MUSIC & MEMORY

LEARNING FROM PEOPLE WITH DEMENTIA

A Lecture by Dr. Lola Cuddy & Dr. Jacalyn Duffin

Featuring Performances by The Queen's Medical School Choir

FREE
ADMISSION

Is musical memory spared over other memories in people with dementia? Lola Cuddy and Jacalyn Duffin have been testing that idea for eight years. They will describe how this prize-winning research began with curiosity about a single patient and grew into a large study involving more than fifty people with dementia and hundreds of controls. You will have a chance to test your own skills and, of course, sing along.

Photography, Music and Memory Michael Pickering, Emily Keightley, 2015-10-12 This book explores how photography and recorded music act as vehicles or catalysts in processes of remembering and how they are regarded treated valued and drawn upon as resources connecting past and present in everyday life It does so via two key concepts vernacular memory and the mnemonic imagination

Music, Collective Memory, Trauma, and Nostalgia in European Cinema after the Second World War Michael Baumgartner, Ewelina Boczkowska, 2019-09-23 In the wake of World War II the arts and culture of Europe became a site where the devastating events of the 20th century were remembered and understood Exploring one of the most integral elements of the cinematic experience music the essays in this volume consider the numerous ways in which post war European cinema dealt with memory trauma and nostalgia showing how the music of these films shaped the representation of the past The contributors consider films from the United Kingdom Poland the Soviet Union France Italy Germany Sweden Austria and the Netherlands providing a diverse and well rounded understanding of film music in the context of historical memory Memory is often underrepresented within scholarly musical studies with most of these applications found in the disciplines of ethnomusicology popular music studies music cognition and psychology and music therapy Likewise trauma has mainly been studied in relation to music in only a few historical contexts while nostalgia has attracted even less academic attention In

three parts this volume addresses each area of study as it relates to the music of European cinema from 1945 to 1989 applying an interdisciplinary approach to investigate how films use music to negotiate the precarious relationships we maintain with the past Music Collective Memory Trauma and Nostalgia in European Cinema after the Second World War offers compelling arguments as to what makes music such a powerful medium for memory trauma and nostalgia The Oxford Handbook of Music and the Brain Michael H. Thaut, Donald A. Hodges, 2019-08-01 The study of music and the brain can be traced back to the work of Gall in the 18th century continuing with John Hughlings Jackson August Knoblauch Richard Wallaschek and others These early researchers were interested in localizing musicality in the brain and learning more about how music is processed in both healthy individuals and those with dysfunctions of various kinds Since then the research literature has mushroomed especially in the latter part of the 20th and early 21st centuries The Oxford Handbook of Music and the Brain is a groundbreaking compendium of current research on music in the human brain It brings together an international roster of 54 authors from 13 countries providing an essential guide to this rapidly growing field The major themes include Music the Brain and Cultural Contexts Music Processing in The Human Brain Neural Responses to Music Musicianship and Brain Function Developmental Issues in Music and the Brain Music the Brain and Health and the Future Each chapter offers a thorough review of the current status of research literature as well as an examination of limitations of knowledge and suggestions for future advancement and research efforts The book is valuable for a broad readership including neuroscientists musicians clinicians researchers and scholars from related fields but also readers with a general interest in the topic Echoes of Memory: The Profound Connection Between Music and Our Past Pasquale De Marco, 2025-05-20 In this captivating exploration of the profound connection between music and memory we embark on a journey to understand how melodies rhythms and harmonies can unlock the hidden chambers of our past Discover the science behind how music triggers memories and how memories shape our musical preferences Delve into the therapeutic power of music its ability to reduce stress improve mood and even enhance cognitive function From the lullabies that soothe our infancy to the anthems that galvanize our spirits music is an integral part of our lives It can transport us to different times and places evoke powerful emotions and forge deep connections with others But what is it about music that makes it so evocative How does it tap into our memories and shape our identities This book provides a comprehensive exploration of the intricate relationship between music and memory Through a blend of scientific research personal anecdotes and cultural insights we uncover the mechanisms by which music interacts with our brains and hearts Discover how music can be used to improve memory enhance focus and promote relaxation Learn how music therapy can help individuals cope with trauma manage pain and navigate life transitions Explore the role of music in our personal and cultural identities How does the music we listen to reflect our values beliefs and experiences How does it connect us to others and shape our sense of community Delve into the fascinating world of music and memory and gain a deeper understanding of the power of music to

touch our lives in profound and meaningful ways With its engaging narrative and thought provoking insights this book is a must read for music lovers psychologists educators and anyone interested in the intersection of music memory and the human experience If you like this book write a review on google books

