Meta-Regression Analysis in Economics and Business T.D. Stanley, Hristos Doucouliagos, 2012-08-21 The purpose of this book is to introduce novice researchers to the tools of meta analysis and meta regression analysis and to summarize the state of the art for existing practitioners Meta regression analysis addresses the rising Tower of Babel that current economics and business research has become Meta analysis is the statistical analysis of previously published or reported research findings on a given hypothesis empirical effect phenomenon or policy intervention It is a systematic review of all the relevant scientific knowledge on a specific subject and is an essential part of the evidence based practice movement in medicine education and the social sciences However research in economics and business is often fundamentally different from what is found in the sciences and thereby requires different methods for its synthesis meta regression analysis This book develops summarizes and applies these meta analytic methods *Meta-regression Analysis in Economics and Business* T. D. Stanley, Hristos Doucouliagos, 2012 The purpose of this book is to introduce novice researchers to the tools of meta analysis and meta regression analysis and to summarize the state of the art for existing practitioners Meta regression analysis addresses the rising Tower of Babel that current economics and business research has become Meta analysis is the statistical analysis of previously published or reported research findings on a given hypothesis empirical effect phenomenon or policy intervention It is a systematic review of all the relevant scientific knowledge on a specific subject and is an essential part of the evidence based practice movement in medicine education and the social sciences However research in economics and business is often fundamentally different from what is found in the sciences and thereby requires different methods for its synthesis meta regression analysis This book develops summarizes and applies these meta analytic methods *International Financial Markets* Julien Chevallier, Stéphane Goutte, David Guerreiro, Sophie Saglio, Bilel Sanhaji, 2019-06-28 This book provides an up to date series of advanced chapters on applied financial econometric techniques pertaining the various fields of commodities finance mathematics academics and students seeking convenient access to an unfamiliar area It will also be of great interest established researchers seeking a single repository on the current state of knowledge current debates and relevant literature *Action Research for Democracy* Ewa Gunnarsson, Hans Peter Hansen, Birger Steen Nielsen, Nadarajah Sriskandarajah, 2015-10-05 Contemporary society encounters profound economical socio ecological and political crises challenging the democratic foundation of our societies This book addresses the potentials and challenges for Action Research supporting democratic alternatives It offers a broad spectrum of examples from Scandinavian Action Research showing different openings towards democratic development The book's first part contributes with a wide range of examples such as Action Research in relation to the Triple Helix Mode II contexts to design as a democratic process to renewal of welfare work and public institutions to innovation policies combining Action Research with gender science In the second part of the book epistemological and ontological dimensions of Action Research are discussed addressing questions of validity criteria related

to Action Research the transformation of knowledge institutions and the specific character of creativity in Action Research The book offers a basis for theoretical as well as practical oriented discussions and critical reflections within the field of Action Research and related research orientations involving a wide range of actors

Non-Representational Methodologies Phillip Vannini, 2015-02-11 Non representational theory is one of the contemporary moment s most influential theoretical perspectives within social and cultural theory It is now widely considered to be the logical successor of postmodern theory the logical development of post structuralist thought and the most notable intellectual force behind the turn across the social and cultural sciences away from cognition meaning and textuality And yet it is often poorly understood This is in part because of its complexity but also because of its limited treatment in the few volumes chiefly dedicated to it Theories must be useful to researchers keen on utilizing concepts and analytical frames for their personal interpretive purposes How useful non representational theory is in this sense is yet to be understood This book outlines a variety of ways in which non representational ideas can influence the research process the very value of empirical research the nature of data the political value of data and evidence the methods of research the very notion of method and the styles genres and media of research

Social Science Research Ethics for a Globalizing World Keerty Nakray, Margaret Alston, Kerri Whittenbury, 2015-10-14 Research in the humanities and social sciences thrives on critical reflections that unfold with each research project not only in terms of knowledge created but in whether chosen methodologies served their purpose Ethics forms the bulwark of any social science research methodology and it requires continuous engagement and reengagement for the greater advancement of knowledge Each chapter in this book will draw from the empirical knowledge created through intensive fieldwork and provide an account of ethical questions faced by the contributors placing them in the context of contemporary debates surrounding the theory and practice of ethics The chapters have been thematically organized into five sections Feminist Ethics Cross Cultural Reflections and Its Implications for Change Researching Physical and Sexual Violence in Non Academic Settings A Need for Ethical Protocols Human Agency Reciprocity Participation and Activism Meanings for Social Science Research Ethics Emotions Conflict and Dangerous Fields Issues of Safety and Reflective Research and Social Science Education Training in Ethics or Ethical Training and Ethical Publicizing This inter disciplinary volume will interest students and researchers in academic and non academic settings in core disciplines of Anthropology Sociology Law Political Science International Relations Geography or inter disciplinary degrees in Development Studies Health Studies Public Health Policy Social Policy Health Policy Psychology Peace and Conflict studies and Gender Studies The book features a foreword by His Holiness The Dalai Lama

