Multimedia Semantics The Role Of Metadata Studies In Computational Intelligence:

  Multimedia Semantics - The Role of Metadata Michael Granitzer,Mathias Lux,Marc Spaniol,2008-06-04 This book gives an overview on fundamental issues within the field of multimedia metadata focusing on contextualized ubiquitous accessible and interoperable services on a higher semantic level The book provides a selection of basic articles being a base for multimedia metadata research Furthermore it brings together experts from research and industry to present a view on the current state of the art in recent research in Multimedia Semantics and the role of Metadata   *Multimedia Semantics* Raphael Troncy,Benoit Huet,Simon Schenk,2011-07-18 In this book the authors present the latest research results in the multimedia and semantic web communities bridging the Semantic Gap This book explains collects and reports on the latest research results that aim at narrowing the so called multimedia Semantic Gap the large disparity between descriptions of multimedia content that can be computed automatically and the richness and subjectivity of semantics in user queries and human interpretations of audiovisual media Addressing the grand challenge posed by the Semantic Gap requires a multi disciplinary approach computer science computer vision and signal processing cognitive science web science etc and this is reflected in recent research in this area In addition the book targets an interdisciplinary community and in particular the Multimedia and the Semantic Web communities Finally the authors provide both the fundamental knowledge and the latest state of the art results from both communities with the goal of making the knowledge of one community available to the other Key Features Presents state of the art research results in multimedia semantics multimedia analysis metadata standards and multimedia knowledge representation semantic interaction with multimedia Contains real industrial problems exemplified by user case scenarios Offers an insight into various standardisation bodies including W3C IPTC and ISO MPEG Contains contributions from academic and industrial communities from Europe USA and Asia Includes an accompanying website containing user cases datasets and software mentioned in the book as well as links to the K Space NoE and the SMaRT society web sites http www multimediasemantics com This book will be a valuable reference for academic and industry researchers practitioners in multimedia computational intelligence and computer science fields Graduate students project leaders and consultants will also find this book of interest   **Data Mining: Foundations and Practice** Tsau Young Lin,Ying Xie,Anita Wasilewska,Churn-Jung Liau,2008-08-20 The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimul ing new data mining research directions We feel that the papers presented at these workshops may encourage the study of data mining as a scienti c eld and spark new communications and collaborations between researchers and practitioners Toexpressthevisionsforgedintheworkshopstoawiderangeofdatam ing researchers and practitioners and

foster active participation in the study of foundations of data mining we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions The content of this book includes st ies of foundations of data mining from theoretical practical algorithmical and managerial perspectives The following is a brief summary of the papers contained in this book **Multimedia Services in Intelligent Environments** George A Tsihrintzis,2008-07-02 Multimedia services involve processing transmission and retrieval of multiple forms of information Multimedia services have gained momentum in the past few years due to the easy availability of computing power and storage media Societyisdemandinghuman likeintelligentbehaviour suchasadaptationand generalization from machines every day With this view in mind researchers are working on fusing intelligent paradigms such as arti cial neural networks swarm intelligence arti cial immune systems evolutionary computing and multiagents with multimedia services Arti cial neural networks use neurons interconnected using various schemes for fusing learning in multimedia based systems Evolutionary c puting techniques are used in tasks such as optimization Typical multiagent systems are based on Belief Desire Intention model and act on behalf of the users Typical examples of intelligent multimedia services include digital braries e learning and teaching e government e commerce e entertainment e health and e legal services This book includes 15 chapters on advanced tools and methodologies pertaining to the multimedia services The authors and reviewers have c tributed immensely to this research oriented book We believe that this search volume will be valuable to professors researchers and students of all disciplines such as computer science engineering and management We express our sincere thanks to Springer Verlag for their wonderful e torial support *Applications of Computational Intelligence in Biology* Tomasz G. Smolinski,Mariofanna G. Milanova,Aboul-Ella Hassanien,2008-06-10 Computational Intelligence CI has been a tremendously active area of search for the past decade or so There are many successful applications of CI in many sub elds of biology including bioinformatics computational nomics protein structure prediction or neuronal systems modeling and an ysis However there still are many open problems in biology that are in d perate need of advanced and e cient computational methodologies to deal with tremendous amounts of data that those problems are plagued by fortunately biology researchers are very often unaware of the abundance of computational techniques that they could put to use to help them analyze and understand the data underlying their research inquiries On the other hand computational intelligence practitioners are often unfamiliar with the part ular problems that their new state of the art algorithms could be successfully applied for The separation between the two worlds is partially caused by the use of di erent languages in these two spheres of science but also by the relatively small number of publications devoted solely to the purpose of fac itating the exchange of new computational algorithms and methodologies on one hand and the needs of the biology realm on the other The purpose of this book is to provide a medium for such an exchange of expertise and concerns In order to achieve the goal we have solicited cont butions from both computational intelligence as well as biology researchers **Advances in Web-Based**

