Museums And The Shaping Of Knowledge Heritage:

Museums and the Shaping of Knowledge Eileen Hooper Greenhill, 1992-01-23 Museums have been active in shaping knowledge over the last six hundred years Yet what is their function within today s society At the present time when funding is becoming increasingly scarce difficult questions are being asked about the justification of museums Museums and the Shaping of Knowledge presents a critical survey of major changes in current assumptions about the nature of museums Through the examination of case studies Eilean Hooper Greenhill reveals a variety of different roles for museums in the production and shaping of knowledge Today museums are once again organising their spaces and collections to present themselves as environments for experimental and self directed learning Museums and the Shaping of Knowledge E. Hooper-Greenhill, 1992 Museums and Their Visitors Eilean Hooper-Greenhill, 2013-04-15 A guide for museum and gallery staff in the development of provision for their visitors to ensure survival into the next century **Museums and Galleries** Gerard Corsane, 2005 This reader provides a starting point and introductory resource for anyone wishing to engage with certain key issues relating to the heritage museums and galleries sector The Routledge Companion to Automobile Heritage, Culture, and Preservation Barry L. Stiefel, Jennifer Clark, 2019-12-06 The Routledge Companion to Automobile Heritage Culture and Preservation explores automotive heritage its place in society and the ways we might preserve and conserve it Drawing on contributions from academics and practitioners around the world and comprising six sections this volume carries the heritage discourse forward by exploring the complex and sometimes intricate place of automobiles within society Taken as a whole this book helps to shape how we think about automobile heritage and considers how that heritage explores a range of cultural intellectual emotional and material elements well outside of the automobile body itself Most importantly perhaps it questions how we might better acknowledge the importance of automotive heritage now and in the future The Routledge Companion to Automobile Heritage Culture and Preservation is unique in that it juxtaposes theory with practice academic approaches with practical experience and recognizes that issues of preservation and conservation belong in a broad context As such this volume should be essential reading for both academics and practitioners with an interest in automobiles cultural heritage and preservation **Heritage** Rodney Harrison, 2013 Historic sites memorials national parks museumsewe live in an age in which heritage is ever present But what does it mean to live amongst the spectral traces of the past the heterogeneous piling up of historic materials in the present How did heritage grow from the concern of a handful of enthusiasts and specialists in one part of the world to something which is considered to be universally cherished And what concepts and approaches are necessary to understanding this global obsession Over the decades since the adoption of the World Heritage Convention various e crisese tm of definition have significantly influenced the ways in which heritage is classified perceived and managed in contemporary global societies Taking an interdisciplinary approach to the many tangible and intangible e thingse tm now defined as heritage this book

attempts simultaneously to account for this global phenomenon and the industry which has grown up around it as well as to develop a e toolkit of conceptse tm with which it might be studied In doing so it provides a critical account of the emergence of heritage studies as an interdisciplinary field of academic study This is presented as part of a broader examination of the function of heritage in late modern societies with a particular focus on the changes which have resulted from the globalisation of heritage during the late twentieth and early twenty first centuries Developing new theoretical approaches and innovative models for more dialogically democratic heritage decision making processes Heritage Critical Approaches unravels the relationship between heritage and the experience of late modernity whilst reorienting heritage so that it might be more productively connected with other pressing social economic political and environmental issues of our time

Museums and the Interpretation of Visual Culture Eilean Hooper-Greenhill, 2000 This is a multi disciplinary study that adopts an innovative and original approach to a highly topical question that of meaning making in museums focusing its attention on pedagogy and visual culture This work explores such questions as How and why is it that museums select and arrange artefacts shape knowledge construct a view How do museums produce values How do active audiences make meaning from what they experience in museums This stimulating book provokes debate and discussion on these topics and puts forward the idea of a new museum the post museum which will challenge the familiar modernist museum A must for Artefacts, Archives, and Documentation in the Relational Museum Mike students and professionals in the field Jones, 2021-07-14 Artefacts Archives and Documentation in the Relational Museum provides the first interdisciplinary study of the digital documentation of artefacts and archives in contemporary museums while also exploring the implications of polyphonic relational thinking on collections documentation Drawing on case studies from Australia the United Kingdom and the United States the book provides a critical examination of the history of collections management and documentation since the introduction of computers to museums in the 1960s demonstrating how technology has contributed to the disconnection of distributed collections knowledge Jones also highlights how separate documentation systems have developed managed by distinct increasingly professionalised staff impacting our ability to understand and use what we find in museums and their ever expanding online collections Exploring this legacy allows us to rethink current practice focusing less on individual objects and more on the rich stories and interconnected resources that lie at the heart of the contemporary plural participatory relational museum Artefacts Archives and Documentation in the Relational Museum is essential reading for those who wish to better understand the institutional silos found in museums and the changes required to make museum knowledge more accessible The book is a particularly important addition to the fields of museum studies archival science information management and the history of cultural heritage technologies **Heritage and Social Media** Elisa Giaccardi, 2012 Heritage and Social Media explores how social media reframes our understanding and experience of heritage Through the idea of participatory culture the book begins to examine how social media can be brought to bear on the

