This book was a favorite of H P Lovecraft According to his March 6 1934 letter to James F Morton Other recent items on my calendar are A Merritt s old yarn The Metal Monster which I had never read before because Eddy told me it was dull The damn d fool nephew not our late bibliophilick friend Actually the book contains the most remarkable presentation of the utterly alien and non human that I have ever seen I don t wonder that Merritt calls it his best and worst production The human characters are commonplace and wooden just pulp hokum but the scenes and phaenomena oh boy H P Lovecraft March 6 1934

**The Metal Monster** Abraham Merritt, 2020-05-21. Abraham Merritt's second novel *The Metal Monster* first saw the light of day in 1920 in *Argosy* magazine. It was not until 1946 that this masterful fantasy creation was printed in book form. In a way this work is a continuation of Merritt's first novel *The Moon Pool* 1919 as it is a narrative of America's foremost botanist Dr Walter T Goodwin, narrator of that earlier adventure as well. As Goodwin tells us he initially set out on this second great adventure to forget the terrible incidents of the first, if anything, however the events depicted in *The Metal Monster* are at least as mindblowing as those in the earlier tale. While Goodwin had encountered underground civilizations, frogmen, battling priestesses and a living light entity in the earlier tale, this time around he discovers in the Trans Himalayan wastes of Tibet a surviving Persian city, a half human priestess, AND an entire civilization made up of living metallic geometric forms, an entire city of sentient cubes, globes and tetrahedrons capable of joining together and forming colossal shapes and wielding death rays and other armaments of destruction. As in the earlier tale Goodwin is joined in his

epic adventure by a small group of can do individuals that he meets in the most unlikely godforsaken areas of the world This time around it s a brother and sister team of scientists as well as the son of one of Goodwin s old science buddies