computation theory in general This volume is complementary of the volumes in the Springer series Studies in Fuzziness and Soft Computing number 148 and Studies in Computational Intelligence 25 **Intelligent Interactive Systems in Knowledge-Based Environments** Maria Virvou,L. C. Jain,2008-06-02 The main aim of this research book is to report a sample of the most recent advances in the field of intelligent interactive systems in knowledge based environment The contents of this book include Introduction to intelligent interactive systems Affective bi modal intelligent tutoring system Estimation of development costs in intelligent systems Narrative interactive learning Knowledge acquisition for configurable products and services Interaction modalities in mobile contexts Face images classification for human computer interactions Users modelling for distance learning Group adaptation and group modelling A personalized news aggregator on the web This book would prove useful to the researchers professors research students and practitioners as it reports novel research work on innovative topics in the area of intelligent interactive systems **Holonic Execution: A BDI Approach** Jacqueline Jarvis,Dennis Jarvis,Ralph Rönnquist,2008-05-30 This book contains the latest research on intelligent holonic execution It presents a conceptual model for Holonic Manufacturing Execution that draws together research threads from both holonics and multi agent systems The book presents the model by mapping it onto two current BDI programming frameworks and uses this for two separate implementations of an execution system for an industrial strength robotic assembly cell This work also introduces the Team Programming paradigm **Intelligent Computer Techniques in Applied Electromagnetics** Slawomir Wiak,Andrzej Krawczyk,Ivo Dolezel,2008-08-19 This book contains papers presented at the International Symposium on Elect magnetic Fields in Mechatronics Electrical and Electronic Engineering ISEF 07 which was held in Prague the Czech Republic from September 13 to 15 2007 ISEF conferences have been organized since 1985 and from the very beginning it was a common initiative of Polish and other European researchers who have dealt with electromagnetic eld in electrical engineering The conference travels through Europe and is organized in various academic centres Relatively often it was held in some Polish city as the initiative was on the part of Polish scientists Now ISEF is much more international and successive events take place in different European academic centres renowned for electromagnetic research This time it was Prague famous for its beauty and historical background as it is the place where many c tures mingle The venue of the conference was the historical building of Charles University placed just in the centre of Prague The Technical University of Prague in turn constituted the logistic centre of the conference It is the tradition of the ISEF meetings that they try to tackle quite a vast area of computational and applied electromagnetics Moreover the ISEF symposia aim at combining theory and practice therefore the majority of papers are deeply rooted in engineering problems being simultaneously of a high theoretical level **Knowledge-Driven Computing** Carlos Cotta,Simeon Reich,Antoni Ligeza,2008-05-30 The main aim of this volume has been to gather together a selection of recent papers providing new ideas and solutions for a wide spectrum of Knowledge Driven Computing approaches More precisely the ultimate goal has been to collect new knowledge