encounter with heritage and on the socially produced meanings and values that individuals and communities ascribe to it To highlight the specific changes produced by social media the book is structured around three major themes Social Practice New ways of understanding and experiencing heritage are emerging as a result of novel social practices of collection representation and communication enabled and promoted by social media Public Formation In the presence of widely available social technologies peer to peer activities such as information and media sharing are rapidly gaining momentum as they increasingly promote and legitimate a participatory culture in which individuals aggregate on the basis of common interests and affinities Sense of Place As computing becomes more pervasive and digital networks extend our surroundings social media and technologies support new ways to engage with the people interpretations and values that pertain to a specific territorial setting Heritage and Social Media provides readers with a critical framework to understand how the participatory culture fostered by social media changes the way in which we experience and think of heritage By introducing readers to how social media are theorized and used particularly outside the institutional domain the volume reveals through groundbreaking case studies the emerging heritage practices unique to social media In doing so the book unveils the new issues that are emerging from these practices and the new space for debate and critical argumentation that is required to illuminate what can be done in this burgeoning sector of heritage work

Urban Modernity in the Contemporary Gulf Roberto Fabbri, Sultan Sooud Al-Qassemi, 2021-09-27 Urban Modernity in the Contemporary Gulf offers a timely and engaging discussion on architectural production in the modernization era in the Arabian Peninsula Focusing on the 20th century as a starting point the book explores the display of transnational architectural practices resulting in different notions of locality cosmopolitanism and modernity Contextually with an eye on the present the book reflects on the initiatives that recently re engaged with the once ville moderne which meanwhile lost its pivotal function and meaning A city within a bigger city the urban fabric produced during the modernization era has the potential to narrate the social growth East West dynamics and citizens memories of the recent past Reading obsolescence as an opportunity the book looks into this topic from a cross country perspective It maps reads and analyses the notion of modern heritage in relation to the contemporary city and looks beyond physical transformations to embrace cultural practices and strategies of urban re appropriation It interrogates the value of modern architecture in the non West examining how academic research is expanding the debate on Gulf urbanism and describes how practices of reuse could foster rethinking neglected areas also addressing land consumption in the GCC Presenting a diverse and geographically inclusive authorship which combines established and up and coming researchers in the field this is an important reference for academics and upper level students interested in heritage studies post colonial urbanism and architecture in the non West The Open Access version of this book available at www taylorfrancis com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license Museums and Nationalism in Croatia, Hungary, and Turkey Lorenzo Posocco, 2021-11-08 Museums and

Nationalism in Croatia Hungary and Turkey draws attention to museums as political productions of the nation state and shows how they can be shaped by the political forces that rule a country Drawing on case studies and interviews from Croatia Hungary and Turkey the book investigates how the past has been exploited to serve the interests of nationalism in the twenty first century and how museums themselves are exploited to serve nationalist ideologies Posocco argues that in a world of nation states where nationalism is the dominant ideology all museums are national museums even when they aren t In this perspective they can and do in the case studies under analysis in this book become the cultural offshoots of political wars places where the national past is contested rewritten and sometimes even created from scratch and finally exhibited Paying particular attention to the decision making and economic aspects of the museum the book also examines the micro sociological and political aspects which will be the foundation for further reflections on the macro dynamics of museum making in other countries and contexts Museums and Nationalism in Croatia Hungary and Turkey provides rare and interesting insights into how museums materialise culture in the service of nationalism The book will be of interest to those engaged in the study of museums heritage nationalism memory and politics as a result Handbook of Research on Technologies and Cultural Heritage: Applications and Environments Styliaras, Georgios, Koukopoulos, Dimitrios, Lazarinis, Fotis, 2010-11-30 Handbook of Research on Technologies and Cultural Heritage Applications and Environments covers the many important uses information communication technology in enhancing the experience at cultural environments From museums to archaeological sites to festivals and artistic events to even government institutions and public buildings information communication technology is revolutionizing the way the public participates at and with these cultural sites and this reference source provides both a thorough exploration of this revolution and springboard for future discoveries

