**Dignaga on the Interpretation of Signs** R.P. Hayes, 2012-12-06 Buddhist philosophy in India in the early sixth century C E took an important turn away from the traditional methods of explaining and systematizing the teachings in Sūtra literature that were attributed to the Buddha The new direction in which several Indian Buddhist philosophers began to move was that of following reasoning to its natural conclusions regardless whether the conclusions conflicted with traditional teachings The central figure in this new movement was Dignāga a native of South India who found his way to the centre of Buddhist education at Nalanda studied the treatises that were learned by the Buddhist intellectuals of his day and eventually wrote works of his own that formed the core of a distinctly new school of Buddhist thought Inasmuch as virtually every Indian philosopher after the sixth century had either to reject Dignāga's methods or build upon the foundations provided by his investigations into logic epistemology and language his influence on the evolution of Indian philosophy was considerable and indeed some familiarity with Dignāga's arguments and conclusions is indispensable for anyone who wishes to understand the historical development of Indian thought Moreover since the approach to Buddhism that grew out of Dignāga's meditations

**The Oxford Handbook of Sound and Imagination** Mark Grimshaw, Mark Grimshaw-Aagaard, Mads Hansen, Martin Knakkegaard, 2019 In this two volume Handbook contributors address the tendency to discuss musical imagination through terms like compositional creativity or performance technique correcting the current bias towards visual imagination to instead highlight the many forms of sonic and musical imagination **The Oxford Handbook of Sound and Imagination,**

**Volume 2** Mark Grimshaw-Aagaard, Mads Walther-Hansen, Martin Knakkegaard, 2019-07-26 Whether social cultural or individual the act of imagination always derives from a pre existing context For example we can conjure an alien s scream from previously heard wildlife recordings or mentally rehearse a piece of music while waiting for a train This process is no less true for the role of imagination in sonic events and artifacts Many existing works on sonic imagination tend to discuss musical imagination through terms like compositional creativity or performance technique In this two volume Handbook contributors shift the focus of imagination away from the visual by addressing the topic of sonic imagination and expanding the field beyond musical compositional creativity and performance technique into other aural arenas where the imagination holds similar power Topics covered include auditory imagery and the neurology of sonic imagination aural hallucination and illusion use of metaphor in the recording studio the projection of acoustic imagination in architectural design and the design of sound artifacts for cinema and computer games **Who One Is** J.G. Hart, 2009-04-21 Both volumes of this work have as

their central concern to sort out who one is from what one is In this Book 1 the focus is on transcendental phenomenological ontology When we refer to ourselves we refer both non ascriptively in regard to non propertied as well as ascriptively in regard to propertied aspects of ourselves The latter is the richness of our personal being the former is the essentially elusive central concern of this Book 1 I can be aware of myself and refer to myself without it being necessary to think of any third personal characteristic indeed one may be aware of oneself without having to be aware of anything except oneself This consideration opens the door to basic issues in phenomenological ontology such as identity individuation and substance In our knowledge and love of Others we find symmetry with the first person self knowledge both in its non ascriptive forms as well as in its property ascribing forms Love properly has for its referent the Other as present through but beyond her properties Transcendental phenomenological reflections move us to consider paradoxes of the transcendental person For example we contend with the unrepresentability in the transcendental first person of our beginning or ending and the undeniable evidence for the beginning and ending of persons in our third person experience The basic distinction between oneself as non sortal and as a person pervaded by properties serves as a hinge for reflecting on the afterlife This

transcendental phenomenological ontology of necessity deals with some themes of the philosophy of religion      **Language**

emergence of our contemporary sense of what human freedom is and why it is important This book shows that important  
features of Kant's philosophy were forged out of difficulties he had in reconciling his belief in God as creator with the concept
