events have brought into sharp relief the serious deficiencies of our political economies The dominant global ideology of neoliberalism and its architects and beneficiaries are responsible for this Bilateral development assistance is an integral part of the neoliberal grand design However while the deficiencies of neoliberalism have been starkly exposed by the

pandemic its collapse is unlikely in the short term Much bilateral assistance will therefore continue to be self serving Within these confines and on the basis of a sharply critical analysis of the functioning of technical assistance at the point of the design and delivery of programmes and projects this book identifies crucial supply side nodes of power and influence where feasible and relatively straight forward functional reforms strategy structure selection training would make genuinely developmental results for recipients more likely and enhance donor interests at the same time It argues that more authentic empathetic and altruistic technical assistance will be essential to bringing this about The arguments are supported by primary published evidence gathered by the author during 18 years of full time employment as a team leader or programme manager of technical assistance programmes The book will be of interest to students of development management development economics political economy and international relations as well as policy makers development practitioners and supply and demand side government officials
