Energy Law and the Sustainable Company Patricia Park, Duncan Magnus Park, 2016-04-28 What kind of decision making should multinationals engage in to create a sustainable company There is substantial debate over why CEOs senior management and Boards of Directors make the wrong decisions by not asking the right questions with the result that not only is the company itself damaged but all of the stakeholders find themselves at a detriment Focusing on innovation technology transfer and the use of intangible assets *Energy Law and the Sustainable Company* features case studies from the oil and gas sector to illustrate how to develop a sustainable business Considering corporate social responsibility from the perspective of international and national law the book demonstrates how companies can be both profitable and ethical using the influences of psychology to encourage senior decision makers to make the right decisions It was revealed that reputation was the main principle influencing decision making The book also discusses how companies have reported on their sustainability strategy and considers how technology transfer and intangible assets may play a part in addressing global sustainability This book should be invaluable reading to students and scholars of Sustainable Business Business Law Corporate Social Responsibility Environmental and Energy Law as well as Environmental and Energy Management

Legal treatment standards for international investments. Heuristic aspects Cristina-Elena Popa Tache, 2021-06-18 Discussing the standards of legal treatment for international investment means subjecting the law branch in its entirety to research Representing the most comprehensive part of particular importance for international investment law treatment standards continue to generate a series of differentiations whose understanding and approach often require the analysis of the starting points that led to the emergence by division of this branch of law International investment treatment standards represent or should represent the direct effect of the principles of international investment law thus being their expression with a pronounced logical affinity between them Specifically they are not confused with the principles but they are the practical reflection at the level of rights

and obligations applicable to the performers in this field in the highlight of the theoretical practical aspect having a customary origin as well as the principles underlying their development Following this logic and analyzing the situation of the latest investment treaties it turns out that there is an insufficiency in the preponderance of treatment standards compared to the principles much more numerous and constantly expanding of this field of law The specificity of this branch of law consists in the emphasis on its fundamental concepts essentializing what determines the whole being considered as a science of essentialization and ultimately the role of any method of scientific research is to analyze discover and highlight what this branch of law represents as a whole what determines it the connections of this ensemble with other sciences the composition and structuring of the system and the substantiation of the connections between its components The standards of legal treatment of international investments settled with the individualization of international investment law Their appearance took place gradually depending on the path marked by the stages of emergence and evolution of the legal regime of foreign investment from the legal phenomenon to the branch of law from trade in general to foreign investment in particular In all of this legal scientific research plays a key role because any codification activity must be scientifically substantiated Any codification policy must ensure a balance between the diachrony and the synchrony of international investment law between the dynamics and the statics of this law A complete analysis of the treatment standards of international investments can be performed only by a close correlation because the singular existence of a standard specific to this field is excluded from the start The importance of establishing and existence of eloquent and integrated treatment standards is a condition for survival under international economic crises The main feature of this monograph is to present the subject in a way that is as easy to understand as possible to study and apply such rules being a very useful and valuable material for students masters doctoral students theoreticians and practitioners

Gender, Law and Justice in a Global Market Ann Stewart, 2011-08-25 Theories of gender justice in the twenty first century must engage with global economic and social processes Using concepts from economic analysis associated with global commodity chains and feminist ethics of care Ann Stewart considers the way in which gender contracts relating to work and care contribute to gender inequalities worldwide She explores how economies in the global north stimulate desires and create deficits in care and belonging which are met through transnational movements and traces the way in which transnational economic processes discourses of rights and care create relationships between global south and north African women produce fruit and flowers for European consumption body workers migrate to meet deficits in affect through provision of care and sex British Asian families seek belonging through transnational marriages