representation processing and computing paradigms which could be useful to practitioners involved in the area of discussion To this end contributions covering both theoretical aspects and practical solutions were preferred *Hybrid Metaheuristics* Christian Blum,Andrea Roli,Michael Sampels,2008-04-11 Optimization problems are of great importance across a broad range of fields They can be tackled for example by approximate algorithms such as metaheuristics This book is intended both to provide an overview of hybrid metaheuristics to novices of the field and to provide researchers from the field with a collection of some of the most interesting recent developments The authors involved in this book are among the top researchers in their domain **Computational Intelligence: A Compendium** John Fulcher,L. C. Jain,2008-06-16 Computational Intelligence A Compendium presents a well structured overview about this rapidly growing field with contributions of leading experts in Computational Intelligence The main focus of the compendium is on applied methods tired and proven effective to realworld problems which is especially useful for practitioners researchers students and also newcomers to the field The 25 chapters are grouped into the following themes I Overview and Background II Data Preprocessing and Systems Integration III Artificial Intelligence IV Logic and Reasoning V Ontology VI Agents VII Fuzzy Systems VIII Artificial Neural Networks IX Evolutionary Approaches X DNA and Immune based Computing Soft Computing Devendra K. Chaturvedi,2008-08-20 This book is an introduction to some new fields in soft computing with its principal components of fuzzy logic ANN and EA The approach in this book is to provide an understanding of the soft computing field and to work through soft computing using examples It also aims to integrate pseudo code operational summaries and Matlab codes to present computer simulation to include real world applications and to highlight the distinctive work of human consciousness in machine **Electronic Commerce** Makoto Yokoo,Takayuki Ito,Minjie Zhang,Juhnyoung Lee,Tokuro Matsuo,2008-07-09 This book covers recent advances in electronic commerce research activities It aims to encourage activities in this field and to serve researchers with an interest in electronic commerce This book is edited from some aspects of e commerce researches including theoretical mechanism design of trading based on auctions allocation mechanism based on negotiation among multi agent case study and analysis of e trading data engineering issues in e commerce and so on **Enhancing Cognitive Assistance Systems with Inertial Measurement Units** Wolfgang Guenthner,2008-05-27 1 1 Motivation Throughout the last decade major car manufacturers have introduced a great riety of di erent assistance systems to make driving safer and more comfortable Mechatronic systems like dynamic stability control situation dependant suspension adjustment or the recently introduced night vision cameras are just a few examples among a range of helpful developments The current focus of research is on cognitive assistance systems for high level p ception of the environment Rather than present mere images to the driver these future systems extract all relevant information and provide a reduced set that alerts to possible dangers or in a further stage directly takes over control of the vehicle to prevent accidents TheseStepsTowardstheSeeingCar were presented as a keynote speech at

theAdvancedMicrosystemsforAutomotiveApplications2007 conference byVolkswagen 87 In addition to radar ultrasonic and laser sensors concepts include video cameras for the perception of the medium and far range Video will play an especially important role in future driver assistance since the tra c environment is designed for human needs and thus relies predominantly on visual cues For the visual assessment of the environment two aspects are crucial and will be covered in this book First the vehicle has to know its own motion in space in order to reliably di erentiate visual motion caused by other objects such as moving pedestrians from that of the static environment generated by the car s own movement Second the visual sensor needs to cover a wide range with high resolution and precision *Evolutionary Swarm Robotics* Vito Trianni,2008-05-30 In this book the use of ER techniques for the design of self organising group behaviours for both simulated and real robots is introduced The book tries to mediate between two apparently opposed perspectives engineering and cognitive science The experiments presented in the book and the results obtained contribute to the assessment of ER not only as a design tool but also as a methodology for modelling and understanding intelligent adaptive behaviours

   Advances of Computational Intelligence in Industrial Systems Ying Liu,Aixin Sun,Han Tong Loh,Wen Feng Lu,Ee-Peng Lim,2008-05-23 Computational Intelligence CI has emerged as a rapidly growing field over the past decade This volume reports the exploration of CI frontiers with an emphasis on a broad spectrum of real world applications Such a collection of chapters has presented the state of the art of CI applications in industry and will be an essential resource for professionals and researchers who wish to learn and spot the opportunities in applying CI techniques to their particular problems
