displacement it still had far fewer cubes than the competition. Despite less displacement the Coyote could hold its own against bigger Chevy and Chrysler mills thanks to advanced technology such as 4V heads with better port and valvetrain geometry. The Coyote is also Ford's first foray into technology that includes Ti VCT and cam torque actuated CTA function which is a fancy way of saying variable cam timing for an incredible power curve over a broader RPM range. Now in Generation III Ford has implemented a system using both Port and Direct Fuel Injection taking advantage of the benefits of both systems in a single application. Even with all of this new technology there is always room for improvement. If you are looking for even more power from your new Coyote look no further than this volume.

Wide-Open Muscle Randy Leffingwell, 2016-05-17

Climb inside these stunning muscle car drop tops straight from the classic era of American high performance cars. Today's rarest, priciest and most highly sought after muscle cars are also the least practical. These are the striking convertibles of the 1960s and 1970s that were optioned out for drag racing. Wide Open Muscle showcases these rare cars and proves that sometimes it pays to throw practicality out the window in order to make something purely cool and fun to drive. At the peak of drag racing popularity it was common knowledge that racers needed the lightest, most rigid framed cars available. Convertibles represent the exact opposite of that description so it's amazing that these drop tops ever emerged amid the circle of full throttle dragsters. While typical convertible drivers cruised around listening to the latest Lovin' Spoonful release in the eight track tape deck, these muscle car convertibles were equipped for rock n' roll speed. These topless muscle cars are so rare because few people had the dedication or money to buy a vehicle this impractical. They're valuable because they represent the absolute extreme of the entire muscle car genre. All the cars in Wide Open Muscle are shot in similar fashion: studio style with a black background using a process known as light painting. It is the ultimate portrayal of the ultimate muscle cars.
