Merleau Ponty Space Place Architecture Series In Continental Thought:

Merleau-Ponty Patricia M. Locke, Rachel McCann, 2016-01-25 Phenomenology has played a decisive role in the emergence of the discourse of place now indispensable to many disciplines in the humanities and social sciences and the contribution of Merleau Ponty's thought to architectural theory and practice is well established Merleau Ponty Space Place Architecture is a vibrant collection of original essays by twelve eminent philosophers who mine Merleau Ponty's work to consider how we live and create as profoundly spatial beings The resulting collection is essential to philosophers and creative artists as well as those concerned with the pressing ethical issues of our time Each contributor presents a different facet of space place or architecture These essays carve paths from Merleau Ponty to other thinkers such as Irigaray Deleuze Ettinger and Piaget As the first collection devoted specifically to developing Merleau Ponty's contribution to our understanding of place and architecture this book will speak to philosophers interested in the problem of space architectural theorists and a wide range of others in the arts and design community Contributors Nancy Barta Smith Edward S Casey Helen Fielding Lisa Guenther Galen A Johnson Randall Johnson D R Koukal Suzanne Cataldi Laba Patricia M Locke Glen Mazis Rachel McCann David Morris and Dorothea Olkowski

Visual Representations and Interpretations Ray Paton, Irene Neilsen, 2012-12-06 The value of multi disciplinary research and the exchange of ideas and methods across traditional discipline boundaries are well recognised Indeed it could be justifiably argued that many of the advances in science and engineering take place because the ideas methods and the tools of thought from one discipline become re applied in others Sadly it is also the case that many subject areas develop specialised vocabularies and concepts and can consequently approach more general problems in fairly narrow subject specific ways Consequently barriers develop between disciplines that prevent the free flow of ideas and the collaborations that on Visual Representations could often bring success VRI 98 a workshop focused Interpretations was intended to break down such barriers The workshop was held in the Foresight Conference Centre which occupies part of the former Liverpool Royal Infirmary a Grade 2 listed building which has been recently restored The building combines a majestic architecture with the latest in new conference facilities and technologies and thus provided a very suitable setting for a workshop aimed at bringing the Arts and the Sciences together of the workshop was to promote inter disciplinary awareness across The main aim a range of disciplines where visual representations and interpretations are exploited Contributions to the workshop were therefore invited from researchers who are actively investigating visual representations and interpretations artists architects biologists chemists clinicians cognitive scientists computer scientists educationalists engineers graphic designers linguists mathematicians philosophers physicists psychologists and social scientists

Horizons of Phenomenology Jeff Yoshimi, Philip Walsh, Patrick Londen, 2023-04-11 This is an open access book which explores phenomenology as both an exceptionally diverse movement in philosophy as well as an active research method that crosses disciplinary boundaries The volume brings together lively overviews of major areas and

schools of phenomenology as well as the most recent applications across a range of fields The first part reviews the state of the art in various areas of contemporary phenomenology including several distinct schools of Husserl and Heidegger scholarship as well as approaches derived from Merleau Ponty de Beauvoir Fanon and others An innovative quantitative analysis of citation networks provides rich visualizations of the field as a whole The second part showcases phenomenology as a living discipline that can advance research in other areas While some areas of interaction between phenomenology and other disciplines are by now well established e g cognitive science this volume sheds light on newer areas of application The goal is to move beyond discussions of philosophical method and highlight scholars who are actually doing phenomenology in a variety of areas including Embodiment and questions of gender race and identity The arts visual art literature architecture and Archaeology and anthropology This volume offers a concise introduction to cutting edge phenomenological research and is suitable for both students and specialists

Thinking Life with Luce Irigaray Gail M. Schwab, 2020-04-01 Featuring a highly accessible essay from Irigaray herself this volume explores her philosophy of life and living Life thinking an important contemporary trend in philosophy and in women s and gender studies stands in contrast to philosophy s traditional grounding in death exemplified in the work of philosophers such as Socrates Plato and Schopenhauer The contributors to *Thinking Life with Luce Irigaray* consider Irigaray s criticisms of the traditional Western philosophy of death including its either/or dualisms and binary logic as well as some of Irigaray s solutions for cultivating life The book is comprehensive in its analyses of Irigaray s relationship to classical and contemporary philosophers writers and artists and produces extremely fruitful intersections between Irigaray and figures as diverse as Homer and Plato Alexis Wright the First Nations novelist of Australia and twentieth century French philosophers like Sartre Badiou Deleuze and Guattari It also develops Irigaray s relationship to the arts with essays on theater poetry architecture sculpture and film

Place, Space and Hermeneutics Bruce B. Janz, 2017-03-29 This book analyzes the hermeneutics of place raising questions about central issues such as textuality dialogue and play It discusses the central figures in the development of hermeneutics and place and surveys disciplines and areas in which a hermeneutic approach to place has been fruitful It covers the range of philosophical hermeneutic theory both within philosophy itself as well as from other disciplines In doing so the volume reflects the state of theorization on these issues and also looks forward to the implications and opportunities that exist Philosophical hermeneutics has fundamentally altered philosophy s approach to place Issues such as how we dwell in place how place is imagined created preserved and lost and how philosophy itself exists in place have become central While there is much research applying hermeneutics to place there is little which both reflects on that heritage and critically analyzes a hermeneutic approach to place This book fills that void by offering a sustained analysis of the central elements major figures and disciplinary applications of hermeneutics and place