Heritage projects in the Arabian Peninsula are developing rapidly Museums and heritage sites are symbols of shifting national identities and a way of placing the Arabian Peninsula states on the international map Global i e Western heritage standards and practices have been utilised for the rapid injection of heritage expertise in museum development and site management and for international recognition The use of Western heritage models in the Arabian Peninsula inspires two key areas for research which this book examines the obscuring of indigenous concepts and practices of heritage and expressions of cultural identity and the tensions between local community concepts of heritage and identity and the new national identities being constructed through museums and heritage sites at a state level The Idea of Cultural Heritage Derek Gillman, 2010-04-12 This book reviews the competing claims that works of art belong either to a particular people and place Ireland's Heritages Mark McCarthy, 2017-09-29 This book is the first sustained attempt to incorporate critical scholarship and thought at the cutting edge of contemporary geography history and archaeology into the burgeoning field of Irish heritage studies It seeks to illustrate the validity of multiple depictions of the Irish past showing how scrutiny of heritage practices and meanings is so essential for illuminating our understanding of the present Examining Ireland s heritages from a critical perspective that celebrates notions of heterogeneity and uniqueness the distinguished contributors to this book scrutinise the multiplicity of complex relations between heritage history memory commemoration economy and cultural identity within various historical geographical and archaeological contexts Using several examples and case studies this book raises issues not only from a uniquely Irish perspective but also investigates the memorialisation and marketing of the Irish past in overseas locations such as the USA and Australia National Museums and the Origins of Nations Sheila Watson, 2020-10-28 National Museums and the Origins of Nations provides the first international survey of origins stories in national museums and examines the ways in which such museums use the distant past as a vehicle to reflect the concerns of the political present Offering an international comparison of institutions in China North and South America the Middle East Europe and Australia the book argues that national museums tell us more about what sort of community a nation wishes to be today than how and why that nation came into being Watson also reveals the ways in which narrative and exhibition design attempt to engage the visitor in an emotional experience designed to promote loyalty to and pride in the nation or to remind visitors who are not citizens that they do not belong These narratives of origin are it is claimed based on so called factual accuracies but this book reveals that they are often selective emotional and rarely critiqued within institutions At a time when nationalism is very much back on the political agenda this book highlights how museums reflect current political and social concerns National Museums and the Origins of Nations will appeal to academics and students engaged in the study of museums heritage politics nationalism and history The Routledge Handbook of Museum and Heritage Education Margaret McColl, Pete Brown, Michelle Delaney, Karl Borromäus Murr, Henrik Zipsane, 2025-06-24 The Routledge Handbook of Museum and Heritage Education is a practical reference guide that shows how museums galleries and heritage sites can

offer opportunities for successful visitor engagement Defining museums as all cultural sites that interpret collections and spaces for public education understanding and enjoyment this volume argues that museum education has a central role in the development of policies practices and research for engagement Including contributions from experts across the globe the volume shows how these sites can continue to offer unique opportunities for social physical emotional and academic engagement that are much needed to inform and empower museum visitors internationally It also demonstrates how museums galleries and heritage sites can be utilised for the betterment and sustainability of our world and the societies we live in Combining rich theory with innovative practice this book provides a comprehensive analysis of museum and heritage education today The Routledge Handbook of Museum and Heritage Education will be of interest to academics students and professionals who are based in the fields of museum education heritage adult and community education cultural studies Transformation of Archives and Heritage Education in Post-apartheid South Africa social studies psychology and tourism Geraldine Frieslaar, Olusegun Morakinyo, 2023-06-10 Although there have been significant strides to transform the demographics of archive and museum personnel develop new museums and heritage institutions and heritage training initiatives in post apartheid South Africa the Eurocentric model of the archive museum and heritage sector has largely remained intact Despite the euphoria around the transformation of heritage in the beginnings of post apartheid South Africa it can be argued that the transformation of heritage institutions has been superficial and cosmetic with the ideological foundation of the colonial archive and museum as well as Eurocentric modalities of heritage education remaining solid largely unmoved and under continuing challenge This is the thrust of this book which reflects on the transformation of archives and museum and heritage education in South Africa and argues for meaningful transformation of the sector through a decolonisation from its Eurocentric mooring Museums Journal Elijah Howarth, F.
