ENGINE INJECTION TIMING

INJECTION TIMING CONFIRMATION PROCEDURE

1. Using the crankshaft pulley, turn the engine in the specified direction. Check the injection timing at the delivery valve of the fuel injection pump for cylinder number 1. Cylinders are numbered sequentially from cylinder No. 1 from the flywheel side.

2. When the crankshaft is turned in the specified direction, the fuel level rises at the tip of the delivery valve spring holder. At that time, stop the crankshaft [2].

3. Identify the timing mark stamped on the flywheel through the access hole of the flywheel housing [3].

4. If the measured injection timing differs from the specified timing, adjust the injection timing by turning down the fuel injection pump toward the engine or to the opposite side after loosening the lock nut of the fuel injection pump.

NOTE:

- If injection timing is late, turn down the fuel injection pump away from the engine.
- If injection timing too early, turn the injection pump down toward the engine.