At Home with the Sapa Inca Stella Nair, 2015-07-01 By examining the stunning stone buildings and dynamic spaces of the royal estate of Chinchero Nair brings to light the rich complexity of

Inca architecture This investigation ranges from the paradigms of Inca scholarship and a summary of Inca cultural practices to the key events of Topa Inca's reign and the many individual elements of Chinchero's extraordinary built environment What emerges are the subtle often sophisticated ways in which the Inca manipulated space and architecture in order to impose their authority identity and agenda The remains of grand buildings as well as a series of deft architectural gestures in the landscape reveal the unique places that were created within the royal estate and how one space deeply informed the other These dynamic settings created private places for an aging ruler to spend time with a preferred wife and son while also providing impressive spaces for imperial theatrics that reiterated the power of Topa Inca the choice of his preferred heir and the ruler's close relationship with sacred forces This careful study of architectural details also exposes several false paradigms that have profoundly misguided how we understand Inca architecture including the belief that it ended with the arrival of Spaniards in the Andes Instead Nair reveals how amidst the entanglement and violence of the European encounter an indigenous town emerged that was rooted in Inca ways of understanding space place and architecture and that paid homage to a landscape that defined home for Topa Inca

Sculpted Ambiances in Africana Landscape George Joshua Orwel, 2024-07-19 *Sculpted Ambiances in Africana Landscape* centers on ambiance as it affects the expanded sculptural field particularly filling a gap in aesthetics left by a lack of focus on sculptures and installations in the Africana world and elsewhere This book differentiates ambiance from other affective states and emotions and explores its production It provides an introduction to the history of ambiance and vividly demonstrates through immersive and experiential writing how ambiance manifests in different artistic situations and social settings The book considers the neglected and unique importance of sculptural ambiance to the history of Africana visual culture and what these works mean in terms of their social historical cultural political and ecological imagination of space The book is written in an episodic style and begins with a description of an image before presenting an analysis of the artist's style and staging for ambient experience This book will benefit college and university students scholars of art architecture aesthetics philosophy geography anthropology and sociology and curators and galleries

Merleau-Ponty and the Art of Perception Duane H. Davis, William S. Hamrick, 2016-03-01 Philosophers and artists consider the relevance of Maurice Merleau-Ponty's philosophy for understanding art and aesthetic experience This collection of essays brings together diverse but interrelated perspectives on art and perception based on the philosophy of Maurice Merleau-Ponty Although Merleau-Ponty focused almost exclusively on painting in his writings on aesthetics this collection also considers poetry literary works theater and relationships between art and science In addition to philosophers the contributors include a painter a photographer a musicologist and an architect This widened scope offers important philosophical benefits testing and providing evidence for the empirical applicability of Merleau-Ponty's aesthetic writings The central argument is that for Merleau-Ponty the account of perception is also an account of art and vice versa In the philosopher's writings art and perception thus intertwine necessarily rather than

contingently such that they can only be distinguished by abstraction As a result his account of perception and his account of art are organic interdependent and dynamic The contributors examine various aspects of this intertwining across different artistic media each ingeniously revealing an original perspective on this intertwining **International Seminar on Urban Culture Arte-Polis** ,2006 **The Philosopher's Index** ,2007 Vols for 1969 include a section of abstracts Arts & Humanities Citation Index ,2000 **The Memory of Place** Dylan Trigg,2012-01-24 The Memory of Place offers a lively and original intervention into contemporary debates within place studies an interdisciplinary field at the intersection of philosophy geography architecture urban design and environmental studies Through a series of provocative investigations Trigg analyzes monuments in the representation of public memory transitional contexts such as airports and highway rest stops and the ruins of both memory and place in sites such as Auschwitz **The Fate of Place** Edward Casey,1997-02-28 In this imaginative and comprehensive study Edward Casey one of the most incisive interpreters of the Continental philosophical tradition offers a philosophical history of the evolving conceptualizations of place and space in Western thought Not merely a presentation of the ideas of other philosophers The Fate of Place is acutely sensitive to silences absences and missed opportunities in the complex history of philosophical approaches to space and place A central theme is the increasing neglect of place in favor of space from the seventh century A D onward amounting to the virtual exclusion of place by the end of the eighteenth century Casey begins with mythological and religious creation stories and the theories of Plato and Aristotle and then explores the heritage of Neoplatonic medieval and Renaissance speculations about space He presents an impressive history of the birth of modern spatial conceptions in the writings of Newton Descartes Leibniz and Kant and delineates the evolution of twentieth century phenomenological approaches in the work of Husserl Merleau Ponty Bachelard and Heidegger In the book's final section Casey explores the postmodern theories of Foucault Derrida Tschumi Deleuze and Guattari and Irigaray *Environment, Space, Place 10.1* Troy Paddock,Patrick C Heidkamp,2018-05-02 **Environment, Space, Place - Volume 2, Issue 2 (Fall 2010)** Gary Backhaus,2010 *Environment, Space, Place - Volume 2, Issue 1 (Spring 2010)* Gary Backhaus,2010-01-01 Environment, Space, Place, Volume 3, Issue 2 (Fall 2011).