Qualitative Analysis in the Making Daniella Kuzmanovic, Andreas Bandak, 2014-10-10 How do scholars transform qualitative data into analysis What does making analysis imply What happens in the space in between data and finalized analysis is notoriously difficult to talk about In other parts of the research process scholars and students are aided by method books that describe the technicalities of generating processing and sorting through data

handbooks that teach academic writing and scholarly works that offer meta level theoretical perspectives Yet the path from qualitative data to analysis remains a black box Qualitative Analysis in the Making ventures into this black box The volume provides a means of speaking about how analyses emerge in the Humanities Contributors from disciplines such as anthropology history and sociology of religion all employ an analytical double take They revisit one of their analyses analyzing how this particular analysis came into being Such analyses of an analysis are neither confessions nor step by step recounts of what happened Rather the volume argues that speaking of the space in between requires analytical displacement and the employment of fresh analytical takes This approach contributes to demystifying the path from qualitative data to finalized analysis It invites novel epistemological reflections among scholars and assists students in improving their analytical skills

Methodologies of Embodiment Mia Perry, Carmen Liliana Medina, 2015-07-24 This volume is dedicated to exploring and exposing the challenges the possibilities and the processes of empirical work in embodiment Grounded in qualitative inquiry in the humanities and social sciences the chapters describe perspectives and contexts of embodied research but focus on the methodologies methods and analytic frames taken up to grapple with this ever more theorised aspect of qualitative inquiry The authors drawn together in this volume share an investment in the ways in which the body inscribes and is inscribed within research that foregrounds the cultural social affective and political discourses that are at the core of how bodies act and are acted upon

Place in Research Eve Tuck, Marcia McKenzie, 2014-08-07 Bridging environmental and Indigenous studies and drawing on critical geography spatial theory new materialist theory and decolonizing theory this dynamic volume examines the sometimes overlooked significance of place in social science research There are often important divergences and even competing logics at work in these areas of research some which may indeed be incommensurable This volume explores how researchers around the globe are coming to terms both theoretically and practically with place in the context of settler colonialism globalization and environmental degradation Tuck and McKenzie outline a trajectory of critical place inquiry that not only furthers empirical knowledge but ethically imagines new possibilities for collaboration and action Critical place inquiry can involve a range of research methodologies this volume argues that what matters is how the chosen methodology engages conceptually with place in order to mobilize methods that enable data collection and analyses that address place explicitly and politically Unlike other approaches that attempt to superficially tag on Indigenous concerns decolonizing conceptualizations of land and place and Indigenous methods are central not peripheral to practices of critical place inquiry

The Emotional Politics of Research Collaboration Gabriele Griffin, Annelie Bränström-Öhman, Hildur Kalman, 2013-07-18 Research collaboration in the form of networks projects and centers has become one of the dominant modes of engaging in research especially funded research across all academic domains However there has been little research on the processes of such collaborations particularly their affective dimensions These as this volume demonstrates and as researchers know well are highly important yet mostly not directly

engaged with when scientists work together even though they are experienced by everybody involved This volume is the first to consider questions such as how the naming of projects impacts on their accompanying affect scapes the policing or disciplining of emotions in research collaborations their accompanying tensions and how these might be managed and the challenges to trust between scientists that such collaborations present Drawing on theories of affect and literature on collaboration as well as on the contributors experiences of being involved in large scale research projects the volume also importantly deals directly with some of the key emotions that occur during research collaborations such as blame elation frustration alienation and belonging and suggests some ways in which one might engage productively with the affective dimensions of research collaboration **Researching Marginalized Groups** Kalwant Bhopal,Ross Deuchar,2015-07-16

This edited collection explores issues that arise when researching hard to reach groups and those who remain socially excluded and marginalized in society such as access the use of gatekeepers ethical dilemmas voice and how such research contributes to issues of inclusion and social justice The book uses a wide range of empirical and theoretical approaches to examine the difficulties dilemmas and complexities surrounding research methodologies with particular groups It emphasizes the importance of national and international perspectives in such discussions and suggests innovative methodological procedures **The Production of Knowledge** Colin Elman,John Gerring,James Mahoney,2020-03-19 A wide ranging

discussion of factors that impede the cumulation of knowledge in the social sciences including problems of transparency replication and reliability Rather than focusing on individual studies or methods this book examines how collective institutions and practices have often unintended impacts on the production of knowledge Cultural Mapping as Cultural Inquiry Nancy Duxbury,W.F. Garrett-Petts,David MacLennan,2015-05-22 This edited collection provides an introduction to

the emerging interdisciplinary field of cultural mapping offering a range of perspectives that are international in scope Cultural mapping is a mode of inquiry and a methodological tool in urban planning cultural sustainability and community development that makes visible the ways local stories practices relationships memories and rituals constitute places as meaningful locations The chapters address themes processes approaches and research methodologies drawn from examples in Australia Canada Estonia the United Kingdom Egypt Italy Malaysia Malta Palestine Portugal Singapore Sweden Syria the United Arab Emirates the United States and Ukraine Contributors explore innovative ways to encourage urban and cultural planning community development artistic intervention and public participation in cultural mapping recognizing that public involvement and artistic practices introduce a range of challenges spanning various phases of the research process from the gathering of data to interpreting data to presenting findings to a broad range of audiences The book responds to the need for histories and case studies of cultural mapping that are globally distributed and that situate the practice locally regionally nationally and internationally Cross-Cultural Interviewing Gabriele Griffin,2015-11-19 Interviewing is one of the most common techniques used to conduct qualitative research in the social sciences and humanities As a result of globalization

