Summer Reads Overturn everything you knew about history's greatest minds in this raucous and hilarious book where it turns out there's a finer line between genius and idiot than we've previously known. As Albert Einstein almost certainly never said, everyone is a genius, but if you judge a fish by its ability to climb a tree, it will live its whole life believing that it is stupid. So begins Katie Spalding's spunky takedown of the Western canon and how genius may not be as irrefutably great as we commonly understand. While most of us may never become Einstein, it may surprise you to learn that there's probably a bunch of stuff you can do that Einstein couldn't. And as Spalding shows, the famous prodigies she explores here were quite odd by any definition. For example, Thomas Edison, inventor of the lightbulb, believed that he could communicate with the undead and built the world's very first hotline to heaven, the Spirit Phone. Marie and Pierre Curie, famous for discovering radioactivity, slept next to a lump of radioactive material for years and strapped it to their arms to watch it burn them in real time. Lord Byron, acclaimed British poet, literally took a bear with him to university. Isaac Newton discovered the laws of gravity and motion, but he also looked up at the sun without eye protection. The result? Three days of blindness. Tesla, whose scientific work led to the invention of the AC unit, fell in love with a pigeon. Edison's *Ghosts* is filled with examples of the so-called best of humanity doing to put it bluntly, some really dumb shit. You'll discover stories that deserve to be told but never are, the hilarious, regrettable, and downright bafflingly lesser-known achievements that never made it into our history books until now.

Openness and Education Andreas Meiszner, Lin Squire, Elmar Husmann, 2013-11-04. Published in association with ELIG, the aim of this new book series is to focus on key trends and innovations, pedagogic, technological, and commercial, which are either impacting or have the potential to impact the ways in which digital learning and education is understood, developed, and delivered within academic, public, and private sectors.

[The Online Tutor's Toolkit](#) Molly Bolding, 2022-10-12. This book contains everything you need to know to get started as an online tutor. It covers the essentials of tutoring: choosing your tech and software, managing homework, and getting set up, alongside detailed guidance focusing on each level of tuition. With techniques developed through research and first-hand experience, the author explains exactly how to turn existing subject knowledge into effective tutoring for students of all ages in a variety of subjects. Divided into two parts, the first answers the logistical questions facing every new tutor, such as: what equipment do I need? Where can I apply? How much should I charge? The second half focuses on how to tutor different age groups effectively and subject-specific areas, including English, Maths, and Science, as well as the author's tried and tested 5-step process for choosing a subject, assessing a student, and planning their first lessons. There is also information on how to support students writing personal statements and applying to university, as well as teaching English as a Second Language. Alongside tailored up-to-date information on available software, hardware, exam specifications, and the online tutoring marketplace, the book contains a 10-week timetable of adaptable lesson plans so new tutors can get started immediately. Finally, there are two additional downloadable chapters which expand on less common subjects and another which includes a digital download of every resource from the book. With

suggestions for resources homework and timings to support you at every stage this is an essential read for anyone wanting to succeed as an online tutor The Death Lesson Sarah Ward,2025-10-02 The sins of the past have not been forgotten Pippa Evans had been a teacher at Penbryn Hall for just one week when her body was found alongside evidence of a pill overdose Going undercover at the private school investigator Mallory Dawson senses something rotten behind the wealth and privilege Someone is leaving her coded messages but do they want to help or harm the case Mallory soon finds links to the Solstice Sisterhood a religious cult that believed punishment was cleansing When a pupil is savagely attacked on school grounds there is suddenly no time to lose in finding the killer A taut and twisty crime thriller set in the wilds of West Wales perfect for fans of Clare Mackintosh and Fiona Cummins SNOW ON THE PEA SOUP Gregory Randall,2013-08 This book represents 50 years of collecting anecdotes starting at Oxford University at the end of its golden age of developing the personality as well as the brain So different from nowadays where Britain s left wing conservative government requires the world s best known University to waste its money and time explaining to stupid schoolchildren who won t apply because they think they will be murdered because the Inspector Morse murder mysteries are set In Oxford that they are fiction pupils this stupid don t deserve any university education It goes forward to 2013 with a big airport denying there is an airline called British Airways and the potential sighting of the ghost of a cowled monk in an ancient churchyard Geographically it includes the little visited countries of Kazakhstan a real anecdote not the silliness of Borat and the tiny coral Cook Islands in the middle of the Pacific
