Dr. Joel B. Carboni, President and Founder, GPM Global and President, IPMA USA. *Project Management beyond Waterfall and Agile* presents a flexible, universal, and integrated three-dimensional model for managing projects: the Customizable and Adaptable Methodology for Managing Projects™ (CAMMPTM). By tailoring and customizing the model to a specific industry or organization and by adapting it to a function or project classification, this model can be used to manage any project. CAMMPTM can also be used both in a traditional or an Agile environment. CAMMPTM integrates leading concepts on competence, processes, and sustainability. The model's three dimensions are project lifecycle, project management processes, and finally, competence, sustainability, and best practices. The book explains how to integrate these dimensions to manage a project across the three dimensions and the project stages. CAMMPTM is a stage-gate process which is vital for project success. The current state of practice in project management is not sustainable. The root causes of this problem include a lack of standardized processes, missing methods, or methodological approaches, and no real organizational system for managing projects. This book introduces a system to address these shortcomings. It focuses on the elements of this system, which is a practical and systematic methodological approach for managing and delivering all types of projects. CAMMPTM integrates the best learning from the various global associations in the field. The book distills the experience and knowledge of a practitioner working in different roles for more than three decades on various types of projects of all sizes and complexities.
