Museums In Motion Museums In Motion:

Museums in Motion Edward P. Alexander, Mary Alexander, 2007-11-29 In 1979 Edward P. Alexander's *Museums in Motion* was hailed as a much needed addition to the museum literature. In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society, it served as an essential resource for those seeking to enter the museum profession and for established professionals looking for an expanded understanding of their own discipline. Now Mary Alexander has produced a newly revised edition of the classic text, bringing it to the twenty-first century with coverage of emerging trends, resources, and challenges. New material also includes a discussion of the children's museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in-person visits.

Museums in Motion Edward P. Alexander, 1996 In a fascinating and scholarly work, *MUSEUMS IN MOTION* examines the rise of museums since the eighteenth century in the fields of art, natural science, science and technology, history, botanical gardens, and zoos. [Book back matter](#)

Museums in Motion Juilee Decker, 2024-08-06 This book explores the histories and functions of museums while also looking at the current standing of museums and their ongoing efforts toward relevance, resiliency, and future proofing. Section I examines the beginnings of museums with chapters dedicated to art and design museums, natural history and anthropological museums, science museums, museums focused on history and the past, and gardens, zoos, and children's museums. Emphasis is on museums in the United States with some historical framing beyond the U.S. Section II explores the primary functions of museums, including conservation, exhibition, interpretation, engagement, and service. Section III examines museums from within by exploring critical issues and contemporary movements facing museums and our society: transparency and openness, labor and equity, belonging and coalition building, risk taking and risk aversion, and sustainability and empathy. Advocating for change rather than death to museums, *Museums in Motion* demonstrates the very premise that museums have been in motion all along as they have shifted from their rather simple form of a treasury storehouse and tomb to something much more complex by deeply considering where museums have come from, where they are today, and where they are going. Entirely new to this edition, Section III, *Museum Aspirations*, features five new chapters, each centered around topics rather than a museum type or museum function. Each topic is meant to be a micro narrative and springboard for a conversation about museums today and their sustainability in the future. The chapters examine museums from the inside: museum workers and their voices, especially as well as power held by people and institutions, and DEI/A, without using those individual words as chapter headings. On their own or in conjunction with the chapters in the previous sections of this book, these chapters serve as vignettes that can help readers to understand where, how, and why we need to apply critical lenses to

institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible *Museums in Motion* Edward P. Alexander, Mary Alexander, 2008 In 1979 Edward P. Alexander's *Museums in Motion* was hailed as a much needed addition to the museum literature. In combining the history of museums since the eighteenth century with a detailed examination of the function of museums and museum workers in modern society it served as an essential resource for those seeking to enter to the museum profession and for established professionals looking for an expanded understanding of their own discipline. Now Mary Alexander has produced a newly revised edition of the classic text bringing it to the twenty first century with coverage of emerging trends, resources and challenges. New material also includes a discussion of the children's museum as a distinct type of institution and an exploration of the role computers play in both outreach and traditional in person visits.

Museums in Motion Edward P. Alexander, Mary Alexander, Juilee Decker, 2017-02-23 Here is a complete introduction to the history of museums, types of museums and the key roles that museums play in the twenty first century. Following an introductory chapter looking at what a museum is today, Part I looks at the history and types of museums: art and design museums, natural history and anthropology museums, science museums, history museums, historic houses, interpretation centers and heritage sites, botanical gardens and zoos, children's museums. The second part of the book explores the primary functions of museums and museum professionals: to collect, to conserve, to exhibit, to interpret and to engage, to serve and to act. The final chapter looks at the museum profession and professional practices. Throughout, emphasis is on museums in the United States, although attention is paid to the historical framing of museums within the European context. The new edition includes discussions of technology, access and inclusivity woven into each chapter, a list of challenges and opportunities in each chapter, and *Museums in Motion* Today vignettes spread throughout the volume in which museum professionals provide their perspectives on where museums are now and where they are going. More than 140 images illustrate the volume.
