Mergers Acquisitions And Other Restructuring Activities Seventh Edition:

Mergers, Acquisitions, and Other Restructuring Activities Donald DePamphilis, 2011-09-30 Two strengths distinguish this textbook from others. One is its presentation of subjects in the contexts where they occur. Students see different perspectives on subjects and learn how complex and dynamic the mergers and acquisitions environment is. The other is its use of current events. Of its 72 case studies, 34 are new or have been updated. The implications of Dodd Frank and US Supreme Court rulings affecting the Sarbanes Oxley Act among other regulatory changes are developed to enhance teaching and learning experiences. Other improvements to the 6th edition have shortened and simplified chapters, increased the numbers and types of pedagogical supplements, and expanded the international appeal of examples. With a renewed focus on empirical and quantitative examples, the 6th edition continues to demonstrate how people work together on mergers and acquisitions and why the actions of specific individuals have far-reaching implications. Presents an integrated approach to the activities involved in mergers, acquisitions, business alliances, and corporate restructurings. All chapters have been revised, updated, and contain new content, and 14 include more extensive changes. Structural revisions make chapters more streamlined, shorter, and less complex. Case studies cover a dozen industries, and 75% are new or have been updated. All include discussion questions and answers.

Mergers, Acquisitions, and Other Restructuring Activities Donald DePamphilis, 2013-10-01 In the seventh edition of *Mergers, Acquisitions, and Other Restructuring Activities*, winner of a 2014 Textbook Excellence Award (Texty) from the Text and Academic Authors Association, Donald DePamphilis looks into the heart of current economic trends. In addition to a new chapter on the ways deals are financed, more than 85% of the 54 integrative case studies are new and involve transactions announced or completed since 2010. This new edition anchors its insights and conclusions in the most recent academic research, with references to more than 170 empirical studies published in leading peer-reviewed journals since 2010. Practical exhibits, case studies involving diverse transactions, easy-to-understand numerical examples, and hundreds of discussion questions and practical exercises are included. This substantially updated content, supplemented by questions from CFA Institute examinations, offers the only comprehensive exploration of today's business transactions. Mergers, acquisitions, and restructuring transactions reveal the inner workings of our economy. This longstanding award-winning treatment lays out what every student and professional should understand about their parts, what they are intended to accomplish, and what their competitive, strategic, and value consequences are. Winner of a 2014 Texty Award from the Text and Academic Authors Association. Includes up-to-date and notable transactions: Facebook's takeover of Instagram and LinkedIn's IPO and regulations, Dodd Frank Act of 2010, and JOBS Act of 2012. Covers recent trends, emerging country acquirers in global M&As, and tactics: top-ups, options, and cash-rich split-offs. Additional content available online.

Moving Integrated Product Development to Service Clouds in the Global Economy J. Stjepandić, 2014-09-23 The theory of concurrent engineering is based on the concept that the different phases of a product lifecycle should be conducted concurrently and initiated as early as possible within the product creation process. Concurrent engineering is important in many industries, including automotive, aerospace, shipbuilding, consumer goods, and environmental engineering, as well as in the development of new services and service support. This book presents the proceedings of the 21st ISPE Inc International Conference on Concurrent Engineering held at Beijing Jiaotong University, China, in September 2014. It is the first volume of a new book series, *Advances in Transdisciplinary Engineering*. The title of the CE2014 conference is *Moving Integrated Product Development to Service Clouds in the Global Economy*, which reflects the variety of processes and methods which influence modern product creation. After an initial first section presenting the keynote papers, the remainder of the book is divided into 11 further sections with peer-reviewed papers: product lifecycle management, PLM knowledge-based engineering, KBE, cloud approaches, 3D printing applications, design methods, educational methods and achievements, simulation of complex systems, systems engineering services, as innovation and science, sustainability, and recent research on open innovation in concurrent engineering. The book will be of interest to CE researchers, practitioners from industry, and public bodies and educators alike.