Music, Memory, Resistance Sandra Pouchet Paquet, Patricia Joan Saunders, Stephen Stuempfle, 2007 Calypsonians have long been the voice of the people delivering the complaints criticisms and even the solutions to political leaders In its earliest manifestations calypso music emerged in response to a cultural climate that demanded creative modes of expression that could both resist and record political and historical changes taking place in Trinidad and Tobago Since the 1920s and 1930s calypsonians typically have composed songs that chronicle their observations and opinions on current events focusing on specific occurrences from local scandals to current affairs while also examining broader trends Not only has calypso served as an unofficial record of historical events it emerged as a cultural weapon that yielded tremendous sway within the general audiences of the Caribbean region This collection includes contributions from calypsonians critics novelists and poets alike all engaged in representing Caribbean culture in its myriad forms It represents an array of convergences across critical perspectives political and social agendas generations and national boundaries The work of numerous calypsonians and other singers are explored including Sparrow Kitchener Chalkdust Denise Belfon and writers such as Samuel Selvon V S Naipaul Jean Rhys Errol John Paul Marshall Earl Lovelace and Lashkmi Persaud The comparative analyses provide an interdisciplinary approach to Cultural Studies making the volume essential reading for students scholars and calypso enthusiasts

On the Go with Senior Services Phyllis Goodman, 2020-02-06 Not only does this book offer insights into how to better serve all seniors but it also provides complete step by step instructions for dozens of exciting and engaging programs that can be held both onsite and offsite While serving the senior population is a standard service in public libraries it has traditionally focused on in house programs and homebound services On the Go with Senior Services is different With this inspiring and practical guide your library can rejuvenate its in house services with new programs and also take them on the road to retirement and assisted living communities adult day care programs and nursing homes and rehab centers With such diversity in the senior population this book describes strategies

for designing senior programs that fit your community's needs. It offers a trove of templates for programs that range from crafts, word games, pop culture, pets, holidays, humor, mysteries, technology, and music. It offers tips and suggestions on how to interact with seniors, including those who may have a variety of physical and cognitive needs. There are also guidelines for working with individuals suffering from dementia. A robust list of further resources is provided. The growing population of seniors presents librarians with new challenges and opportunities, and this book is a valuable guide to navigating and embracing them.

The Evolution of Rhythm Cognition: Timing in Music and Speech Andrea Ravignani, Henkjan Honing, Sonja A. Kotz, 2018-07-24. Human speech and music share a number of similarities and differences. One of the closest similarities is their temporal nature: as both i) develop over time, ii) form sequences of temporal intervals possibly differing in duration and acoustical marking by different spectral properties which are perceived as a rhythm, and iii) generate metrical expectations. Human brains are particularly efficient in perceiving, producing, and processing fine rhythmic information in music and speech. However, a number of critical questions remain to be answered: Where does this human sensitivity for rhythm arise? How did rhythm cognition develop in human evolution? How did environmental rhythms affect the evolution of brain rhythms? Which rhythm-specific neural circuits are shared between speech and music, or even with other domains? Evolutionary processes on long time scales often prevent direct observation; understanding the psychology of rhythm and its evolution requires a close fitting integration of different perspectives. First, empirical observations of music and speech in the field are contrasted and generate testable hypotheses. Experiments exploring linguistic and musical rhythm are performed across sensory modalities, ages, and animal species to address questions about domain specificity, development, and an evolutionary path of rhythm. Finally, experimental insights are integrated via synthetic modeling, generating testable predictions about brain oscillations underlying rhythm cognition and its evolution. Our understanding of the cognitive, neurobiological, and evolutionary bases of rhythm is rapidly increasing. However, researchers in different fields often work on parallel, potentially converging strands with little mutual awareness. This research topic builds a bridge across several disciplines, focusing on the cognitive neuroscience of rhythm as an evolutionary process. It includes contributions encompassing, although not limited to: 1) developmental and comparative studies of rhythm, e.g., critical acquisition periods, innateness; 2) evidence of rhythmic behavior in other species, both spontaneous and in controlled experiments; 3) comparisons of rhythm processing in music and speech, e.g., behavioral experiments, systems neuroscience perspectives on music speech networks; 4) evidence on rhythm processing across modalities and domains; 5) studies on rhythm in interaction and context, social affective, etc.; 6) mathematical and computational, e.g., connectionist, symbolic models of rhythmicity as an evolved behavior.