researchers increasingly conduct interviews cross inter and intra nationally This raises important questions about how differences and sameness are understood and negotiated within the interview situation as well as the power structures at play within qualitative research and the role that reflexivity plays in mediating these What does it mean to interview Black women as a Black woman How is ethnicity negotiated across various qualitative research encounters How are differences bridged or asserted in feminist interviewing These are just some of the questions explored in the chapters in this volume Drawing on their recent research the contributors detail their experiences of engaging in qualitative interviewing and examine how they negotiated the various dilemmas they encountered The contributions challenge some of the assumptions made in early feminist work on interviewing providing nuanced accounts of actual research experiences This volume explores the practice and implications of conducting cross inter and intra cultural interviewing bringing together researchers from a range of disciplines and countries to describe and analyse both its vicissitudes and its advantages

Video Methods Charlotte Bates, 2014-09-04 This interdisciplinary collection provides a set of innovative and inventive approaches to the use of video as a research method Building on the development of visual methods across the social sciences it highlights a range of possibilities for making and working with video data The collection showcases different video methods including video diaries video go alongs time lapse video mobile devices multi angle video recording video ethnography and ethnographic documentary Each method is presented through a case study showing how it can be used in practice The authors offer pragmatic advice and discuss practical issues including equipment techniques and skills analysis and presentation They also show how video methods can be used in a range of different contexts at train stations on bicycles in schools outdoors and in museums to investigate worlds that are visible audible tangible and in motion In doing so they illuminate the theoretical possibilities that video methods offer for researching the body identity everyday life affect time and space

The Social Politics of Research Collaboration Gabriele Griffin, Katarina Hamberg, Britta Lundgren, 2013-06-07 The past two decades have seen an increasing emphasis on large and interdisciplinary research configurations such as research networks and centers of excellence including those in Social Sciences and Humanities research Little research has been undertaken however to understand how these new large research structures that are being called forth by research funders and research higher education institutions alike function socially and what the impact of operating within such structures is on those working within and those working with them Past writers have discussed the intra agentic operations of human researchers and the material laboratory environment in its broadest sense This volume is concerned with the social politics of research collaboration in relation to six key positions leaders of large research formations leaders of sub projects within large collaborations participant researchers junior and early career researchers advisory board members and those who look in from the outside such as researchers who are unfunded It explores the mostly unacknowledged but critical aspect of social structures in research discussing issues such as struggles over leadership styles the marginalization of researchers working

cross disciplinarily power hierarchies and intellectual ownership and the silencing of dissent in research Knowledge and Power in Collaborative Research Louise Phillips, Marianne Kristiansen, Marja Vehviläinen, Ewa Gunnarsson, 2013-05-02

Collaborative research embraces a multiplicity of practices in which social actors are invited to participate in the research process as co producers of knowledge But what is actually meant by co production in collaborative research Knowledge and Power in Collaborative Research presents a range of critical reflexive strategies for understanding and tackling the challenges emanating from the tensions that arise in the meeting between different participants knowledge forms and knowledge interests The chapters anchor discussion of ethical epistemological and methodological questions in sustained empirical analyses of cases of collaborative knowledge production The book covers diverse theoretical approaches such as dialogic communication theory actor network theory poststructuralist writing as inquiry institutional ethnography dialogic action research and pragmatic action research The empirical cases span a broad spectrum of empirical fields of social practice health services organisational change research science communication environmental communication in intermediary NGOs participatory governance in relation to urban planning and digital communication and virtual worlds

Benefit Transfer of Environmental and Resource Values Robert J. Johnston, John Rolfe, Randall S. Rosenberger, Roy Brouwer, 2015-06-02 This book provides a comprehensive review of environmental benefit transfer methods issues and challenges covering topics relevant to researchers and practitioners Early chapters provide accessible introductory materials suitable for non economists These chapters also detail how benefit transfer is used within the policy process Later chapters cover more advanced topics suited to valuation researchers graduate students and those with similar knowledge of economic and statistical theory and methods This book provides the most complete coverage of environmental benefit transfer methods available in a single location The book targets a wide audience including undergraduate and graduate students practitioners in economics and other disciplines looking for a one stop handbook covering benefit transfer topics and those who wish to apply or evaluate benefit transfer methods It is designed for those both with and without training in economics

Commons, Sustainability, Democratization Hans Peter Hansen, Birger Steen Nielsen, Nadarajah Sriskandarajah, Ewa Gunnarsson, 2016-01-22 This book presents theoretical discussions and practical examples of Action Research from Scandinavia Latin America and Africa primarily dealing with how to combine nature conservation and management with local democratic community development seeing the renewal of Commons as a way to transcend the present dichotomy between these two dimensions □□□□□□□□□□ □□□, 2015-05-06 ESS
