Museums And Their Visitors Museums And Their Visitors:

Museums and Their Visitors Eilean Hooper-Greenhill, 2013-04-15 A guide for museum and gallery staff in the development of provision for their visitors to ensure survival into the next century

Museums in Motion Juilee Decker, 2024-08-06 This book explores the histories and functions of museums while also looking at the current standing of museums and their ongoing efforts toward relevance resiliency and future proofing

Section I examines the beginnings of museums with chapters dedicated to art and design museums natural history and anthropological museums science museums museums focused history and the past and gardens zoos and children s museums

Emphasis is on museums in the United States with some historical framing beyond the U S

Section II explores the primary functions of museums including conservation exhibition interpretation engagement and service

Section III examines museums from within by exploring critical issues and contemporary movements facing museums and our society

transparency and openness labor and equity belonging and coalition building risk taking and risk aversion and sustainability and empathy

Advocating for change rather than death to museums

Museums in Motion demonstrates the very premise that museums have been in motion all along as they have shifted from their rather simple form of a treasury storehouse and tomb to something much more complex by deeply considering where museums have come from where they are today and where they are going

Entirely new to this edition

Section III **Museum Aspirations** features five new chapters each centered around topics rather than a museum type or museum function

Each topic is meant to be a micro narrative and springboard for a conversation about museums today and their sustainability in the future

The chapters examine museums from the inside

museum workers and their voices especially as well as power held by people and institutions and DEIA without using those individual words as chapter headings

On their own or in conjunction with the chapters in the previous sections of this book these chapters serve as vignettes that can help readers to understand where how and why we need to apply critical lenses to institutions and articulate how doing so helps us to understand this historical moment and ultimately how we can realize resiliency and sustainability for museums and those who make their existence possible

Chen, Nina K. Prebensen, Muzaffer S. Uysal, 2024-01-18 Carefully examining the challenges of meeting fast developing consumer demands and preferences this enlightening Handbook captures the difficulties involved in providing optimal service experiences It provides invaluable theoretical guidance while emphasising the evolutionary nature of experience science Reading Justice Claims on Social Media Phillip Santos, Cleophas T. Muneri, 2024-07-16 This book

explores how unresolved questions of social justice shape the character of the political terrain and political actors through the lens of social media. It treats communication as the medium through which social issues and processes are made visible. Given the rise and spread of populist politics, the views of ordinary people on social issues have never mattered more. One platform through which these voices can be studied extensively is social media. Platforms such as Facebook, Twitter, now X, YouTube, and Instagram, among others, afford ordinary citizens, often marginalized by traditional mainstream media, space to vent their opinions, engage in discussions of whatever topic, share information and ideas, and explore various kinds of information, as well as data links to which are often provided through various macro and micro discursive spaces therein. Arguably, therefore, social media have become a quintessential platform for studying contemporary sociality. Social media must be studied not just as a communication platform but one through which the social world, social processes, and social issues are made visible and in some cases enacted. With rich case studies from the Global South and a particular focus on Africa, this collection does just that.
