H. A. Lorentz, 2012-12-06 With the present ninth volume we bring to a conclusion the edition of the Collected Papers of
Professor H A Lorentz It contains the evidence of his constant activity to promote the interest in science of a larger public in
particular of his country men by addresses on several occasions by articles in magazines and newspapers and other wise In a
certain way in this part of his work he belongs more particularly to his country therefore we reproduce it in the original language
with the exception of his inaugural address as Leiden professor early in 1878 which readers abroad might be interested in
The sketch of Ludwig Boltzmann in the German language contains a most powerful and deep going survey of the scientific
work of this genius In several places the character of the man's personality rather than that of the scientist reveals itself his
attitude towards various problems and his personal views In his first address he refers to the value of mathematics we hear
his dislike for too vivid visual speculations and crude hypotheses his taste for the soberness of mathematical formulae where
he argues that the fundamental principles must needs escape further explanation On page 54 we read what he said about
determinism and on page 181 he expresses himself on the relation of matter and mind His intimate feelings on space and
time and the aether are touched upon on pages 240 261 274 OPENBARING Connie Odendaal, 2012-02-09 Geen een