Music - Memory - Minorities: Between Archive and Activism Zuzana Jurková, Veronika Seidlová, 2020-12-01. What can music say about group specifics, especially the specifics of ethnic minorities? In this volume, the focus is on one distinctive aspect of minority culture: collective memory. This is not an imprint of the past; it arises as an image

created from the motives of the past but shaped by the needs and interests of the present and various actors participate in its creation. If the medium of remembrance is music, a powerful medium which thanks to its polysemantic character makes it possible to connect the individual and the collective to represent communities and to rewrite group boundaries who are the actors and what images do they create. The book *Music Memory Minorities Between Archive and Activism* focuses on the musical remembrance of Roma and Jews. In addition to exploring individual cases, the text presents and follows a remarkable arc that allows us to observe the role of music in the ethno emancipatory process of minorities.

Music, Memory and Memoir Robert Edgar, Fraser Mann, Helen Pleasance, 2019-06-27. *Music Memory and Memoir* provides a unique look at the contemporary cultural phenomenon of the music memoir and leading from this the way that music is used to construct memory. Via analyses of memoirs that consider punk and pop indie and dance, this text examines the nature of memory for musicians and the function of music in creating personal and cultural narratives. This book includes innovative and multidisciplinary approaches from a range of contributors consisting of academics, critics, and musicians evaluating this phenomenon from multiple academic and creative practices and examines the contemporary music memoir in its cultural and literary contexts.

Music as a Chariot Richard K. Thomas, 2018-02-02. *Music as a Chariot* offers a multidisciplinary perspective whose primary proposition is that theatre is a type of music. Understanding how music enables the theatre experience helps to shape our entire approach to the performing arts. Beginning with a discussion on the origin and nature of time, the author takes us on an evolutionary journey to discover how music language and mimesis co-evolved eventually coming together to produce the complex way we experience theatre. The book integrates the evolutionary neuroscience of the human brain into this journey, offering practical implications and applications for the auditory expression of this concept, namely the fundamental techniques artists use to create sound scores for theatre. With contributions from directors, playwrights, actors, and designers, *Music as a Chariot* explores the use of music to carry ideas into the human soul, a concept that extends beyond the theatrical to include film, video, gaming, dance, or anywhere art is manipulated in time.

Medieval Music and the Art of Memory Anna Maria Busse Berger, 2019-10-08. Winner of the ASCAP Deems Taylor Award and Society of Music Theory's Wallace Berry Award. This bold challenge to conventional notions about medieval music disputes the assumption of pure literacy and replaces it with a more complex picture of a world in which literacy and orality interacted. Asking such fundamental questions as how singers managed to memorize such an enormous amount of music and how music composed in the mind rather than in writing affected musical style, Anna Maria Busse Berger explores the impact of the art of memory on the composition and transmission of medieval music. Her fresh innovative study shows that although writing allowed composers to work out pieces in the mind, it did not make memorization redundant but allowed for new ways to commit material to memory. Since some of the polyphonic music from the twelfth century and later was written down, scholars have long assumed that it was all composed and transmitted in written form. Our understanding of medieval music

has been profoundly shaped by German philologists from the beginning of the last century who approached medieval music as if it were no different from music of the nineteenth century But *Medieval Music and the Art of Memory* deftly demonstrates that the fact that a piece was written down does not necessarily mean that it was conceived and transmitted in writing Busse Berger's new model one that emphasizes the interplay of literate and oral composition and transmission deepens and enriches current understandings of medieval music and opens the field for fresh interpretations

Popular Music Scenes and Cultural Memory Andy Bennett, Ian Rogers, 2016-11-23 This volume explores the ways in which music scenes are not merely physical spaces for the practice of collective musical life but are also inscribed with and enacted through the articulation of cultural memory and emotional geography The book draws on empirical data collected in cities throughout Australia In terms of understanding the relationship between music scenes and participants much of the existing popular music literature tends to avoid one key aspect of scene its predominant past tense and memory based nature Nascent music scenes may be emergent and on going but their articulation in the present is often based on past events ideas and histories There is a noticeable gap between the literature concerning popular music ethnography and the growing body of work on cultural memory and emotional geography This book is a study of the conceptual formation and use of music scenes by participants It is also an investigation of the structures underpinning music scenes more generally

The Influence of Vocal Music on Memory Margaret Miller Brabson, 1966

Music, Nostalgia and Memory Sandra Garrido, Jane W. Davidson, 2019-03-19 How are our personal soundtracks of life devised What makes some pieces of music more meaningful to us than others This book explores the role of memory both personal and cultural in imbuing music with the power to move us Focusing on the relationship between music and key life moments from birth to death the text takes a cross disciplinary approach combining perspectives from a history of emotions with modern day psychology empirical surveys of modern day listeners and analysis of musical works The book traces the trajectory of emotional response to music over the past 500 years illuminating the interaction between personal historical and contextual variables that influence our hard wired emotional responses to music and the key role of memory and nostalgia in the mechanisms of emotional response
