Reimagining Music Theory Chris Stover, 2024-12-27 Reimagining Music Theory Contexts Communities Creativities invites instructors to rethink how we teach music theory challenging the traditional classical canon based pedagogy and offering new and alternative approaches The study and teaching of music theory are at a crucial and invigorating crossroads as conversations are being held about contesting canons transforming pedagogical practices and finding meaningful ways to make the field inclusive and diverse in repertoire methods and student experiences This book aims to reimagine music theory as an explicitly and radically dialogic creative nimble transdisciplinary space where thinking and acting can be both deep and broad where pluralities of knowledge systems and ways of doing and being can interact and mutually inform one another and where teachers learn from students as much as the other way around Rethinking what counts as music fundamentals opening music theory to a plurality of global practices and considering music theory as a creative and community practice are all addressed Incorporating interviews with scholar teachers at the forefront of innovative music theory pedagogy throughout the book offers music theory professors and instructors frameworks for enacting meaningful change in the music theory classroom

Teaching Music Performance in

Higher Education Helen Julia Minors, Stefan Östersjö, Gilvano Dalagna, Jorge Salgado Correia, 2024-05-27 Higher Music Performance Education as taught and learned in universities and conservatoires in Europe is undergoing transformation Since the nineteenth century the master apprentice pedagogical model has dominated creating a learning environment that emphasises the development of technical skills rather than critical and creative faculties This book contributes to the renewal of this field by being the first to address the potential of artistic research in developing student centred approaches and greater student autonomy This potential is demonstrated in chapters illustrating artistic research projects that are embedded within higher music education courses across Europe with examples ranging from instrumental tuition and ensemble work to the development of professional employability skills and inclusive practices Bringing together diverse and experienced voices working within Higher Music Education but often also as professional performers this edited collection pairs critical reflection with artistic insight to present new approaches to curricula for teaching interpretation and performance It calls for greater collaboration between Higher Education and professional music institutions to create closer bonds with music industries and thereby improve students career opportunities Teaching Music Performance in Higher Education will appeal to scholars performers teachers but also students whose interests centre on innovative practices in conservatoires and music departments

Studies in Historical Improvisation Massimiliano Guido, 2017-01-06 In recent years scholars and musicians have become increasingly interested in the revival of musical improvisation as it was known in the Renaissance and Baroque periods This historically informed practice is now supplanting the late Romantic view of improvised music as a rhapsodic endeavour a musical blossoming out of the capricious genius of the player that dominated throughout the twentieth century In the Renaissance and Baroque eras composing in the mind *alla mente* had an important didactic function For several categories of musicians the teaching of counterpoint happened almost entirely through practice on their own instruments This volume offers the first systematic exploration of the close relationship among improvisation music theory and practical musicianship from late Renaissance into the Baroque era It is not a historical survey per se but rather aims to re establish the importance of such a combination as a pedagogical tool for a better understanding of the musical idioms of these periods The authors are concerned with the transferral of historical practices to the modern classroom discussing new ways of revitalising the study and appreciation of early music The relevance and utility of such an improvisation based approach also changes our understanding of the balance between theoretical and practical sources in the primary literature as well as the concept of music theory itself Alongside a word centred theoretical tradition in which rules are described in verbiage and enriched by musical examples we are rediscovering the importance of a music centred tradition especially in Spain and Italy where the music stands alone and the learner must distil the rules by learning and playing the music Throughout its various sections the volume explores the path of improvisation from theory to practice and back again
