Old Cookery S Ancient Cuisine:

Old Cookery Books and Ancient Cuisine William Carew Hazlitt, 2018-03-04 Being a proper and accurate appreciation of the cookery of ancient times Originally published in 1902 Man has been distinguished from other animals in various ways but perhaps there is no particular in which he exhibits so marked a difference from the rest of creation not even in the prehensile faculty resident in his hand as in the objection to raw food meat and vegetables He approximates to his inferior contemporaries only in the matter of fruit salads and oysters not to mention wild duck He entertains no sympathy with the cannibal who judges the flavour of his enemy improved by temporary commitment to a subterranean larder yet to be sure he keeps his grouse and his venison till it approaches the condition of spoon meat So little is to be collected in the shape of direct testimony next to nothing of the domestic life of the Britons that it is only by conjecture that one arrives at the conclusion that the original diet of our countrymen consisted of vegetables wild fruit the honey of wild bees which is still extensively used in this country a coarse sort of bread and milk The latter was evidently treated as a very precious article of consumption and its value was enhanced by the absence of oil and the apparent want of butter Mr Ferguson supposes from some remains of newly born calves that our ancestors sacrificed the young of the cow rather than submit to a loss of the milk but it was on the contrary an early superstition and may be on obvious grounds a fact that the presence of the young increased the yield in the mother and that the removal of the calf was detrimental The Italian invaders augmented and enriched the fare without perhaps materially altering its character and the first decided reformation in the mode of living here was doubtless achieved by the Saxon and Danish settlers for those in the south who had migrated hither from the Low Countries ate little flesh and indeed as to certain animals cherished according to Caesar religious scruples against it It was to the hunting tribes who came to us from regions even bleaker and more exacting than our own that the southern counties owed the taste for venison and a call for some nourishment more sustaining than farinaceous substances green stuff and milk as well as a gradual dissipation of the prejudice against the hare the goose and the hen as articles of food which the Commentaries record It is characteristic of the nature of our nationality however that while the Anglo Saxons and their successors refused to confine themselves to the fare which was more or less adequate to the purposes of archaic pastoral life in this island they by no means renounced their partiality for farm and garden produce but by a fusion of culinary tastes and experiences akin to fusion of race and blood laid the basis of the splendid cuisine of the Plantagenet and Tudor periods Our cookery is like our tongue an amalgam We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality
